1. Introduction
   - *Everyone Forecasts*
   - *Objectives of this Book*
   - *Sales Forecasting*
   - *The Sales Forecasting Process*
   - *Categories of Forecasting Models*
   - *Selecting the Appropriate Forecasting Model*
   - *Market Analysis Techniques*
   - *Summary*

2. Measuring Accuracy of Models
   - *Some Key Concepts*
   - *Methods for Aggregating Errors*
   - *Using Aggregate Error Measures*
   - *Summary*

3. Acquisition of Secondary and Primary Data
   - *Primary versus Secondary Data*
   - *Secondary Data*
   - *Major Sources of External Data*
   - *Primary Data*
Survey Methods 46
Observation Method 50
Experiments 50
Sampling 51
Summary 53

4. Time Series Models 55
Patterns and Trends in the Data 55
Naive Method 63
Moving Average Models 64
Exponential Smoothing 71
Least Squares Model 77

5. Decomposition 81
Components of the Model 81
The Decomposition Model 82
Determining the Seasonal (S) Value 83
Determining the Trend (T) 91
Determining the Cyclical Values 92
Handling the Irregular (I) Value 96
Developing the Forecast 96

Classification of Exponential Smoothing Models 99
Holt's Two-Parameter Double Exponential Smoothing 100
Winter's Three-Parameter Triple Exponential Smoothing 102
Brown's One-Parameter Triple Exponential Smoothing 109
Summary 114

7. Causal Models—Simple Regression 115
Causal versus Association 115
Correlation Analysis 124
Overview of Simple Linear Regression 131

8. Causal Models—Multiple Regression 133
Selection of Independent Variables 133
The Multiple Regression Model 135
Adjustments to the Regression Model 147
Overview of Multiple Regression 152

9. Box-Jenkins Approach 155
Autocorrelation and Differencing 155
Using Box-Jenkins 159
Overview of Box-Jenkins Method 168

10. Judgmental Techniques 169
Introduction 169
Sales Force Composite 170
Jury of Executive Opinion 171
Surveys of the Marketplace 172
Delphi Method 174
Use of Analogs (Surrogates) 175
Assigning Probabilities 179
Using Probabilities 182
Summary 184

11. Additional Judgmental Techniques 187
Technological Forecasting 187
Forecasting Changes in the Business Environment 190
Overview—Judgmental versus Quantitative Forecasting 195
Caveats About Judgmental Forecasts 196
Summary 199

12. Monitoring and the Forecasting Process 201
Monitoring Forecasts 201
Overview of the Forecasting Process 207
Getting the Forecast Used 214
Summary 217

Market Potentials 219
Techniques for Determining Market Potentials 224
Sales Potential 234
Opportunity Indices 235
Market Share 238
Using Data Bases 238
Summary 240

14. Market Segmentation 243
Start with a Viable Market 243
Steps in Segmentation 244
Summary 255
15. Analyzing Markets—Five Emerging Techniques

Discriminant Analysis

Role of Equations

Conjoint Analysis

Steps in Developing and Using Conjoint Analysis

Factor Analysis

Cluster Analysis

Multidimensional Scaling

Summary

Selected Readings

Index
# Tables and Figures

</tbody>
</table>
5.3 Steps in Computing Seasonal Ratios for Beer Sales 88
5.4 Trend and Cyclical Values for Beer Sales 93
6.1 Wrench Sales Forecasts Using Holt’s Method 101
6.2 Quarterly Beer Sales 104
6.3 Four Period Ahead Forecast of Quarterly Beer Sales Using Winter’s Three-Parameter Method 106
6.4 Ratchet Wrench Sales Forecast Using Brown’s Quadratic Method 111
6.5 Brown’s One-Parameter Method 113
7.1 Thirteen Periods of Fixture Sales and New Housing Starts 117
7.2 TSP Printout of Simple Regression Results 121
7.3 Actual Sales and Forecasts for Bathroom Fixtures 123
8.1 Eight Years of Quarterly Data for Diet Drink Sales and Five Possible Independent Variables 138
8.2 Correlation Matrix for Diet Drink Sales and Five Other Variables 139
8.3 Information Provided by Software Using Stepwise Regression 140
8.4 Additional Information Provided by Stepwise Regression Program 143
8.5 Final Values of Five Independent Variables in Diet Drink Example 144
8.6 Using Lead-Lag Variable to Improve Regression Model 148
9.1 Developing Variables for Autocorrelation Analysis of Shower Heads 156
9.2 First and Second Differences of Shower Head Data 159
9.3 Weekly Sales of Happy Choice Dog Food 162
9.4 Output From MA(1) and MA(2) Models with Differenced Dog Food Sales 167
10.1 Estimated Sales in Thousands of Units for Each Probability Range 180
10.2 Probability of Achieving Different Sales Levels of Cellular Phones Next Year 181
10.3 Expected Value to SPIRIO under Different Weather Conditions 184
12.1 Acme Sales in Units 204
12.2 Cumulative Unit Sales of Sewing Machines for Tight Knit Company 205
12.3 Sales of Audio Heaven’s Stereo Units for February and June over Eight-Year Period 206
13.1 Five-State Market Potential for Dry Beer 228
13.2 Market Potential for Safety Glasses in Three Industries 232
13.3 Using Survey Results to Determine Market Potential for a Specialized Machine Tool 233
Tables and Figures

