1 Introduction ............................................... 1
   Guillermo de la Dehesa and Dennis J. Snower
   ✴ 1 Purpose of the volume ............................. 1
   ✴ 2 An overview of the volume ...................... 4

PART ONE: GENERAL POLICY ISSUES

✴ 2 Evaluating unemployment policies: what do the underlying theories tell us? 15
   Dennis J. Snower
   1 Introduction ........................................... 15
   2 Laissez-faire .......................................... 16
   3 Demand-management policies ..................... 20
   4 Supply-side policies ................................ 27
   5 Institutional policies ................................ 32
   6 Contractual policies ................................ 36
   7 Concluding remarks ................................ 44

✴ 3 High unemployment from a political economy perspective 54
   Gilles Saint-Paul
   1 Introduction ........................................... 54
   2 Theory .................................................. 55
   3 Implications for economic policy ................ 64
   4 Conclusion ............................................. 71
PART TWO: DEMAND MANAGEMENT AND SUPPLY-SIDE POLICY

4 The role of demand-management policies in reducing unemployment
Charles R. Bean
1 Macroeconomic policy and unemployment 84
2 Macroeconomic policies to support supply reforms 96
3 Enhancing the effectiveness of macroeconomic policies 103
4 Conclusions 106
Discussion 111
Stanley Fischer
1 Is there a role for stabilisation policy? 111
2 The role of demand management in Europe in the 1990s 113

5 Edmund Phelps’ theory of structural slumps and its policy implications
Edmond Malinvaud
1 Introduction 116
2 In search of a fundamental model 118
3 Further methodological remarks 122
4 Phelps’ models discussed 123
5 Empirical evidence 129
6 Explanation of postwar trends 131
7 Policy implications 132
Discussion 142
Edmund S. Phelps
Discussion 151
Klaus F. Zimmermann

PART THREE: SUBSIDISING EMPLOYMENT AND TRAINING

6 The simple economics of benefit transfers
Dennis J. Snower 163
7 Wage subsidy programmes: alternative designs

Edmund S. Phelps

1 The argument for a low-wage employment subsidy 208
2 Employment subsidy schemes 217
3 Conclusions and objections 229
Discussion 244

Jeff Frank
Discussion 247

Dale T. Mortensen

8 Technological development, competition from low-wage economies and low-skilled unemployment

Jacques H. Drèze and Henri Sneessens

1 The weakened position of less-skilled workers 250
2 Policy objectives 260
3 Policy alternatives 264
4 Conclusion 272
Discussion 277

Jozef Konings
1 Technological progress and unemployment 278
2 Globalisation and unemployment 279
3 Policy 280

9 Macroeconomic and policy implications of shifts in the relative demand for skills

Olivier J. Blanchard

1 The race between relative demand and relative supply 282
2 Unemployment 283
3 The USA versus Europe 285
4 The shape and size of transfers 286
5 Supply responses 287
6 Technological progress 288
7 Conclusions 289
Discussion 291

Gylfi Zoega

10 Would cutting payroll taxes on the unskilled have a significant impact on unemployment? 296
Stephen J. Nickell and Brian Bell
1 Introduction 296
2 The determinants of unemployment rates by skill 299
3 Unemployment and wages by skill 305
4 Should payroll taxes on the unskilled be cut? 320
Appendix: notes to table 10.2 323
Discussion 329

Robert J. Gordon

11 Preventing long-term unemployment: an economic analysis 333
Richard Layard
1 Introduction and review 333
2 Substitution and displacement 339
3 Relevant experience 344
Discussion 349

Guillermo de la Dehesa
Discussion 351

Patrick Minford

PART FOUR: LABOUR MARKET REGULATIONS

12 An analysis of firing costs and their implications for unemployment policy 359
Alison L. Booth
1 Introduction 359
2 A competitive spot labour market 362
3 Labour demand in a competitive labour market with contracts 363
4 Equilibrium employment with long-term contracts and voluntary redundancy pay 366
5 A comparison of the unemployment predictions of the two-period redundancy pay model with other union models 371
6 The unemployment implications of statutory redundancy pay 375
7 Conclusion 378
Appendix 379
Discussion 388
Juan José Dolado
Discussion 392
Gilles Saint-Paul

