1. Unemployment amidst economic buoyancy: The Italian puzzle	
Introduction	1
Changing patterns of production and employment	2
The boom years: 1954-68	2
Conflict and the quiet search for flexibility: 1969-79	8
The open quest for flexibility: 1980-93	11
Labour market trends	21
The historical inheritance	21
Developments in labour force participation, employment and unemployment: 1961-91	23
Regional dualism: The north-south yawning gap	28
Concluding remarks	33
2. The fragmented pattern of unemployment	
Introduction	37
Unemployment and the baby boom	37
Youth unemployment	40
Older workers: Full employment or disguised unemployment?	44
From long-term to very long-term unemployment	47
Feminization of employment and unemployment	49
Education and employment prospects	52
Regional dualism	54
Concluding remarks	57
3. Wages in the flexibility equation	
Introduction	61
Wage setting	61
Indexation	63
Wage drift	65
Wages and labour productivity	69
Wage flexibility models on Italy	71

Wage differentials	73
Intrasectoral differences	73
Sectoral aspects	76
The private-public gap	79
Gender wage differences	82
Concluding remarks	86
4. Flexibility of non-wage labour market elements	
Introduction	91
Enterprises' quest for flexibility	91
Numerical workforce adjustments	91
The spread of atypical work	96
Dividing non-wage labour costs	99
Workforce adaptability	102
Geographical mobility	102
Changing employment status	105
Human resource development: Education and training	106
Placement services and practices	112
Public sector bottlenecks	117
Public debt	117
Public sector efficiency	122
Privatization	123
Concluding remarks	126
5. Flexible employment configurations	
Introduction	131
Self-employment	131
Industrial districts	135
Cooperatives	139
Underground employment	143
Foreign immigration	149
Concluding remarks	152
6. Public policy against unemployment	
Introduction: Government's uneasy labour market engagement	155
Planning difficulties	156
Incomes policy	158
Arduous tripartite bargaining and the Finance Law	158
The social and welfare system	161
The ambiguous role of social and welfare policy	161
Pensions	164
Unemployment benefits	167
The CIG	168
The dualism of the system	173
Focused involvement	173

Youth-centred schemes	174
Intervention in the south	180
Working time and employment duration schemes	184
Evaluating the impact of labour policies	185
Concluding remarks	186
7. Conclusion	
Unemployment in the early 1990s	191
Employment and unemployment in the next decade	191
Diagnosing Italian unemployment	195
Demographic and participatory developments	195
The adequacy of economic growth	195
Eurosclerosis	197
Promising areas of flexibility	197
Self-employment	197
Industrial districts	198
Cooperatives	198
Submerged work?	198
The developing dialogue between the social partners	199
A dark background	199
Shortcomings of the public apparatus	199
Hesitant and stammering employment policies	200
The pressing challenges of the 1990s: Setting priorities	202
Reforming the public apparatus	203
Cutting the public debt	203
Developing the State's credibility	204
Creating social consensus	205
Checking inflationary boosts	206
Enriching employer-worker exchanges	206
Narrowing the north-south gap	207
Italian employment policy reconsidered	210
Active labour placement	210
Human resource development	210
Revising the concept of working life	211
The proposal for a guaranteed basic income	211
Concluding remarks	212

Figures
