

# Table of Contents

<b>Preface .....</b>	<b>V</b>
<b>List of Figures .....</b>	<b>XVII</b>
<b>List of Tables.....</b>	<b>XIX</b>
<b>Summary .....</b>	<b>XXI</b>

<b>Chapter 1: Introduction.....</b>	<b>1</b>
<b>1.1 The applied problem .....</b>	<b>1</b>
<b>1.2 The methodological problem .....</b>	<b>6</b>
<b>1.3 The theoretical problem .....</b>	<b>7</b>
<b>1.4 The rationale of the study.....</b>	<b>9</b>
<b>1.5 Structure of the study .....</b>	<b>10</b>

## **PART I: The PET-System - A Theoretical and Methodological Approach to Innovation Diffusion and Political Control**

<b>Chapter 2: Theoretical Approaches to Technological Change and Political Control Across Disciplines .....</b>	<b>15</b>
<b>2.1 Some basic concepts and definitions.....</b>	<b>15</b>
2.1.1 Technology and related definitions .....	15
2.1.2 Definitions related to political control and regulation .....	18

2.1.3 Multiple perspectives on technological change: A hierarchy of disciplines.....	19
2.1.4 Multiple models of processes of change - a formal criterion.....	21
2.1.5 Summary and synthesis.....	22
<b>2.2 Descriptive models and the aggregate measurement of technological change, diffusion and innovation.....</b>	<b>23</b>
2.2.1 Measurement of innovation and diffusion .....	23
2.2.2 Models for the representation of innovation and diffusion processes..	24
2.2.3 Summary .....	27
<b>2.3 Economic approaches to technological change.....</b>	<b>28</b>
2.3.1 Simple models - linear thinking .....	28
2.3.2 Explanatory models of the feedback and systemic type - neo-classical vs. evolutionary theorising .....	32
2.3.3 Main elements of evolutionary theories of techno-economic change..	36
2.3.4 Summary and assessment.....	47
<b>2.4 Sociological analysis of technological change .....</b>	<b>48</b>
2.4.1 Early sociological approaches - linear models and single factors.....	48
2.4.2 The 'new' sociology of technological change - interdependencies, networks and systems.....	49
2.4.3 Summary and assessment.....	55
<b>2.5 Theories of political control and regulation .....</b>	<b>57</b>
2.5.1 Linear relationships between the political and the techno-economic realm .....	58
2.5.2 Feedback and system thinking from a political perspective .....	66
2.5.3 Summary and assessment.....	71
<b>2.6 Conclusions .....</b>	<b>73</b>
2.6.1 Requirements of an integrated perspective .....	73
2.6.2 Existing attempts to integrate perspectives .....	74
2.6.3 Elements of an integrated approach .....	75

<b>Chapter 3: The PET- System: An Integrated Approach to Innovation Diffusion and Political Control.....</b>	<b>77</b>
<b>3.1 Introduction .....</b>	<b>77</b>
<b>3.2 Delimitation of the system and exogenous forces .....</b>	<b>79</b>
<b>3.3 The central object of PET: technology .....</b>	<b>81</b>
<b>3.4 Structures and structural changes.....</b>	<b>83</b>
3.4.1 Changes of technological structures.....	84
3.4.2 Changes of economic structures.....	85
3.4.3 Changes of information structures .....	86
3.4.4 Changes of political structures .....	86
<b>3.5 Actors and motivations .....</b>	<b>87</b>
3.5.1 The underlying actor model .....	87
3.5.2 Actors' decisions and links to their environment .....	90
3.5.3 Types of actors considered.....	93
<b>3.6 Decisions and interactions .....</b>	<b>98</b>
3.6.1 Decisions and decision arenas: innovation, adoption, policies .....	98
3.6.2 A typology of interactions.....	98
3.6.3 Institutions, institutional changes and interactions .....	100
<b>3.7 System dynamics .....</b>	<b>101</b>
<b>3.8 Summary .....</b>	<b>109</b>
3.8.1 Basic hypotheses .....	109
3.8.2 The PET-system - a useful starting point.....	111