13 Labour market regulation and unemployment 395
Paul Gregg and Alan Manning
1 Introduction 395
2 The conventional analysis of regulation in the labour market 396
3 Empirical evidence on the relationship between labour market de-regulation and unemployment 399
4 Why might labour market de-regulation not always reduce unemployment? 410
5 The optimal amount and form of labour market regulation 416
6 Conclusion 418
Data appendix 420
Discussion 424
Juan J. R. Calaza

PART FIVE: POLICY, JOB REALLOCATION AND THE UNEMPLOYMENT–PRODUCTIVITY RELATION

14 Is there a trade-off between unemployment and productivity growth? 433
Robert J. Gordon
1 Introduction 433
2 Basic analytics 434
3 An example: the minimum wage 442
4 Mechanisms 446
5 Productivity growth differences across countries and sectors 452
6 Conclusions 459
Discussion 464
Charles R. Bean

15 Gross job reallocation and labour market policy 467
Pietro Garibaldi, Jozef Konings and Christopher Pissarides
1 Preliminaries 468
2 Unemployment and job reallocation 471
PART SIX: COMPARING UNEMPLOYMENT POLICIES

16 Unemployment in the OECD and its remedies 501

Patrick Minford
1 Trade, development and global competition 502
2 The model 504
3 Simulation of the North–South model 508
4 A preliminary test of the emerging market hypothesis 510
5 Implications for the OECD natural rate of unemployment 519
6 The social problem of low-wage competition 521
7 Policies to deal with the low-wage dilemma 523
8 Conclusions 527

Appendix: the equations of the North–South model 528

Discussion 534

Jonathan Haskel
1 The emerging markets hypothesis 535
2 Policy implications 539

Discussion 541

Stephen J. Nickell
1 Introduction 541
2 Trade versus technology and the Minford model 542
3 Solving the low-pay problem 543
17 The unemployment and welfare effects of labour market policy: a comparison of the USA and the UK
Stephen P. Millard and Dale T. Mortensen
1 A simple model of job creation and job destruction 546
2 The qualitative effects of labour policy and wage formation institutions 550
3 Accounting for the UK–US unemployment rate differential 555
4 The effects of individual labour market policies 559
5 The effects of labour policy reforms 561
6 Conclusions and suggestions for future research 565
Mathematical appendix A: the model 567
Mathematical appendix B: functional forms and parameters 569
Discussion 572
Giuseppe Bertola
Discussion 575
Michael Burda

