	Page
FOREWORD	11
EXECUTIVE SUMMARY	13
<i>CHAPTER 1</i> INTRODUCTION	21
PART I GREENHOUSE GAS EMISSIONS FROM THE TRANSPORT SECTOR	25
<i>CHAPTER 2</i> TRANSPORT AND THE ENVIRONMENT	27
2.1 Transport Energy Consumption	27
2.2 Transport and the Environment	29
2.3 Transport Energy Outlook	32
<i>CHAPTER 3</i> GREENHOUSE GAS EMISSIONS FROM TRANSPORT: MODAL COMPARISON	35
3.1 Road Passenger Transport	35
3.1.1 Cars	35
3.1.2 Buses	37
3.2 Road Freight Transport	39
3.3 Rail Passenger Transport	41
3.4 Rail Freight Transport	43
3.5 Rail Transport Case Study	43
3.6 Passenger Transport by Air	44
3.7 Air Transport Case Study	47
3.8 Freight Transport by Ships	47
3.9 Marine Transport Case Study	50

PART II	PROSPECTS FOR GREENHOUSE GAS EMISSION ABATEMENT THROUGH TECHNICAL CHANGE IN ROAD VEHICLES	51
CHAPTER 4	EMISSIONS FROM LIGHT-DUTY VEHICLES	53
4.1	Gasoline Engines	53
4.1.1	Emissions	53
4.1.2	Influences on Emissions and Efficiency	55
4.2	Diesel Engines	58
4.2.1	Emissions	60
4.2.2	Influences on Emissions and Efficiency	60
CHAPTER 5	THE POTENTIAL FOR IMPROVED FUEL ECONOMY	63
5.1	Improving Drivetrain Efficiency	64
5.2	Reducing Tractive Effort Requirements	66
5.3	The Outlook for Car Fuel Economy	66
CHAPTER 6	LIFE-CYCLE ANALYSIS OF ALTERNATIVE FUELS	75
6.1	Alternative Fuel Technology	76
6.2	The Life-Cycle Emissions Model	77
6.2.1	Stages in the Life-Cycle Analysis	77
6.3	Alternative Fuels and their Life-Cycle Emissions	80
6.3.1	Gasoline	80
6.3.2	Diesel	81
6.3.3	Liquefied Petroleum Gas (LPG)	82
6.3.4	Natural Gas	84
6.3.5	Alcohol Fuels	86
6.3.6	Hydrogen	90
6.3.7	Electric Vehicles	93
6.4	Comparison of Greenhouse Gas Emissions	97
CHAPTER 7	ECONOMIC POTENTIAL OF ALTERNATIVE FUELS	99
7.1	Underlying Assumptions	100
7.2	Calculation of Levelised Costs	108
7.3	Results	108
7.4	Breakdown of Fuel Switching Costs	111
7.5	Cost-Effectiveness for Greenhouse Gas Emissions Reduction	113

7.6	Potential for Greenhouse Gas Emission Reduction	114
7.7	Further Work	114

CHAPTER 8 HEAVY-DUTY DIESEL VEHICLES 115

8.1	Energy Use in Heavy-Duty Vehicles	115
8.2	Current Engines	116
8.3	Legislated Emission Requirements	118
8.4	Improvements in Engine Technology	122
8.5	Exhaust Treatment	123
8.6	Fuel Quality	126
8.7	Alternative Fuels	127

PART III MARKETS AND POLICIES 131

CHAPTER 9 ALTERNATIVE FUELS' MARKETS POTENTIAL IN NORTH AMERICA 133

9.1	The Current Market	133
9.1.1	Vehicle Stock	133
9.1.2	Gasoline	133
9.1.3	Diesel	134
9.2	Outlook — Gasoline and Diesel Consumption	134
9.3	Environmental Legislation	136
9.3.1	US Federal Legislation	136
9.3.2	Legislation in California	138
9.4	Alternative Transport Fuels	140
9.5	The Future for Alternative Fuel and Electric Vehicles	143

CHAPTER 10 ALTERNATIVE FUELS' MARKET POTENTIAL IN OECD EUROPE 145

10.1	The Current Market	145
10.1.1	Vehicle Stock	145
10.1.2	Gasoline	146
10.1.3	Diesel	146
10.2	Outlook — Gasoline and Diesel Consumption	146
10.3	Environmental Legislation	148
10.3.1	Legislation in the European Community	148
10.3.2	Legislation in Non-EC Countries	150
10.4	Alternative Transport Fuels	150