<b>Chapter 4: A General Methodology for Studying Innovation Diffusion and Political Control.....</b>	<b>113</b>
<b>4.1 Introduction .....</b>	<b>113</b>
<b>4.2 The basic steps of the general methodology.....</b>	<b>113</b>
4.2.1 Step 1: Technology analysis.....	114
4.2.2 Step 2: Technological changes.....	116

4.2.3 Step 3: Delimitation of the system .....	117
4.2.4 Step 4: Structural analysis and structural evolution .....	118
4.2.5 Step 5: Identification of actors .....	120
4.2.6 Step 6: Event analysis .....	121
4.2.7 Step 7: Analysis of decisions and interactions .....	122
4.2.8 Step 8: Analysis of system dynamics .....	123
4.2.9 Step 9: Prospective analysis and scenario building .....	125
<b>4.3 Conclusions .....</b>	<b>126</b>

## **PART II: Introduction of the Problem Area and Specification of the Methodology**

### **Chapter 5: Issues of Energy Supply and Cogeneration..... 131**

<b>5.1 Historical development of heat and power supply.....</b>	<b>131</b>
5.1.1 Economies of scale.....	132
5.1.2 The political interests in energy supply .....	133
5.1.3 Emergence of centralised technical and organisational structures.....	133
5.1.4 The typical players in electricity supply .....	135
<b>5.2 Recent challenges to the traditional organisation of the energy supply industries .....</b>	<b>136</b>
5.2.1 The end of the political and strategic role.....	136
5.2.2 The natural monopoly debate and the claim for deregulation.....	137
5.2.3 The environmental discussion and energy efficiency .....	138
5.2.4 Options and policies for reorganising the ESI .....	139
<b>5.3 CHP technology and its main dimensions (Step 1).....</b>	<b>140</b>
5.3.1 Dimension 1: Technological issues and applications.....	143
5.3.2 Dimension 2: Environmental impact .....	158
5.3.3 Dimension 3: Micro-economics for CHP-users and suppliers.....	162
5.3.4 Dimension 4: Macro- and socio-economic issues.....	171
5.3.5 Dimension 5: Organisational and power issues .....	176
5.3.6 Technological alternatives for heat and electricity supply.....	177

<b>5.4 Summary .....</b>	<b>180</b>
5.4.1 CHP technology - a complex research field.....	181
5.4.2 Superiority, inferiority and the role of social processes.....	181
 <b>Chapter 6: Determinants of CHP-Diffusion .....</b>	<b>183</b>
<b>6.1 An overview of the situation of CHP .....</b>	<b>184</b>
<b>6.2 General exogenous factors.....</b>	<b>185</b>
<b>6.3 Structural level .....</b>	<b>186</b>
6.3.1 Technological factors .....	186
6.3.2 Economic factors.....	187
6.3.3 Institutional and organisational factors .....	188
6.3.4 Political factors.....	190
<b>6.4 Behavioural level.....</b>	<b>192</b>
6.4.1 Informational barriers and competencies .....	192
6.4.2 Attitudes of actors, actions and interactions.....	193
6.4.3 Case-studies on investment in energy efficiency and CHP .....	194
<b>6.5 Policy recommendations.....</b>	<b>195</b>
6.5.1 Recommendations at structural level .....	195
6.5.2 Recommendations at behavioural level .....	197
<b>6.6 Missing pieces .....</b>	<b>197</b>
<b>6.7 Summary .....</b>	<b>199</b>
 <b>Chapter 7: Methodological Transfer - From the General Approach to the Empirical Investigation.....</b>	<b>201</b>
<b>7.1 Specification of the basic hypotheses.....</b>	<b>202</b>
7.1.1 Co-evolution of structures and technology (H1).....	202
7.1.2 Technical complementarity (H2) .....	204
7.1.3 Behavioural hypothesis (H3) .....	205
7.1.4 Dynamic hypothesis (H4).....	206