Index 579
3.1 Labour demand and labour supply curve  page 57
3.2 Increase in labour surplus at expense of capital  57
3.3 France and Britain: payroll taxes, 1952–86  69
4.1 Cyclical unemployment  85
4.2 Effect of demand shocks on unemployment, 1964–92  88
4.3 Response to demand shock  89
5.1 The macroeconomic equilibrium  119
D5.1 Standardised unemployment rates, 1967–94  153
D5.2 Short- and long-run real interest rates, 1970–94  156
D5.3 Long-run real interest rates and total outlays of government  157
D5.4 Standardised unemployment and long-run real interest rates  158
6.1 The labour market equilibrium  170
6.2 The effect of the recruitment voucher  172
6.3 Targeting the long-term unemployed  174
6.4 Deadweight and displacement  175
6.5 The effect of an increase in the voucher  177
6.6 The maximal employment voucher  178
6.7 Training vouchers  179
6.8 The maximum training and recruiting vouchers  180
6.9 The maximum voucher ratio and the maximum employment effect  185
D7.1 The low-wage equilibrium and associated unemployment and the high-wage equilibrium after a wage subsidy is introduced  246
8.1 Structure of unemployment, by occupation, France, 1962–92  253
8.2 Low-skilled unemployment, in levels and in rates, France, 1960–90  253
8.3 25–54-year-old working men, by wage and salary income, USA, 1979 and 1987
8.4 Relative wage of manual versus non-manual workers, 1970–90
8.5 Labour market equilibrium with subsidies
10.1 Comparison of unit wage levels and employment tax, OECD countries, 1980–90
10.2 The skilled and the unskilled labour markets
10.3 Unemployment responses to an adverse neutral demand shift
10.4 Unemployment ratios, 1970–90
11.1 Percentage of unemployed people out of work over 12 months, by maximum duration of benefits, 1984
11.2 The inflation constraint
11.3 Stocks and flows
11.4 The Layard scheme
11.5 Percentage growth in the labour force and in employment, 1960–89
11.6 Change in the relative labour force, and change in relative employment, by sex, 1970–90
11.7 Vacancy rates and unemployment rates, 1970–85
D11.1 The unemployment trap
D11.2 The low-wage job market before Layard’s scheme
D11.3 The low-wage job market after Layard’s scheme
D11.4 The pattern of work among Layard scheme workers on scheme jobs
12.1 Labour demand variations with and without redundancy pay for a fixed wage rate
12.2 A comparison of welfare losses of three union models
12.3 Imposition of mandated redundancy pay
D12.1 Employment rigidity versus employment growth
D12.2 Booth’s Proposition 2
13.1 Unemployment and non-employment rates, prime-aged men, UK, 1974–91
14.1 The UPT schedule
14.2 Unemployment and productivity in the standard labour market model
14.3 The effects of an oil shock on employment and the real wage
14.4 The minimum wage relative to average hourly compensation, 1962–92
14.5 The effect of an increase in the real minimum wage in France and a decrease in the USA 443
14.6 Movements along and shifts in the UPT schedule 448
15.1 Job reallocation and unemployment 474
15.2 Job reallocation and long-term unemployment 476
15.3 Job reallocation and employment protection legislation 479
15.4 Job reallocation and unemployment insurance: 1 480
15.5 Job reallocation and unemployment insurance: 2 482
15.6 Job reallocation and active labour market policy 484
15.7 Job reallocation and industrial subsidy 485
16.1 The supply and demand for non-traded (domestic) goods 506
16.2 The ratio of DCs’ manufacturing export prices to DCs’ export prices of machinery and transport equipment and of services, 1970–92 516
16.3 The ratio of LDCs’ to DCs’ manufacturing export prices, 1970–92 516
16.4 Percentage changes in the 1980s in the relative wages and relative employment of non-production and product in labour in manufacturing 517
16.5 The wage distribution before and after low-wage competition 520
16.6 BIG and NIT illustrated 522
D16.1 Changes in non-manual/manual relative wages and employment, 1980–1 538
17.1 Equilibrium reservation productivity and market tightness 551
Tables

D5.1 Integration and cointegration  
6.1 Short-run effects of the BTP  
6.2 Long-run effects of the BTP  
7.1 Percentage differentials in real annual wages and salaries, males, 25–57, 1979–87, selected years  
7.2 Cost of a model tax credit plan for US private-sector full-time employees  
8.1 Unemployment rates, by level of educational attainment  
8.2 Unemployment rates, by skill, Britain and the USA, 1984 and 1987  
8.3 Ratio of unskilled/skilled employment and wages in Germany, 1966–90  
8.4 Hourly wage costs for production workers in manufacturing, 1992  
8.5 Minimum wages in Western Europe, 1985–91, selected years  
8.6 Social insurance contributions and income tax at average earnings, blue-collar workers, 1991  
9.1 Relative demand and supply shifts, 1963–71 to 1979–87, selected years  
9.2 Evolution of unemployment rates, for high- and low-education workers, in four European countries, 1979–82 to 1993, selected years  
D9.1 Ratio of unemployment among the least educated to general unemployment, 1978–93  
10.1 Unemployment, by occupation: inflow and duration, USA and Britain, 1987 and 1984  
10.2 Male unemployment rates, by education or occupation, 1971–4 to 1993, selected years
