

CONTENTS

PART I: THE SCIENTIFIC AND ECONOMIC CONTEXT

- Chapter 1. **The 'Biophysical' Economy**
— aspects of the interaction between economy and environment 3
T. Jackson, R. Costanza, M. Overcash, and W. Rees
- Chapter 2. **Environmental Quality Objectives**
— assimilative capacity and critical load concepts in environmental management 29
M. Chadwick and J. Nilsson
- Chapter 3. **The Precautionary Principle**
— towards anticipatory environmental management 41
V. Dethlefsen, T. Jackson, and P. Taylor
- Chapter 4. **Uncertainty and Environmental Learning**
— reconceiving science and policy in the preventive paradigm 63
B. Wynne
- Chapter 5. **Costs of the Toxic Legacy**
— lessons from the remediation of superfund sites 85
K. Davis and G. Hyfantis
- Chapter 6. **Hazardous Futures**
— waste and development in the industrial economy 105
T. Jackson

PART II: THE PREVENTIVE STRATEGY

- Chapter 7. **Towards Prevention**
— the emerging environmental management paradigm 125
J. Hirschhorn, T. Jackson, and L. Baas
- Chapter 8. **Principles of Clean Production**
— an operational approach to the preventive paradigm 143
T. Jackson

Chapter 9. Industrial Metabolism	
— closing the materials cycle	165
<i>R. U. Ayres</i>	
Chapter 10. Profiting from Pollution Prevention	
— better environmental protection, increased economic competitiveness	189
<i>M. Dorfman, A. White, M. Becker, and T. Jackson</i>	
Chapter 11. Product Lifecycle Assessment	
— development of a methodology	207
<i>N. de Oude</i>	
Chapter 12. Material Concerns	
— from pollution control to materials policy	225
<i>K. Geiser</i>	
Chapter 13. Risk Reduction and Chemicals Control	
— lessons from the Swedish Chemicals Action Programme	237
<i>B. Wahlström and B. Lundqvist</i>	
Chapter 14. Optimal Utilisation and Durability	
— towards a new definition of the service economy	261
<i>W. R. Stahel and T. Jackson</i>	

PART III: DEVELOPING A POLICY FRAMEWORK

Chapter 15. Policy Options for Clean Production	
— encouraging environmentally friendly technologies and products	295
<i>H. Yakowitz and R. Hanmer</i>	
Chapter 16. Economic Policy and Environmental Assurance	
— managing the environmental impacts of economic systems	323
<i>C. Perrings, R. Costanza, T. Jackson, and W. Rees</i>	
Chapter 17. Liability for the Environment	
— lessons from the development of civil liability in Europe	345
<i>P. Simmons and J. Cowell</i>	

EPILOGUE

Chapter 18. Values, Quality and Sustainable Development — the role of the cultural factor in the environmental reorientation of the system of production and consumption	367
<i>E. Manzini</i>