7.1.5 Control hypothesis (H5).....	207
<b>7.2 Focus of interest and comparative methodology .....</b>	<b>208</b>
7.2.1 On the usefulness of a comparative methodology .....	208
7.2.2 Target areas .....	209
7.2.3 First specification: Selection of countries .....	209
7.2.4 Second specification: Selection of actors and cases.....	212
7.2.5 Third specification: Interview-based methodology .....	214
<b>7.3 From theory to comparative data collection.....</b>	<b>215</b>
7.3.1 Technological changes and innovations for CHP (Step 2) .....	216
7.3.2 Delimitation of the system and exogenous changes (Step 3).....	218
7.3.3 Structures and structural changes (Step 4).....	219
7.3.4 Identification of actors (Step 5) .....	222
7.3.5 Event analysis (Step 6).....	225
7.3.6 Analysis of decisions and interactions (Step 7) .....	226
7.3.7 System dynamics (Step 8).....	229
7.3.8 Prospective analysis (Step 9) .....	230
<b>7.4 Issues and problems of research practice .....</b>	<b>230</b>
7.4.1 Limitations of data sources .....	230
7.4.2 Constraints on the general validity of the results .....	232
<b>7.5 Summary .....</b>	<b>233</b>

## **PART III: The Empirical Account: Cogeneration in the UK and Germany from the Early 80s to the Middle of the 90s**

<b>Chapter 8: Liberalisation of Energy Supply in the UK.....</b>	<b>237</b>
8.1 The history of cogeneration in the UK .....	237
8.2 The context conditions .....	239
8.3 Innovation patterns of CHP-technology in the UK.....	242
8.3.1 Technical improvements .....	242
8.3.2 Expectations for the future .....	245

9.5.1 Political realm .....	324
9.5.2 Technology supply side .....	334
9.5.3 The user-side of CHP-technology.....	337
<b>9.6 The evolutionary dynamics of CHP-diffusion in Germany.....</b>	<b>349</b>
<b>9.7 Outlook.....</b>	<b>354</b>
9.7.1 Scenario 1: Moderate CHP-friendly liberalisation.....	355
9.7.2 Scenario 2: Full application of liberal principles .....	356
9.7.3 Scenario 3: Political enforcement and support for CHP .....	357
<b>9.8 Excursion: CHP in the New Länder .....</b>	<b>359</b>
9.8.1 Structural developments.....	359
9.8.2 Developments at micro-level .....	361
9.8.3 Assessment and outlook .....	362

## **Chapter 10: Comparison of the Developments in the UK and Germany .....**

<b>10.1 Comparison of the developments till the early Eighties .....</b>	<b>363</b>
<b>10.2 Differences of the context conditions.....</b>	<b>364</b>
<b>10.3 Differences of technological developments .....</b>	<b>365</b>
<b>10.4 Comparison of structures and structural changes.....</b>	<b>367</b>
10.4.1 Technological structures .....	367
10.4.2 Economic structures and regulatory framework .....	369
10.4.3 Structures for the provision of technological information .....	373
10.4.4 Political and regulatory structures.....	374
<b>10.5 Comparison of actors' decisions, interactions and motivations.....</b>	<b>376</b>
10.5.1 Political realm .....	376
10.5.2 Technology supply side .....	378
10.5.3 The user-side of CHP .....	381
<b>10.6 Differences of evolutionary dynamics .....</b>	<b>385</b>
<b>10.7 Comparison of future perspectives.....</b>	<b>391</b>
10.7.1 Scenario 1: Liberal framework with special attention to CHP.....	391

10.7.2 Scenario 2: Widest possible application of market principles .....	392
10.7.3 Scenario 3: Political support and enforcement of CHP .....	393

