

SECTION I FUNDAMENTALS OF MANUFACTURING

1 An Approach to Manufacturing Processes 3

Classification of Production

Tasks	3	
Material Removal	3	
Material Addition	3	
Change of Form	4	
Change of Condition	4	4
Material Joining	4	
Finishing	4	
Tool or Process Selection	4	
Example of Process Selection		5
A Warning About Lists	6	
Summary	7	

2 Properties of Materials 9

Structure of Matter	9	
Solid State	10	
Liquid State	10	
Nucleation of Grains	11	
Crystal Structure	13	
Strength Properties	15	
Stress	15	
Strain	16	
Yield Strength	16	

ACTURING 1

Modulus of Elasticity	18
Safety Factor	19
Compression	19
Shear	20
Torsion	21
Flexure	21
Surface Properties	23
Hardness	23
Other Hardness Tests	28
Time-Dependent Properties	29
Impact	29
Creep	33
Fatigue	34
Summary	35

3 Measurements in Manufacturing 37

Definitions of Terms Used in Measurements	38
Dimensional Analysis	39
Use of Formulas	41
Metric System	42
Length Units	42
Volume Units	42
Force Units	43

Limits of Accuracy	45	
Statistics of Measurement	46	
Measures of Central Tendency		46
Measures of Dispersion	47	
Production Tests	48	
Summary	50	

SECTION II

MATERIAL REMOVAL 55

4 Mechanical Methods of Material Removal 57

Fundamental Concepts of Material Removal	57	
Methods of Material Removal	60	
Handwork	60	
Powered Mechanical Methods of Material Removal	61	
Turning	61	
Milling	65	
Shaping and Planing	66	
Routing	66	
Broaching	67	
Drilling and Boring	67	
Reaming and Honing	70	
Sawing	70	
Shearing and Punching	76	
Grinding	76	
Sanding	80	
Polishing	81	
Cutting Tool Shaping	81	
Feeds and Speeds	84	
Feed and Depth of Cut	86	
Coolants for Cutting Tools	86	
Power Requirements for Machining	87	
Summary	90	
Photo Essay 4-1 Setting Up the Lathe for Manual Control	91	
Photo Essay 4-2 Drilling	94	
Photo Essay 4-3 Milling	97	
Photo Essay 4-4 Grinding	99	

Photo Essay 3–1 Reading the Micrometer	51
Photo Essay 3–2 Using the Dial Micrometer	52
Photo Essay 3–3 Using the Vernier Calliper	54

5 Electrical Methods of Material Removal 101

Electrical Discharge Machining	101
General Operating Principles of EDM	102
Ram EDM Machines	104
Wire EDM Machines	105
Electric Discharge Grinding	108
Electrochemical Grinding	108
Disadvantages	108
Summary	109

6 Chemical Methods of Material Removal 111

Chemical Machining	111
Electrochemical Machining	113
Summary	115

7 Thermal and Other Methods of Material Removal 117

Hot Wire Cutting	117
Oxy-Fuel Gas Cutting	117
Laser Cutting	120
Other Methods of Material Removal	121
Water Saw	121
Wire Saw	121
Electron-Beam Machining	122
Ultrasonic Machining	124
Summary	124
Photo Essay 7–1 Oxy-Fuel Gas Cutting	125

SECTION III MATERIAL ADDITION

127

8 Material Addition 129

Electroplating	129
Brush Plating	131
Electroforming	131
Chemical Plating	132
Dipping	133
Hardfacing	134
Metallizing	135
Bonding Problems	135

SECTION IV CHANGE OF FORM 143

9 Thermal Methods of Change of Form 145

Casting	145
Sand casting	145
Investment Casting Processes	151
Permanent Mold Casting Processes	155
Centrifugal Casting	161
Slush Casting	162
Continuous-Pour Casting	163
Selection of Casting Processes	163
Selection Based on Shape	164
Selection Based on Weight Limits	164
Selection Based on the Material to Be Cast	165
Summary	166

10 Powder Methods of Change of Form 167

Introduction to Powder Metallurgy	167
Powder Metallurgy	167

Metallizing Processes	136
Vapor-Deposited Coatings	138
Vacuum Coating	138
Sputtering	140
Similarities and Differences in Coating Methods	140
Uses	141
Materials	141
Summary	142

Preparation and Blending of the Powder	167
Compaction	168
Sintering	171
Applications	171
Summary	173

11 Mechanical and Other Methods of Change of Form 175

Forming	175
Forging	175
Lubricants for Forging	181
Hydroforming	181
Extrusion	182
Rolling	184
Bending	192
Drawing	198
Spin Forming	198
High-Energy-Rate Methods	200
Explosion Forming	200
Magneforming	201
Summary	203

SECTION V CHANGE OF CONDITION

12 Change of Condition	207
Mechanical Techniques	207
Cold Working	208
Thermal Processes	208
Theory	208
Time-Temperature-Transformation Curve	214
Methods of Softening Steels	215
Methods of Hardening	217
Chemical Processes	218
Case Hardening	218
Tempering of Steels	220