13.4 Market Opportunity Index for Solar Sales in Five Colorado Standard Metropolitan Statistical Areas 236
13.5 Market Performance Matrix 237
14.1 Matrix for Evaluating Various Bases for Segmenting Market for Test Kits for Water 253
15.1 Attitudes of Automobile Drivers toward Car Pooling 260
15.2 Data on 15 Households 261
15.3 Classification of Holdout Group Members 262
15.4 Levels of Attributes for Interior Paint 265
15.5 Two Responses to a Trade-Off Matrix 267
15.6 Two Respondents’ Rankings of Sixteen Offerings of Interior Paint 268
15.7 Part-Worth Coefficients for Two Rankings of Sixteen Offerings 269
15.8 Results from Factor Analysis Applied to Six Statements 272
15.9 \( D \) Values for Ten Respondents from Figure 15.2 276
15.10 One Respondent’s Comparison of TV Sets in Terms of Quality 278

FIGURES

1.1 The Sales Forecasting Process 6
1.2 Relationship Between Potentials, Forecasts, and Marketing Effort 12
3.1 Categories of Data 30
3.2 Secondary Sources of Business Information 31
3.3 Components of an Information System 33
3.4 Steps in Developing Questionnaires 49
4.1 Examples of Four Trend Lines 57
4.2 Example of Linear Trend in Plotted Data 58
4.3 Example of Nonlinear Data 58
4.4 Using the Semiaverage Method to Develop a Linear Trend 59
4.5 Patterns of Regular and Geometric Growth in Sales 61
4.6 Using Two Trend Lines to Depict Turning Point in Past Sales 62
4.7 Compensating for an Isolated Change in Sales 63
4.8 Relationship between Sales Values, Simple Moving Averages, and Double Moving Averages 69
4.9 Plotted Wrench Sales 79
5.1 Plotted Sales of Beer Industry 83
5.2 Seasonal Ratios for Fourth Quarters (1984–1989) 91
5.3 Cyclic Ratio of Beer Sales for 26 Periods 95
6.1 Wrench Sales 102
6.2 Wrench Sales and Forecasted Wrench Sales 103
6.3 Quarterly Beer Sales and Forecast
6.4 Example of a Nonlinear Trend
6.5 Ratchet Wrench Sales and Forecast Using Brown’s Quadratic Method
7.1 Profile of Fixture Sales and New Housing Starts
7.2 Regression Line Depicting Fixture Sales and New Housing Starts
7.3 Normal Distribution of Y Values Around X Values
7.4 Total, Explained, and Unexplained Deviations from Y
7.5 Possible Patterns of Residuals
9.1 Autocorrelation Coefficients for Shower Head Sales
9.2 Autocorrelations of Nonstationary Sales Data
9.3 Autocorrelations of Dog Food Sales
9.4 Theoretical Profiles of Three Categories of Models
10.1 Judgmental Forecasting Techniques
10.2 Example of Two Rounds of Delphi Process
10.3 Payoffs to SPIRO from Three Bid Possibilities
11.1 Nature of Interrelationship between Four Events
11.2 Degree of Impact
11.3 Probability of Event Occurrence
12.1 Steps of Forecasting Process
14.1 Bases for Segmenting Markets
15.1 Two Combinations of Interior Paint Choices
15.2 Cluster of Ten Respondents in Two Dimensions
15.3 Multidimensional Map of Respondent’s Comparisons of Seven TV Sets