## **PART IV: Concluding Remarks on Cogeneration, Political Control and the PET-Approach**

<b>Chapter 11: Conclusions.....</b>	<b>397</b>
<b>11.1 Policy conclusions.....</b>	<b>397</b>
11.1.1 Lessons from the cases of CHP in the UK and Germany .....	397
11.1.2 Requirements of a CHP-oriented framework.....	401
11.1.3 Policy strategies for promoting CHP .....	403
<b>11.2 Methodological conclusions.....</b>	<b>409</b>
11.2.1 The constructive character of PET .....	409
11.2.2 Theory-based prospective analysis: requirements and possibilities .....	410
<b>11.3 Theoretical conclusions.....</b>	<b>411</b>
11.3.1 On the usefulness of the PET-approach for structuring processes of change in socio-technical systems .....	411
11.3.2 Theory, hypotheses and their limitations: Arguments for a different perspective on theory .....	412
11.3.3 On the needs and problems of multi-disciplinary research .....	412
<b>11.4 Research needs.....</b>	<b>413</b>
<b>References .....</b>	<b>415</b>
<b>Abbreviations.....</b>	<b>441</b>
<b>Appendices .....</b>	<b>443</b>
<b>Appendix 1: Deutschsprachige Zusammenfassung.....</b>	<b>443</b>
<b>Appendix 2: Questionnaire outline.....</b>	<b>465</b>
<b>Appendix 3: List of interviews .....</b>	<b>469</b>
<b>Appendix 4: Complementary data .....</b>	<b>473</b>
<b>Appendix 5: Comparative summary overview.....</b>	<b>476</b>

8.3.3 Non-technical implications .....	246
<b>8.4 Structural changes.....</b>	<b>246</b>
8.4.1 Technological structures .....	246
8.4.2 Economic structures and regulatory framework .....	251
8.4.3 Structures for the provision of technological information .....	259
8.4.4 Political and regulatory structures.....	260
<b>8.5 Behavioural aspects: Decisions, interactions and motivations.....</b>	<b>263</b>
8.5.1 Political realm .....	263
8.5.2 Suppliers' decisions on innovation.....	271
8.5.3 Users and their adoption decisions.....	275
<b>8.6 The evolutionary dynamics of CHP-diffusion in the UK .....</b>	<b>284</b>
<b>8.7 Outlook.....</b>	<b>290</b>
8.7.1 Scenario 1: Moderate CHP-friendly liberalisation.....	291
8.7.2 Scenario 2: Full application of liberal principles .....	292
8.7.3 Scenario 3: Political enforcement and support for CHP .....	293
<b>Chapter 9: Transforming the Monopoly - CHP in Germany ..</b>	<b>295</b>
<b>9.1 The history of cogeneration and electricity supply in Germany.....</b>	<b>295</b>
<b>9.2 The context conditions .....</b>	<b>297</b>
<b>9.3 Innovation patterns of CHP-technology in Germany.....</b>	<b>300</b>
9.3.1 Technical improvements .....	300
9.3.2 Expectations for the future .....	304
9.3.3 Non-technical implications .....	306
<b>9.4 Structural changes.....</b>	<b>306</b>
9.4.1 Technological structures .....	306
9.4.2 Economic structures and regulatory framework .....	311
9.4.3 Structures for the provision of technological information .....	320
9.4.4 Political and regulatory structures.....	322
<b>9.5 Behavioural aspects: Decisions, interactions and motivations.....</b>	<b>324</b>

## List of Figures

Figure 3.1: A firm's links to its environment.....	93
Figure 3.2: The set-up of the PET-system.....	102
Figure 5.1: Black box model of cogeneration and conventional heat-only and power-only plant.....	146
Figure 5.2: The transformation chain from the primary fuel source to final services.....	147
Figure 5.3: Gas-turbine cogeneration plant.....	150
Figure 5.4: Heat, cold and power load and supply curves of an industrial site.....	153
Figure 5.5: The service chains from technology suppliers to service end users.....	166
Figure 5.6: Model for the assessment of an independent industrial cogeneration project.....	171
Figure 5.7: Recent development of heat and power supply in terms of rivalry and excludability.....	174
Figure 6.1: Diffusion of CHP in Europe.....	184
Figure 8.1: Energy production in the UK by fuels.....	240
Figure 8.2: Energy consumption in the UK by sectors.....	242
Figure 8.3: Electricity consumption in the UK by sectors.....	247
Figure 8.4: Electricity generation capacity in the UK by fuels.....	248
Figure 8.5: The diffusion of cogeneration in the UK .....	249
Figure 8.6: The organisation of the ESI in the UK.....	253
Figure 8.7: Development of electricity and gas prices in the UK for households and industry.....	256

