Contents

Part 1: Introduction

1. The Need for a Research Methodology for Field Studies ................................................................. 13
Two Weaknesses in Contemporary Literature on Methodology .......................................................... 13
The Need for Another Type of Methodological Literature .............................................................. 16
Research as a Learning Process ............................................................................................................. 18
A Methodology for Intensive Field Studies ......................................................................................... 21
The Intensive Field Study ..................................................................................................................... 22
The Basis and Genesis of the Book ....................................................................................................... 23
The Empirical Field of the Book ........................................................................................................... 25

Part 2: Four Research Tales

2. From an Initial Evaluation of Treatment Centres to an Ultimate Evaluation of the Life Paths of Drug Addicts – A Research Odyssey ......................................................... 29
by Ib Andersen
My Background and the First Steps .................................................................................................. 29
Interest and Occasion – A Bargain is a Bargain .............................................................................. 30
What Did We Actually Want to Study and How? ............................................................................ 33
The Project Team ................................................................................................................................. 33
What Do We Use to Replace the Input-Output Design? .................................................................. 34
Setting the Limits of the Empirical Field ........................................................................................... 39
The Population of the Study ................................................................................................................ 39
The Turning Points of Life: A Turning Point ..................................................................................... 40
Travelling into the Universe of Drug Addicts ..................................................................................... 41
Analysing the Paths of Life ................................................................................................................ 43
The Long, Lonesome Trail .................................................................................................................. 45
Strategies for Research in Deviant Behaviour ................................................................................... 51
Results of the Study ............................................................................................................................ 52
Budget and Resources ........................................................................................................................ 53
Publications and Other Means for Releasing the Results of the Study ............................................ 53
3. The Unprepared Journey into the Hospital World

by Finn Borum

In Search of Lost Times ......................................................... 57
The First Design ................................................................. 60
Meeting the Field ............................................................... 61
Have Experience – Data Wanted ............................................. 63
Generating Data ................................................................. 66
Distilling Data ................................................................. 67
Have Data – Problem Formulation Wanted ................................ 69
Feedback to the Field .......................................................... 72
Expulsion from the Field ....................................................... 73
Returning to the Field ......................................................... 74
From Analysis to Action (with a Little Help from My Friends) .... 75

4. The Long and Tortuous Journey of the Ph.D. Candidate:
From Theorizing on Industrial Policy to Innovation

Practices at the Company Level ............................................... 79

by Peter Karning

Introduction ................................................................. 79
Master's Thesis and Choice of Career .................................... 79
Research Assistant .......................................................... 81
The Paradigm of the Dynamic Specialization Project (DYS) Study .... 82
Formulating a Ph.D. Project ................................................... 85
Preparing Interviews

– Tracking an Empirical Anomaly in the Observations .............. 86
Words the Redeemer – The Importance of Milieu ..................... 90
Visiting the Field for the First Time: The First Interviews .......... 90
Outlining the Framework of My Ph.D. Dissertation .................. 91
Chains of the Past and Lack of a Specific Problem Formulation .... 92

Some Decisive Interviews

– on the Track of a Common Thread That Was Not Picked Up ...... 93
1988: A Work Process Governed by Occasions as the
Project Grows Historically and Comparatively ....................... 96
The Project at the Beginning of 1989:
More Comprehensive Than in 1988 but Not Yet a Final Focus ...... 100
Towards a Productive Connection Between
Empirical Data and Theory ................................................... 103
The Final Phase .................................................................. 105
It Was Completed But Not Quite ............................................ 111
5. Production Life in Denmark:
Discoveries Meet the Prepared Mind ........................................ 113
by Peer Hull Kristensen

Part 3: Elements For A Research Practice

6. Research Environment and Research Practice:
An Analysis of an Art and Its Social Context .......................... 141
What is the Message of these Tales? .................................... 141
Thorough Theoretical Preparation .................. 142
To See the World as It Is .............................................. 144
Access to the Field ..................................................... 145
The Dialectics of Research Projects .............. 146
The Researcher's Challenge .............................. 149

7. The Researcher, the Project and the Academic Field ............ 151
Formulating the Issue and the Research Programme ......... 151
Be Precise When Formulating Issue, ................. 152
Theory and Expectations of Empirical Data ......... 152
The Academic Discussion Machine ................. 153
On Supervisors and Supervision .................. 155
The Academic Field ................................................... 158
Formulation – Reformulation .......................... 160

8. The Researcher and the Project ......................... 163
Between Two Poles ....................................................... 163
The Sociological Imagination ......................... 164
The Problems of the Social Field and the Themes of Public Debate ....................................... 165
Bridging Theory and Field ........................................... 167
9. The Researcher and the Field: In »Das Ding an Sich« ...... 171
Is Reality Comprehensible? ............................................. 171
Durkheim's Methodology ................................................. 172
Humility and Empathy ...................................................... 172
The Altered Relationship Between Researcher and Social Field .... 173
The Principle of Complementarity Extended to the Social Field .... 173
The Methodology of Phenomenologists .............................. 175
Implications for the Relationship between Theory and Field .... 175
Implications for the Field ................................................. 176
The Dynamics of the Field ................................................. 177
In the Field .................................................................. 178
Fear and the First Encounter with the Field ......................... 182
Three Important Dimensions of Fieldwork .......................... 183
The Interview as a Dialogue .............................................. 185
Hunt's Methodology ......................................................... 186
The Mutual Project of the Researcher and the Native ............. 187
The Interview Guide ......................................................... 188
The Importance of Life Stories ......................................... 190
Revealing the Language Code .......................................... 191
Field Studies Require Many Interviews .............................. 191
Mapping Out Gravitational Fields for Social Interaction ........ 192
Watch Out for the Satellites! .............................................. 192
The Synthesis of Empathy ................................................. 193

10. The Researcher in Her Den .......................................... 195
Change of Scene: Returning from the Field to the Institute ...... 195
The Secret of the Craft: To Create a Puzzle ......................... 196
Creating Patterns ........................................................... 198
Exploring Data ............................................................... 201
Theoretical Contemplation ................................................. 205
Filling in the Pattern ......................................................... 208
On Writing .................................................................. 210
On Planning Your Activities .......................................... 219
On the Importance of Discussing with Others ..................... 224
The Result .................................................................. 225
Part 4: Conclusion

11. An Ideal Type of Field Research .............................................. 231
Field Research Depends on the Individual .................................... 232
Field Research is a Continuous Learning Process ........................... 233

References ................................................................................. 237

Index ......................................................................................... 245
