Editors' Preface v

Addresses of Authors vii

I Geometric Aspects of Two-Dimensional Complexes 1
Cynthia Hog-Angeloni and Wolfgang Metzler
1 Complexes of Low Dimensions and Group Presentations . . . . . . . . . 1
2 Simple-Homotopy and Low Dimensions . . . . . . . . . . . . . . . . . . . . . . . 11
3 P.L. Embeddings of 2-Complexes into Manifolds . . . . . . . . . . . . . . . . . 29
4 Three Conjectures and Further Problems . . . . . . . . . . . . . . . . . . . . . . 44

II Algebraic Topology for Two Dimensional Complexes 51
Allan J. Sieradski
1 Techniques in Homotopy . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 51
2 Homotopy Groups for 2-Complexes . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 62
3 Equivariant World for 2-Complexes . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 75
4 Mac Lane-Whitehead Algebraic Types . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 88

III Homotopy and Homology Classification of 2-Complexes 97
M. Paul Latiolais
1 Bias Invariant & Homology Classification . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 97
2 Classifications for Finite Abelian π₁ . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 111
3 Classifications for Non-Finite π₁ (with Cynthia Hog-Angeloni) 117
IV  Crossed Modules and $\Pi_2$ Homotopy Modules  125
   Micheal N. Dyer
1  Introduction .......................................... 125
2  Crossed and Precrossed Modules ....................... 126
3  On the Second Homotopy Module of a 2-Complex .... 140
4  Identity Properties .................................... 148

V  Calculating Generators of $\Pi_2$  157
   William A. Bogley and Steve J. Pride
1  The Theory of Pictures ............................... 157
2  Generation of $\Pi_2$ ................................ 167
3  Applications and Results ............................ 176

VI  Applications of Diagrams to Decision Problems  189
   Günther Huck and Stephan Rosebrock
1  Introduction .......................................... 189
2  Decidability and Dehn's Algorithm ................... 190
3  Cayley Graph and van Kampen Diagrams ............... 192
4  Word Hyperbolic Groups and Combings ................. 197
5  Curvature Tests ....................................... 203

VII Fox Ideals, $N$-Torsion and Applications to Groups and
    3-Manifolds  219
   Martin Lustig
1  Fox ideals ........................................... 220
2  Applications of Fox ideals: Tests for the rank, the
t    deficiency and the homological dimension of a group .. 225
3  $N$-torsion: Basic theory ............................ 230
