Contents

I  Metal Behavior in the Environment

1. Agricultural Problems Related to Excessive Trace Metal Contents of Soils
   A. Kabata-Pendias ................................................................. 3

2. Speciation of Heavy Metals in Soils and Groundwater and Implications for Their Natural and Provoked Mobility
   A. C. M. Bourg ........................................................................ 19

3. Diffuse Sources of Pollution by Toxic Metals and Impact on Receiving Waters
   V. Novotny .............................................................................. 33

4. Monitoring of Air Pollutants Effects, Some Principles and Examples
   E. Reichrtova ........................................................................... 53

5. Quality of Information Contamination of the Environment
   W. P. Cofino ........................................................................... 65

6. Soil Protection in The Netherlands
   J. J. Vegter ............................................................................... 79

7. Mathematical Modeling for Assessment of Soil Pollution
   J. G. C. Smits and N. M. de Rooij ........................................... 101

II  Engineering Approaches to Remediation

8. Impact of Mining Activities on the Terrestrial and Aquatic Environment with Emphasis on Mitigation and Remedial Measures
   R. J. Allan .............................................................................. 119

9. Decontamination or Consolidation of Metal-Contaminated Soils by Biological Means
   W. H. O. Ernst ......................................................................... 141
III Specific Examples of Metal Polluted Areas

15. Engineering Aspects of Pollution in View of Case Studies Carried Out in Poland
   A. Lewandowski, and J. Prewłócki ........................................... 259

16. Environmental Impact of the Mining Industry in Poland
   E. H. Rybicka ........................................................................ 271

17. The Problems of Heavily Polluted Soils in the Czech Republic: A Case Study
   J. Kozák, J. Janku, and J. Jehlicka ....................................... 287

18. Heavy Metals in the Danube River in Yugoslavia
   P. Marjanovic, M. Miloradov, and Z. Cukic ............................ 301

19. Problems of Heavy Metal Pollution in Hungary
   E. Molnár, T. Németh, and O. Pálmai ................................... 323

20. Heavy Metal Pollution in Kosovo
   L. Shllaku and L. Landner .................................................. 345

21. Heavy Metal Pollution in Romania
   C. Rauta, R. Lacatusu, and S. Carstea ................................ 359

22. Exposure of the Population of Novi Sad and the Surrounding Areas to Lead
   N. Roncevic, J. Siriški, D. Darmati, M. Dordevic, et al. ........ 373
23. Some Aspects on Metal Pollution in Eastern/Central Europe: Former Eastern Germany
   R. Reuther .............................................................................. 377

24. Some Remarks on the Contamination of the Environment with Heavy Metals in a Part of Poland
   J. Suschka and U. Zielonka .................................................. 393

Subject Index ........................................................................... 403
