Introduction 1

Part I Utility Functions 5

1 The Linear Logarithmic Utility Function 7
  1.1 The Function and its Properties 8
  1.2 Consumer Demand Function 10
  1.3 Price and Income Elasticities 11
  1.4 Engel Expenditure System 12
  1.5 Duality, Expenditure Shares, and Elasticities 14
  1.6 Empirical Remarks 16
  1.7 Summary 17

2 The Stone–Geary Utility Function 20
  2.1 The Function and its Properties 21
  2.2 Consumer Demand Function 22
  2.3 Stone–Geary Linear Expenditure System 25
  2.4 Dual Approach to the Expenditure Share Functions and Allen–Uzawa Partial Elasticities of Substitution 26
  2.5 Empirical Remarks 27
Contents

2.6 Summary Appendix

3 The Houthakker Addilog Utility Function 33
  3.1 Additivity and its Consequences 34
  3.2 The Direct Addilog Utility Function and the Expenditure Share Functions 40
  3.3 Indirect Addilog Utility Function and the Expenditure Share Functions 42
  3.4 Elasticities 43
  3.5 Empirical Remarks 44
  3.6 Summary 45

4 The Rotterdam System of Demand Functions 47
  4.1 General Features of the Utility Function 48
  4.2 The “Fundamental Matrix Equation of the Theory of Consumer Demand” under “Almost” Additive Preferences 48
  4.3 Demand Equations in Infinitesimal Changes 52
  4.4 Empirical Remarks 54
  4.5 Summary 55

5 The Constant-Elasticity-of-Substitution Utility Function and Its Generalization 57
  5.1 The Constant-Elasticity-of-Substitution Utility Function and its Properties 58
  5.2 The S-Branch Utility Function and its Properties 60
  5.3 Empirical Remarks 63
  5.4 Summary 64

6 The Transcendental Logarithmic Utility Function 67
  6.1 Direct and Indirect Utility Functions and Expenditure Shares 68
  6.2 Properties of the Indirect Utility Function 69
  6.3 Elasticities 72
  6.4 The Almost Ideal Demand System 73
  6.5 Empirical Remarks 74
  6.6 Summary 75
  Appendix 76

7 The Constant-Elasticity-of-Substitution–Translog Utility Function 81
7.1 The Function and its Properties 82
7.2 Expenditure Share Functions and Elasticities 84
7.3 Empirical Remarks 85
7.4 Summary 86
Appendix 86

Part II Production Functions 91

8 The Cobb–Douglas Production Function 93
8.1 The Function and its Properties 94
8.2 Factor Intensity 98
8.3 Derived Demand for Productive Factors 102
8.4 Output–Cost Duality and Allen–Uzawa Partial Elasticities of Substitution 104
8.5 The Price Equation 106
8.6 Empirical Remarks 106
8.7 Summary 107

9 The Constant-Elasticity-of-Substitution Production Function 110
9.1 The Function and its Properties 111
9.2 Productivity, Factor Shares of Output, and Factor Intensity 113
9.3 Demand for Inputs 115
9.4 Dual Approach to Production 117
9.5 Empirical Remarks 118
9.6 Summary 120
Appendix 121

10 The Generalized Constant-Elasticity-of-Substitution Production Function 125
10.1 The Partial Elasticity of Substitution 126
10.2 The Unit Cost Function and the Allen–Uzawa Partial Elasticity of Substitution 127
10.3 The \(n\)-Factor Constant-Elasticity-of-Substitution Production Function, Elasticities of Substitution, and Factor Shares 128
10.4 Empirical Remarks 129
10.5 Summary 130

11 The Two-Level Constant-Elasticity-of-Substitution Production Function 132
Contents

11.1 The Function and its Properties 133
11.2 Intra-class and Inter-class Elasticities of Substitution 134
11.3 Factor-Share Functions 136
11.4 Empirical Remarks 137
11.5 Summary 137

12 The Transcendental Logarithmic Production Function 139
12.1 The Function and its Properties 141
12.2 Duality, Translog Cost Function, Factor-Share Functions, and Elasticities 144
12.3 Empirical Remarks 147
12.4 Summary 151
Appendix 151

13 The Constant-Elasticity-of-Substitution–Translog Production Function 155
13.1 Limitations of the Translog Production Function 155
13.2 The Constant-Elasticity-of-Substitution–Translog Cost Function 157
13.3 Factor-Share Functions and Elasticities 157
13.4 Empirical Remarks 158
13.5 Summary 160
Appendix 160

14 The Leontief Production Function 164
14.1 Input–Output Table 165
14.2 The Output Frontier and the Factor–Price Frontier 168
14.3 The Leontief Production Function 171
14.4 The Leontief Cost Function 173
14.5 Empirical Remarks 174
14.6 Summary 174

15 The Generalized Leontief Production Function 176
15.1 Differences between the Leontief Production Function and the Diewert Production Function 177
15.2 Factor-Share Functions and Elasticities 179
15.3 The Constant-Elasticity-of-Substitution–Generalized Leontief Production Function 179
15.4 Empirical Remarks 180
15.5 Summary 182
Contents ix

Appendices
Appendix A Monotonicity 185
Appendix B Concavity and Convexity 185
Appendix C Homogeneity and Homotheticity 187
Appendix D Additivity and Separability 188
Appendix E Four Classical Properties of Consumer Demand 189
Appendix F The Slutsky Equation: Derivation and Implications 192
Appendix G Duality between Direct Utility Function and Indirect Utility Function 197
Appendix H Roy's Identity 199
Appendix I The Shephard–Samuelson Theorem 200
Appendix J Shephard's Duality 201
Appendix K Shephard's Lemma 202
Appendix L Allen–Uzawa Partial Elasticity of Substitution 203

Epilogue 206

References 207

Index 219
List of Figures

1.1 Concave utility function and indifference curve
1.2 Income elasticity
1.3 Engel curves
8.1 Constant returns to scale
8.2 Capital–labor ratios and wage–rental ratios
8.3 Factor intensity (1)
8.4 Factor intensity (2)
8.5 Factor–price ratios and factor intensities
8.6 Relationship between commodity–price ratio and factor–price ratio
9.1 Factor intensity
14.1 Output frontier
14.2 Factor–price frontier
14.3 Leontief isoquant
15.1 Generalized Leontief isoquant
