# Contents

## Preface

**ix**

## 1. Introduction

- Reasons for Surveys ........................................... 1
- The Components of Surveys .................................. 4
- Purposes and Goals of This Text ............................ 8

## 2. Sampling

- The Sample Frame ............................................ 10
- Selecting a One-Stage Sample ............................... 11
- Multistage Sampling ......................................... 14
- Making Estimates From Samples and Sampling Errors ... 18
- Calculating Sampling Errors for Simple Random Samples 26
- Effects of Other Sample Design Features on Sampling Errors 31
- How Big Should a Sample Be? ............................... 33
- Sampling Error as a Component of Total Survey Error ... 35
- Exercise ....................................................... 36

## 3. Nonresponse: Implementing a Sample Design

- Calculating Response Rates .................................. 38
- Bias Associated With Nonresponse .......................... 39
- Reducing Nonresponse in Telephone or Personal Interview Surveys 43
- Reducing Nonresponse to Mail Surveys ..................... 45
- Correcting for Nonresponse .................................. 47
- Nonprobability (or Modified Probability) Samples ....... 49
- Nonresponse as a Source of Error in Survey Samples .... 52
- Exercise ....................................................... 53

## 4. Methods of Data Collection

- Major Issues in Choosing a Strategy ....................... 54
- Summary Comparison ......................................... 55
- Conclusion .................................................... 64
- Exercise ....................................................... 67
- Exercise ....................................................... 68
