Chapter 1  Definitions and examples
   1.1  Introduction  3
   1.2  Convex polyhedral cones  8
   1.3  Affine toric varieties  15
   1.4  Fans and toric varieties  20
   1.5  Toric varieties from polytopes  23

Chapter 2  Singularities and compactness
   2.1  Local properties of toric varieties  28
   2.2  Surfaces; quotient singularities  31
   2.3  One-parameter subgroups; limit points  36
   2.4  Compactness and properness  39
   2.5  Nonsingular surfaces  42
   2.6  Resolution of singularities  45

Chapter 3  Orbits, topology, and line bundles
   3.1  Orbits  51
   3.2  Fundamental groups and Euler characteristics  56
   3.3  Divisors  60
   3.4  Line bundles  63
   3.5  Cohomology of line bundles  73

Chapter 4  Moment maps and the tangent bundle
   4.1  The manifold with singular corners  78
   4.2  Moment map  81
   4.3  Differentials and the tangent bundle  85
   4.4  Serre duality  87
   4.5  Betti numbers  91

Chapter 5  Intersection theory
   5.1  Chow groups  96
   5.2  Cohomology of nonsingular toric varieties  101
   5.3  Riemann-Roch theorem  108
   5.4  Mixed volumes  114
   5.5  Bézout theorem  121
   5.6  Stanley’s theorem  124
