PREFACE	VII
I. INTRODUCTION	1
II. A SIMPLE MACROECONOMIC FRAMEWORK FOR THE SMALL OPEN ECONOMY	2
1. Building Blocks	2
2. International Openness	8
a. From Autarky to Intertemporal Trade.....	8
b. International Capital Mobility	10
3. External Shocks: Effects on the Small Open Economy	13
4. The Macroeconomic Framework: Summing Up	17
III. EFFECTS OF FISCAL POLICY ON PRIVATE DECISION-MAKING	18
1. Taxation	19
2. Government Expenditure	24
a. The Degree of Publicness of Government Spending	25
b. The Degree of Distributional Neutrality of Government Spending	25
c. Complete Characterization of Spending Categories	26
d. Diagrammatic Analysis	28
IV. ENDOGENOUS TAX RATES AND EXPENDITURE COMPOSITION IN THE SMALL OPEN ECONOMY	32
1. The Constrained Leviathan Government: Introduction	32
2. Optimality Conditions	34
3. Diagrammatic Analysis	36
4. External Shocks and Fiscal Policy Reforms	38

5. Fiscal Policy Harmonization	44
a. A Heuristic Model of International Policy Coordination.....	44
b. A More Formal Model	45
2 V. AN OUTLINE OF THE EMPIRICAL PART OF THE STUDY.....	50
1. Introduction	50
2. Predicted Signs of the Regression Coefficients.....	51
3. Selected Topics of the Intended Empirical Analysis	54
4. First Results for Tests of Inflationary Expectations.....	55
a. On the Method of Estimation	55
b. A Preliminary Look at the Forecasts	60
c. Bias Tests of the Inflation Forecasts.....	60
VI. POLICY IMPLICATIONS OF THE MODEL: THE CASE FOR COMPETITION.....	70
VII. APPENDIX TO THE THEORETICAL MODEL	73
1. The Basic Model	73
2. The Model Extended to Include Government Policy	79
a. Private Equilibrium and Intertemporal Budget Constraints	79
b. Leviathan Equilibrium	82
c. Fiscal Policy Reforms	84
d. International Policy Competition and Coordination in a Two-Country World.....	86
BIBLIOGRAPHY	92

List of Tables

Table 1 — Change in Location of Goods and Increase in External Liabilities.....	11
Table 2 — Effects of External Shocks on the Small Open Economy.....	14
X Table 3 — A Comparison of Two Systems of Capital Income Taxation	23
Table 4 — Assumptions on the Degree of Publicness and Distributional Neutrality of Three Categories of Public Spending.....	26
Table 5 — Fiscal Policy Reforms That Increase Private Wealth	42
Table 6 — Expected Signs of the Impact of Price Shocks on Fiscal Policy.....	52
Table 7 — Modelling Inflationary Expectations: Results for the Whole Sample Period.....	59
Table 8 — Forecast Errors of Inflation Forecasts: Results for Ten OECD-Countries	64
Table 9 — Rationality Tests of the Annual Inflation Forecasts	67
Table 10 — Net External Asset Positions of the EC-Countries as a Percentage of GDP, 1970, 1975, 1980, and 1987.....	71
Table A1 — External Shocks and the Small Open Economy: Size and Direction of Effects on Dependent Variables.....	77
Table A2 — Private and Social Returns to Investment	80
Table A3 — Fiscal Policy Reforms: Effects on Private Wealth	85
Table A4 — Changes in Private Government Consumption and Electoral Support under Different Assumptions on Government Behaviour	91

List of Figures

Figure 1 — Intertemporal Trade	3
Figure 2 — Static and Intertemporal Trade	7
✕ Figure 3 — Residence-Based Capital Income Taxation	20
✕ Figure 4 — Source-Based Capital Income Taxation.....	22
Figure 5 — Public Expenditure and Private Decisions	29
Figure 6 — Optimal Expenditure of the Constrained Leviathan	37
Figure 7 — Policy Changes Induced by Interest Rate Rise.....	39
✕ Figure 8 — From Competition to Collusion: How the Choice Set of Investors Is Narrowed	45
Figure 9 — Fiscal Policy Coordination	48
Figure 10 — Actual and Expected Inflation Rates for Ten Countries	61