CHAPTER 11	MARKETS AND POLICIES	155
11.1	Conditions for Technical Change	155
11.1.1	Vehicle Manufacturers	155
11.1.2	Fuel Suppliers	158
11.1.3	Consumers	159
11.2	Intervention in the Transport Market	161
11.2.1	Internalising External Costs	165
11.2.2	Energy Security	166
11.2.3	Congestion and Traffic Management	166
11.2.4	Accidents	167
11.2.5	Air Pollution	168
11.2.6	Fuel Taxes	169
CHAPTER 12	CONCLUSIONS	171
12.1	Car Technology	172
12.2	Alternative Fuels and Electric Vehicles	173
12.3	Policies and Strategies	175
12.4	Further Work and Recommendations	177
ANNEX 1	AIR POLLUTION FROM TRANSPORT	181
ANNEX 2	POTENTIAL CO₂ IMPACT OF ALPTRANSIT RAIL PROJECT	187
ANNEX 3	CO₂ PERSPECTIVES IN SWISS AIR TRAFFIC	191
ANNEX 4	NORWEGIAN COASTAL SHIPPING	195
ANNEX 5	EMISSIONS MODEL	199
ANNEX 6	SENSITIVITY ANALYSIS FOR COST CALCULATIONS	203
ANNEX 7	THE MARKET FOR AUTOMOTIVE DIESEL FUEL	207
ANNEX 8	THE MARKET FOR UNLEADED GASOLINE	213
ANNEX 9	TRAFFIC MODELLING IN THE NETHERLANDS	215
ANNEX 10	GREENHOUSE GAS EMISSIONS FROM AUSTRALIAN TRANSPORT	221
REFERENCES		227
GLOSSARY		235

TABLES

2.1	Global Warming Potentials, Including Indirect Effects	30
3.1	Emission Standards for Rail Locomotive Engines	43
3.2	Emission Factors for Diesel Ship Engines in International Trade	49
4.1	Typical Emissions from Oil-Burning Technologies	54
5.1	Technically Achievable Fuel Economy for New Vehicles, United States, 2006	68
5.2	Effect of Technical Changes on Fuel Economy	69
5.3	Costs of Technical Improvements	70
5.4	National Estimates and Projections of New Passenger Car Fuel Consumption	71
5.5	A US Scenario of New Car Fuel Economy	73
6.1	Status of Alternative Fuel Technology for Cars	76
6.2	Assumed Energy Inputs in Fuel Supply	79
7.1	Substitute Fuels for Cars: Costs and Greenhouse Gas Emissions	99
7.2	Cars in the United States in 2000	101
7.3	Cars in France in 2000	102
7.4	CNG Car: Additional Cost and Weight, United States	104
7.5	CNG Car: Additional Cost and Weight, France	104
7.6	Cost of CNG in the United States	105
7.7	Cost of CNG in France	106
8.1	US Emission Legislation, Heavy-Duty Vehicles	119
8.2	CARB Proposals for Heavy-Duty Engine Standards	120
8.3	Emission Regulations in Europe, Heavy-Duty Vehicles	121
8.4	New Technology for Heavy-Duty Diesel Engines	123
8.5	Technology to Satisfy 2005 Emission Regulations for Heavy-Duty Vehicles	126
8.6	Alternative Fuel Technology for Heavy-Duty Diesel Engines	129
9.1	US Federal Emission Standards, Light-Duty Vehicles	136
9.2	US Gasoline Specifications: Current Specifications and Clean Air Act Mandate	138
9.3	CARB New Light-Duty Vehicle Emission Standards	139
9.4	CARB Projection of Vehicle-Kilometres Travelled for 2010	143
10.1	Limits in the Consolidated Directive	149
10.2	European Commission Proposal for 1996	150
11.1	Factors Affecting the Decision to Buy a Car	159
11.2	Policy Measures to Influence Passenger Transport Supply and Demand, and Their Areas of Impact	162
A1.1	Welfare Effects of Pollutants from Motor Vehicles	182
A1.2	Health Effects of Pollutants from Motor Vehicles	182
A2.1	Expected Impact of AlpTransit Project in 2010	188
A2.2	Summary of AlpTransit's Impact on Electricity Demand, Fuel Savings and CO ₂ Emissions, 2010-2020	189
A4.1	Emission Outlook for Norwegian Coastal Shipping	197
A5.1	Car Weight and Energy Use Assumptions	199
A6.1	Cost of Fuel Switching in the United States	204

A6.2	Cost of Fuel Switching in France	205
A9.1	Effects of Measures in Transport Model for the Netherlands, 2010	218
A9.2	Effects of Policy Packages in Transport Model for the Netherlands, 2010	218