SECTION VI MATERIAL JOINING **229**

13 Adhesives	233
Permanent Adhesives	233
Temporary Adhesives	233
Soldering and Brazing	233
Selection of Adhesives	234
Summary	236
Photo Essay 13-1 Gluing	237
14 Welding	239
Joint Preparation	240
Forge Welding	240
Gas Welding	241
Oxygen-Acetylene Welding	241
Oxygen-Hydrogen Welding	243
Plasma Welding	244
Electrical Welding	244
Resistance Welds	244
Arc Welds	246
Other Welding Techniques	257
Electron Beam Welding	257

Spheroidizing	220	
Martempering and Austempering		220
Patenting	223	
Jominy Test	223	
Selection of Heat Treatments		225
Nomenclature of Steels	225	
Heat Treatment of Nonferrous Materials	226	
Annealing	226	
Precipitation Hardening		227
Solution Heat Treating		227
Summary	228	

Laser Welding	258	
Friction Welding	258	
Thermite Welding	258	
Chemical Welding	259	
Annealing	259	
Specifying a Weld	259	
Weld Tests	260	
Visual Tests	260	
Subsurface Tests	262	
Mechanical Tests	262	
Weld Applications	264	
Welding Safety	264	
Summary	267	
Photo Essay 14-1 Igniting the Oxygen- Acetylene Torch	268	

15 Mechanical Methods of Joining 273

Fasteners	273	
Needs of the Application		273
Threaded Fasteners	274	

Specifying a Thread	276
Nonthreaded Fasteners	278
Fasteners for Shafts	279
Crimping	281

■ SECTION VII FINISHING 287

16 Mechanical Surface Finishing Processes 289

Deburring	290
Stripping/Cleaning	292
Smoothing Operations	294
Honing	294
Superfinishing	296
Lapping	296
Polishing	297
Buffing	298
Burnishing	298
Ballizing	298
Bearizing	298
Finish Specification	299
Summary	304

■ SECTION VIII MANUFACTURING WITH PL

18 Manufacturing with Plastics 317

Types of Plastics	317
Thermoplastics	317
Thermosets	318
Elastomers	318
Differences in Polymers	318
Other Types of Polymers	319
Manufacturing with Plastics	320
Resin Transfer Molding	320
Injection Molding	320

Make As One Piece	281
Summary	283
Photo Essay 15-1 Pop Riveting	284

17 Surface Treatment Processes and Coatings 305

Conversion Processes	305
Phosphate Conversion Processes	305
Chromate Conversion Processes	306
Oxide Conversion Processes	306
Cyanide Conversion Process	307
Inorganic Coatings	307
Metal Coatings	307
Ceramic Coatings	308
Organic Coatings	308
Organic Coating Processes	310
Summary	313

ASTICS AND COMPOSITES 315

Reaction Injection Molding	320
Ultra-Reinforced Thermoset RIM	320
Summary	323

19 Manufacturing with Composites 325

Types of Fabrics	325
Directions in Fabrics	328
Hybrids	328
Types of Resins	329

Manufacturing Techniques of Composites	329
Hand Layup	329
Pre-Preg	330
Filament Winding	330
Pultrusion	330
Curing of Composites	331
Vacuum Bagging	332
Autoclaving	332

SECTION IX INDUSTRIAL SAFETY AND HEALTH

20 Industrial Safety and Health 343

General Rules of Safety	343
Equipment Safety	347
Personnel Safety	349

SECTION X PRODUCTION CONTROL 357

21 Production Control 361

Characteristics of Different Types of Facilities	361
Piecework Production	362
Jigs and Fixtures	364
Desirable Characteristics of Workholders	364
Inspection/Dimensioning	365
Inspection	371
Small Batch Production	373
Numerical Control	373
Computerized Numerical Control	374
Large Batch or Continuous Processes	376
Computer-Aided Drafting/Computer-Automated Manufacturing	377
Robotics	378

Sandwiches and Honeycombs	332
Joining of Composites	333
Advantages and Disadvantages of Plastics and Composites	333
Summary	335
Photo Essay 19-1 Hand Layup of a Composite	336
Photo Essay 19-2 Vacuum Bagging	338

341

Product Safety	350
Ergonomics	350
Other Safety Considerations	354
Safety of the Environment	354
Summary	356

Quality Assurance Through Automated Inspection	384
Statistical Quality Control	386
Just-in-Time Scheduling	389
Mass Production	390
Adaptive Control	390
Cellular Organization	391
Flexible Manufacturing Systems	393
Computer-Integrated Manufacturing	393
Plant Layout	395
Flow of Material	395
Flow of Utilities	395
Flow of People	395
Flow of Information	395
Summary	401

■ APPENDICES

A Glossary 403

B Derivation of Equations 415

C Formulas and Equations 419

Index 437

D Answers to Odd-Numbered Problems 421

E Conversion Factors 435