Figure 8.8: Approximate life-cycle of the British small-scale CHP industry.....	258
Figure 8.9: Market shares of direct sales and Contract Energy Management (CEM) solutions in the British gas turbine market since liberalisation.....	272
Figure 9.1: Energy production in Germany by fuels.....	298
Figure 9.2: Energy consumption in Germany by sectors.....	299
Figure 9.3: Electricity consumption in Germany by sectors.....	307
Figure 9.4: Electricity production in Germany by fuels.....	308
Figure 9.5: The diffusion of cogeneration in Germany.....	309
Figure 9.6: The organisation of the ESI in Germany.....	314
Figure 9.7: Development of electricity and gas prices in Germany for industry and households.....	317
Figure 9.8: Approximate life-cycle of the German small-scale CHP industry.....	320

## List of Tables

Table 2.1: A hierarchy of research disciplines related to technological change.....	20
Table 2.2: Dependent and independent variables in early diffusion research.....	49
Table 3.1: Types and examples of interactions in the PET-system.....	100
Table 4.1: Steps of the PET-methodology.....	114
Table 4.2: Steps for analysing a technology's dimensions.....	115
Table 4.3: Steps for analysing the changes of a technology's dimensions.....	117
Table 4.4: Steps for analysing exogenous changes.....	118
Table 4.5: Analysis of structural changes.....	119
Table 4.6: Elements of actor analysis.....	120
Table 4.7: Elements of event analysis.....	121
Table 4.8: Analysis of decisions.....	122
Table 4.9: Analysis of dynamic mechanisms.....	124
Table 4.10: Analysing future dynamics.....	126
Table 5.1: Functional structure of electricity supply and the corresponding actors.....	136
Table 5.2: Energy-related policies.....	139
Table 5.3: Comparison of different cogeneration technologies with traditional boilers and power stations.....	145
Table 5.4: Characterisations of the two products heat and power.....	152
Table 5.5: Comparison of different combinations of heat and power supply.....	160
Table 5.6: Emissions for CHP and separate generation in mg/MJ heat.....	161

Table 5.7: Utility and non-utility CHP-users.....	166
Table 5.8: Comparison of basic system structures of heat and power supply.....	180
Table 7.1: Identification of technological changes.....	218
Table 7.2: Identification of exogenous changes.....	219
Table 7.3: Identification of technological structures.....	220
Table 7.4: Identification of economic structures.....	221
Table 7.5: Identification of information structures.....	221
Table 7.6: Indicators and measurement of political structures.....	222
Table 7.7: Identification of technology users.....	223
Table 7.8: Identification of technology suppliers.....	224
Table 7.9: Identification of policy-makers.....	225
Table 7.10: Identification of major events.....	225
Table 7.11: Identification of decisions.....	226
Table 7.12: Identification of interactions.....	227
Table 7.13: Identification of decision-making processes.....	228
Table 8.1: Improvements of technical characteristics of CHP and their approximate timing in the UK.....	244
Table 8.2: Needs for and expectations of future technical developments of CHP in the UK.....	245
Table 8.3: Overview of policy programmes to promote CHP in the UK during the Eighties and Nineties.....	267
Table 8.4: Main information sources of CHP-users in the UK.....	279
Table 9.1: Improvements of technical characteristics of CHP and their approximate timing in Germany.....	304
Table 9.2: Needs for and expectations of future technical developments of CHP in Germany.....	305
Table 9.3: Overview of the main policy programmes to promote CHP in Germany during the Eighties and Nineties.....	329
Table 9.4: Main information sources of CHP-users in Germany.....	341
