

TABLE OF CONTENTS

Chapter 1

INTRODUCTION

1.1	Structure of the volume	12
1.2	A note on terminology	12

Chapter 2

METHODOLOGY

2.1	The definition of income	13
2.2	Unit and population definition	16
2.3	Adjustment for household size	18
2.4	Presentation of results and measures of inequality	21

Chapter 3

DATA QUALITY AND CONSISTENCY

3.1	The LIS database	25
3.2	Comparability of LIS datasets	28
3.3	Definition of income	30
3.4	Cash and non-cash benefits	32
3.5	Taxes	33
3.6	Comparison of reported income data with external aggregates	34
3.7	Procedures adopted in use of LIS data in this study	37
3.8	Conclusion	38

Chapter 4

BASIC RESULTS

4.1	Distribution of income in seventeen OECD countries	39
4.2	Trends over time	47
4.3	Sensitivity of estimates to methods employed	52
4.4	Conclusion	58

Chapter 5

COMPARISONS WITH NATIONAL STUDIES

5.1	Earlier studies of OECD countries	59
5.2	Evidence from national studies	61
5.3	Conclusions from national studies	80

Chapter 6

ANALYSIS OF COUNTRY DIFFERENCES: PRIMARY AND MARKET INCOMES

6.1	Level and trend in primary income distribution	83
6.2	Level and trend in market income	88
6.3	Relative income shares of primary and market incomes	91
6.4	Changing shares of income : husbands, wives, self-employment and property income	93
6.5	Conclusion	98

Chapter 7

TAXES AND TRANSFERS

7.1	The distribution of equivalent income levels	103
7.2	The distribution of taxes on income and social contributions	105
7.3	The distribution of transfers	106
7.4	The role of transfers	109

Chapter 8

FUTURE RESEARCH PRIORITIES AND NEXT STEPS

References	117
------------------	-----

Appendices

1.	LIS staff	123
2.	Unit and head definitional details	124
3.	Measures of inequality	135
4.	Data type, quality and consistency	137
5.	Correspondence of micro-income data measures with SNA categories	141
6.	Quality of income data	142
7.	Background tables on income sources and demographic characteristics	155

LIST OF TABLES

Chapter 2

2.1	Definition of income	14
2.2	Family size exponents in different equivalence scales	19

Chapter 3

3.1a	OECD countries and LIS: country and year of data entry	26
3.1b	Survey name and sponsor/administrator	27
3.2a	Standardised unemployment rates 1979-90	28
3.2b	Rates of growth of real GDP 1979-90	28
3.2c	Rates of increase in consumer prices 1979-90	29
3.3	Types of survey data	29
3.4	Correspondence between United Nations <i>Guidelines</i> and LIS microdata-based concepts of income	31
3.5	Expenditures for health, education and social welfare among the non-aged as a percentage of GDP in OECD countries in 1987	32
3.6	Employees' social security contributions and personal income tax (including standard tax reliefs) at the income level of an average production worker in 1987 as a percentage of gross earnings	33
3.7	Quality of income data: ratio of survey estimates to adjusted national accounts estimates (in per cent)	34

Chapter 4

4.1	Summary of income distribution in OECD countries: percentiles of median	40
4.2	Summary of income distribution in OECD countries: cumulative proportions below percentiles of median	42
4.3	Summary of income distribution in OECD countries: cumulative decile shares	44
4.4	Measures of inequality in OECD countries	46
4.5	Trend over time in income distribution in OECD countries 1979-88: percentiles of median	47
4.6	Trend over time in income distribution in OECD countries: cumulative proportions below percentiles of median	48
4.7	Trend over time in income distribution in OECD countries: cumulative decile shares	49
4.8	Trend over time in income distribution in OECD countries: summary measures of inequality	49
4.9	Sensitivity of results to changes in equivalence scale: percentiles of median	50
4.10	Sensitivity of results to changes in equivalence scale: cumulative decile shares	53
4.11	Sensitivity of results to changes in weighting (persons versus households): percentiles of median	55
4.12	Sensitivity of results to changes in weighting (persons versus households): cumulative decile shares	57

Chapter 5

5.1	International comparison by Sawyer (1976)	60
5.2	International comparison by van Ginneken and Park (1984) of household distribution of income per head	61
5.3	National studies for a selection of OECD countries	62
5.4	Income distribution in Australia 1981/82-1989/90	63
5.5	Earnings distribution in Austria 1970-87	63
5.6	Income distribution in Belgium 1985-92	64
5.7	Income distribution in Canada 1971-83	64
5.8	Income distribution in Finland 1966-85	65
5.9	Income distribution in France 1970-79	66
5.10	Measures of inequality in France 1970-84	66
5.11	Gini coefficient of inequality in Germany 1950-85	67
5.12	Income distribution in Germany 1973-90	67
5.13	Income distribution in Ireland 1973-87	68
5.14	Income distribution in Italy 1967-89	69
5.15	Income distribution in Italy 1977-91	69
5.16	Income distribution in Japan 1980-91	70
5.17	Income distribution in the Netherlands 1981-89	71
5.18	Income distribution in Norway 1982-90: estimates by Central Statistical Bureau	71
5.19	Income distribution in Norway 1970-86: estimates by Ringen (1991)	72