FIGURES

1	Life-Cycle Greenhouse Gas Emissions from Alternative-Fuel Cars, North America, 2000	16
2	Greenhouse Gas Emission Ranges from Alternative-Fuel Cars	17
3	Alternative Fuels' Cost-Effectiveness for Greenhouse Gas Abatement	18
4	Cost of Switching from Gasoline to Diesel or CNG	18
2.1	Transport Sector Oil Use in OECD Regions, 1960 to 1990	28
2.2	Transport Share of Total Oil Use in OECD Regions, 1960 to 1990	28
2.3	Emissions of Greenhouse Gases in 1986: OECD Transport, OECD Total and World Transport	30
2.4	Carbon Emissions by Sector, OECD, 1990	31
2.5	Carbon Emissions from Transport Oil Use, OECD, 1990	32
2.6	Primary Energy Supply in the OECD: History and Outlook, 1975 to 2010	33
2.7	World CO ₂ Emissions to 2000	34
3.1	Annual Per Capita Car Travel, 1970 to 1988	36
3.2	Car Energy Use per Passenger-km, 1970 to 1990	36
3.3	Inland Public Transport Travel per Capita, by Mode	38
3.4	National Averages of Energy Use, by Inland Transport Mode	39
3.5	Freight Traffic and Modal Shares	40
3.6	Greenhouse Gas Emissions from Tractive Effort Provision	42
3.7	World Air Travel, 1969 to 1989	44
Box	Aircraft Engines	45
3.8	Aircraft Energy Use per Passenger-km, US Domestic Flights, 1970 to 1990	46
3.9	Marine Bunker Fuel Use, OECD, 1960 to 1990	48
Box 1	Gasoline Otto-Cycle Engines	54
4.1	Effect of Air/Fuel Ration on Emissions	56
Box 2	Diesel Compression-Ignition Engines	59
5.1	Technical Approaches to Reducing Car Energy Use and Greenhouse Gas Emissions	64
Box	Tested Fuel Economy vs. On-Road Fuel Economy	72
5.2	Car Energy Use per Vehicle-km, 1970-1990	72
6.1	Gasoline Car Life-Cycle Greenhouse Gas Emissions	81
6.2	Diesel Car Life-Cycle Greenhouse Gas Emissions	82
6.3	LPG Car Life-Cycle Greenhouse Gas Emissions	83
6.4	CNG Car Life-Cycle Greenhouse Gas Emissions	85
6.5	Methanol Car Life-Cycle Greenhouse Gas Emissions (Methanol from Natural Gas)	88
6.6	Ethanol Car Life-Cycle Greenhouse Gas Emissions (Ethanol from Maize)	89
6.7	Methanol Car Life-Cycle Greenhouse Gas Emissions (Methanol from Wood)	90

6.8	Hydrogen Car Life-Cycle Greenhouse Gas Emissions	92
6.9a	Electric Vehicle Life-Cycle Greenhouse Gas Emissions, North America, 2000	95
6.9b	Electric Vehicle Life-Cycle Greenhouse Gas Emissions, OECD Europe, 2000	95
6.10a	Life-Cycle Greenhouse Gas Emissions for Alternative-Fuel Cars, North America, 2000	96
6.10b	Life-Cycle Greenhouse Gas Emissions for Alternative-Fuel Cars, OECD Europe, 2000	96
6.11	Greenhouse Gas Emission Ranges for Alternative-Fuel Cars	97
7.1	Alternative Fuels' Cost-Effectiveness for Greenhouse Gas Abatement	100
7.2	Variation of Car Use with Age, United States	107
7.3	Costs of Driving Gasoline, Diesel and CNG Vehicles, United States and France	109
7.4	Cost of Switching from Gasoline to Diesel	110
7.5	Cost of Switching from Gasoline to Diesel or CNG	111
7.6	Cost Factors in Fuel Switching, United States and France	112
7.7	Greenhouse Gas Abatement Costs, United States and France	113
8.1	Particulates/NO _x Trade-Off for Heavy-Duty Diesel/Engines.....	117
8.2	The US Federal Transient Test Cycle	119
8.3	The European 13 Mode Test Cycle	121
8.4	Effect of Oxidation Catalyst on Particulate Emissions from Heavy-Duty Diesel Engines	125
8.5	Life-Cycle Greenhouse Gas Emissions from Heavy-Duty Vehicles	129
9.1	World Energy Outlook, North America	135
9.2	Use of Natural Gas and LPG in Road Transport, North America, 1960 to 1990	140
10.1	World Energy Outlook, OECD Europe	147
10.2	Use of Natural Gas and LPG in Road Transport, OECD Europe, 1960 to 1990	151
11.1	Unleaded Gasoline Price and Share of Gasoline Market in the United Kingdom, 1985 to 1991	170
11.2	Diesel Fuel Price and Diesel Car Share of Fleet in France, 1970 to 1991	170
A1.1	Emissions from Transport: Local, Regional and Global Effects	181
A4.1	Domestic Goods Transport, Norway, 1970 to 1990	195
A4.2	Energy Use in Norwegian Transport, 1988	196
A7.1	Rotterdam Spot Prices of Automotive Fuels, 1975 to 1991	208
A7.2	Average Retail Prices for Automotive Fuels, OECD, 1978 to 1990	208
A7.3	Diesel-Gasoline Price Difference and Sales of Diesel Cars, United States, 1970 to 1981	209
A7.4	Diesel Share of New Cars Sales, France, 1980 to 1990	211
A10.1	CO ₂ Emissions from Australian Domestic Transport, 1987/88	222
