Contents

xi  Preface

xiii Introduction to Total Least Squares and Errors-in-Variables Modeling
  Sabine Van Huffel

  Part I: Basic Concepts, Relationships, and Statistical Estimators
  in TLS and EIV Modeling

  3  Errors in Variables for Numerical Analysts
     G. W. Stewart

  11 Unified Treatment of LS, TLS, and Truncated SVD Methods using a Weighted TLS
     Framework
     Bhaskar D. Rao

  21 Factors and Principal Components
     Hans Schneeweiss

  25 Partial Least Squares Regression
     Sijmen de Jong and Aloke Phatak

  37 Structural and Functional Models Revisited
     Chi-Lun Cheng and John Van Ness

  51 Estimated True Values for Errors-in-Variables Models
     Wayne A. Fuller

  59 Maximum Likelihood Estimation of Errors-In-Variables Models Using a Sample
     Covariance Matrix Obtained from Small Data Sets
     Johan Schoukens, Rik Pintelon, and Yves Rolain

  69 Some New Approaches to Estimation in Linear and Nonlinear Errors-in-Variables
     Regression Models
     Leon Jay Gleser

  77 Generalization of the TLS Approach in the Errors-in-Variables Problem
     Yasuo Amemiya

  87 Asymptotic Bias Calculations and Corrections in Segmented Regression Models
     with EIV
     Helmut Küchenhoff
Part II: Computational Methods for TLS and EIV Modeling

99 Total Least Squares Algorithms Based on Rank-Revealing Complete Orthogonal Decompositions
Ricardo D. Fierro, Leentje Vanhamme, and Sabine Van Huffel

117 Solving Recursive TLS Problems Using the Rank-Revealing ULV Decomposition
Jesse L. Barlow and Peter A. Yoon

127 Regularization Algorithms Based on Total Least Squares
Per Christian Hansen and Dianne P. O’Leary

139 Generalized Cross-Validation for Large Scale Problems
Gene H. Golub and Urs von Matt

149 Newton and Rayleigh Quotient Methods for Total Least Squares Problems
Åke Björck

161 Robust Solutions to Least Squares Problems with Uncertain Data
Laurent El Ghaoui and Hervé Lebret

171 Efficient Algorithms for Least Squares Type Problems with Bounded Uncertainties
Shivkumar Chandrasekaran, Gene H. Golub, Ming Gu, and Ali H. Sayed

Part III: Other Norms and Structure Constraints in TLS and EIV Modeling

183 The Use of the $L_1$ Norm in Nonlinear Errors-in-Variables Problems
G. Alistair Watson

193 Euclidean Regression: Convergence and Computational Aspects
Willy Gochet and Francine Maes

203 Total Least Norm for Linear and Nonlinear Structured Problems
J. Ben Rosen, Haesun Park, and John Glick

215 Structured Total Least Squares Problems: Formulations, Algorithms and Applications
Philippe Lemmerling, Sabine Van Huffel, and Bart De Moor

225 Linear System Identification, Structured Total Least Squares and the Riemannian SVD
Bart De Moor

239 An Approach to Solving a Partially Structured TLS Problem in Array Signal Processing
Richard J. Vaccaro
Part IV: Orthogonal Least Squares Fitting

249 A Comparison of Orthogonal Least Squares Fitting in Coordinate Metrology
Rolf Strebel, David Sourlier, and Walter Gander

259 Orthogonal Least Squares Fitting by Conic Sections
Helmuth Späth

265 Applications of Orthogonal Distance Regression in Metrology
Daniel S. Zwick

273 Applications of Nonlinear Orthogonal Distance Regression in 3D Motion Estimation
Mahendra K. Mallick

Part V: TLS and EIV Modeling in Applied Fields

285 A Statistical Approach to Subspace Based Estimation with Applications in Telecommunications
Björn Ottersten, David Asztély, Martin Kristensson, and Stefan Parkvall

295 TLS Based Methods for Exponential Parameter Estimation
Hua Chen, Sabine Van Huffel, Eric M. Dowling, and Ronald D. DeGroat

307 TLS Applications in Biomedical Signal Processing
Sabine Van Huffel

319 An RV-Coefficient Framework for Signal Processing Problems
José A. Ramos and Erik I. Verriest

329 Errors-in-Variables Modeling: an Instrumental Variable Approach
Petre Stoica, Joakim Sorelius, Mats Cedervall, and Torsten Söderström

341 Analyses, Development and Applications of TLS Algorithms in Frequency Domain System Identification
Rik Pintelon, Patrick Guillaume, Gerd Vandersteen, and Yves Rolain

359 Insights into Multivariate Calibration Using Errors-in-Variables Modeling
Edward V. Thomas

371 Total Least Squares in Astronomy
Richard L. Branham, Jr.