5.20	Income distribution in Portugal	73
5.21	Income distribution in Spain	73
5.22	Income distribution in Sweden 1975-90	74
5.23	Income distribution in the United Kingdom 1977-90	75
5.24	Income distribution in the United Kingdom 1979-1988/89	76
5.25	Income distribution in the United Kingdom 1968/69-1984/85	76
5.26	Income distribution in the United States 1967-91: income shares	77
5.27	Income distribution in the United States adjusted for household size and for taxes/benefits 1973-90	78
5.28	Income distribution in the United States: average income as a percentage of poverty threshold	79
5.29	Income distribution in the United States: relative incomes	79
5.30	Income distribution in the United States: estimates based on population census	79

Chapter 6

6.1	Percentage population shares for subtotal analyses of primary and market income, total households, and prime age households	82
6.2	Summary of level and trend in primary income distribution for households with heads aged 25 to 54	84
6.3	Summary measures of level and trend in primary income distribution for prime age households with heads aged 25 to 54	85
6.4	Summary of level and trend in primary income distribution for all households	86
6.5	Summary measures of level and trend in primary income distribution for all households	87
6.6	Summary of primary income distribution for all households: cumulative decile shares	87
6.7	Summary of level and trend in market income distribution for all households	90
6.8	Summary measures of level and trend in market income distribution for all households	90
6.9	Summary of market income distribution for all households: cumulative decile shares	91

Chapter 7

7.1	Percentage distribution of low and modest, middle and high income groups by age	104
7.2	Percent low income by age group	104
7.3	Distribution of taxes by quintile and average tax as a percent of median equivalent income	105
7.4	Average taxes as a percent of median equivalent income by quintile	106
7.5	Distribution of transfers by quintile and average transfers as a percent of median equivalent income	107
7.6	Average transfers as a percent of median equivalent income by quintile	107
7.7	Average transfers as a percent of median equivalent income	109

Appendices

A2.1	Household definition	124
A4.1	Primary objective of the survey	138
A4.2	Sampling frame	138
A4.3	Response rates and LIS sample sizes	139
A4.4	Data transformations	139
A4.5	Descriptives of LIS second wave datasets with negative disposable income (DPI)	140
A5.1	Correspondence of micro-income data measures with SNA categories	141
A6.1	Comparison of Australian income survey with National Accounts aggregates, 1981/82	143
A6.2	Comparison of Australian income survey with National Accounts aggregates, 1985/86	144
A6.3	Comparison with Department of Social Security expenditure aggregates	144
A6.4	Comparison of distribution of net taxable income in Belgium: tax statistics versus estimates on the basis of CSP-survey data	145
A6.5	Comparison of SCF estimates in Canada to adjusted personal income in National Accounts 1987	146
A6.6	Comparison of survey estimates to National Accounts in Finland 1987	147
A6.7	Comparison of French survey estimates to National Accounts control totals 1984	148
A6.8	Comparison of German survey estimates to National Accounts control totals 1983	149
A6.9	Distribution of tax units over ranges of "total income" in Ireland	150
A6.10	Expenditure on social welfare schemes in Ireland	150
A6.11	Comparison of Bank of Italy survey estimates to National Accounts control totals 1989	151
A6.12	Comparison of FES estimates to National Accounts control totals in the United Kingdom 1977	152

A6.13	Comparison of March Current Population Survey estimates of aggregate income with independent estimates 1987	153
A6.14	Non-response rates by category of income in March Current Population Survey (CPS)	154
A7.1	Percentage of income sources of gross income by decile	156
A7.2	Percentage of income sources of gross income by income level	159
A7.3	Age and earning status distribution for total sample and persons with low and modest incomes	161
A7.4	Family type distribution for total sample and persons with low and modest incomes	163

LIST OF FIGURES

<i>Chapter 2</i>		
2.1	Lorenz curves	22
<i>Chapter 4</i>		
4.1	United States and Sweden deciles	41
4.2	Percentage relative to 80% and 120% median	43
4.3	Lorenz comparisons (based on decile points)	44
4.4	Relative inequality in different countries	45
<i>Chapter 6</i>		
6.1	Lorenz comparisons of primary income for all households	88
6.2	Relative inequality rankings based on primary income in different countries	89
6.3	Lorenz comparisons of market income for all households	92
6.4	Relative inequality rankings based on market income in different countries	93
6.5	Aggregate shares of primary income in the mid-1980s for households with heads aged 25 to 54	94
6.6	Aggregate shares of primary income for all households	95
6.7	Aggregate shares of market income for all households	97
6.8	Shares of primary income in the mid-1980s for households with heads aged 25 to 54: husbands, wives, other earnings and self-employment income	99
6.9	Shares of primary income in the mid-1980s for all households: husbands, wives, other earnings and self-employment income	100
6.10	Shares of market income in the mid-1980s for all households: wages, self-employment income and other private income	101
<i>Chapter 7</i>		
7.1	Low-income rate of the non-elderly by transfers as a percentage of median equivalent income	108
7.2	Low-income rate of the elderly by transfers as a percentage of median equivalent income	110
