Preface to the eighth edition xvii

Preface to the first edition xix

1	General pharmacology	1
	Mechanisms of action of drugs	2
	Concept of a receptor	4
	Characterization and classification of receptors	5
	Receptor types and subtypes	12
	G-Protein-coupled receptors	14
	Drug interactions	16
	Transfer of drugs across membranes	20
	Physical properties affecting transfer	21
	Transfer across special membranes	23
	Routes of drug administration	23
	Factors affecting drug dosage	27
	Timing of administration	28
	Binding of drugs	29
	Distribution of drugs in the body	30
	Drug metabolism	30
	Drug excretion	33
	Factors determining biophase concentration	34
	Compartment models	36
	Drug elimination	38
	Pharmacokinetic compartment models	39
	Pharmacokinetics of inhalation anaesthetics	43
	Bioavailability	44
	First-pass effect	44
	Automated drug delivery systems	46
	Idiosyncrasy	48
	Allergic reactions (anaphylactic reactions)	48
	Blood dyscrasias	50
	Pharmacogenetics	50
	Chemotherapeutic index	52
	Approved names	52
	Clinical trials	53
	Legal aspects of medicines	56
	References and further reading	59

- 2 Perioperative therapy 61**
Anxiety 61
Unwanted autonomic responses to anaesthesia 62
Induction movements 62
Regurgitation, vomiting and pulmonary aspiration 62
Premedication in children 66
Metoclopramide 67
Omeprazole 67
Ondansetron 68
- 3 Central nervous system depressants 70**
Narcotics, hypnotics, anxiolytic sedatives, neuroleptics and general anaesthetics 70
Anxiolytic sedatives (minor tranquillizers) 71
Benzodiazepines 73
Other anxiolytic sedatives: chemical variants 79
Neuroleptics, major tranquillizers, anti-psychotics 80
Intravenous induction agents 85
Steroids 87
Other sedatives and hypnotics 88
Forced diuresis in the treatment of drug overdosage 91
Anticonvulsants 92
Drug treatment of epilepsy 93
Alcohol 96
Alimemazine (trimeprazine) 97
Clomethiazole 97
Diazepam 98
Droperidol 100
Etomidate 101
Flumazenil 102
Fluphenazine 103
Haloperidol 104
Ketamine 104
Lorazepam 107
Methohexital 108
Midazolam 108
Propofol 111
Thiopental 115
References and further reading 119
- 4 General anaesthetics 120**
Stages of anaesthesia 120
Surgical anaesthesia 121
Mode of action of anaesthetics 121
Uptake and distribution of inhalational agents 122
Metabolism of volatile anaesthetics 126
Evaluation of anaesthetic potency 127
Pharmacology 128
Halogenated hydrocarbon anaesthetics 132
Anaesthetic gases 132

<i>Desflurane</i>	133
<i>Enflurane</i>	134
<i>Ether</i>	135
<i>Halothane</i>	138
<i>Isoflurane</i>	142
<i>Nitrous oxide</i>	144
<i>Sevoflurane</i>	147
<i>Xenon</i>	149
Agents mainly of historical interest	149
<i>Chloroform</i>	149
<i>Cyclopropane</i>	150
<i>Ethyl chloride</i>	150
<i>Fluroxene</i>	150
<i>Methoxyflurane</i>	150
<i>Trichloroethylene</i>	150
<i>Vinyl ether</i>	151

5 Systemic analgesics 152

Pain	152
Analgesics	154
Peripherally-acting analgesics	163
Treatment of migraine	169
<i>Acetylsalicylic acid</i>	171
<i>Alfentanil</i>	175
<i>Buprenorphine</i>	176
<i>Codeine</i>	177
<i>Diamorphine</i>	178
<i>Diclofenac</i>	179
<i>Fentanyl</i>	180
<i>Ibuprofen</i>	182
<i>Indometacin</i>	183
<i>Morphine salts</i>	184
<i>Naloxone</i>	190
<i>Nefopam hydrochloride</i>	192
<i>Paracetamol</i>	192
<i>Pentazocine</i>	194
<i>Pethidine</i>	195
<i>Piroxicam</i>	198
<i>Remifentanil</i>	199
<i>Tramadol</i>	201
References and further reading	202

6 Local anaesthetics 203

Mode of action	203
Chemistry	204
Classification	205
Other pharmacological actions	207
Toxic effects	209
<i>Benzocaine</i>	210
<i>Bupivacaine</i>	210

- Cocaine 212
- Lidocaine 213
- Prilocaine 215
- Ropivacaine 216
- Tetracaine 217
- Other local anaesthetics 219

- 7 Drugs affecting mood 220**
 - Antidepressants 220
 - Amoxapine 226
 - Lithium salts 226
 - Mianserin 226
 - Rolipram 226
 - Antidepressant agents and anaesthesia 227
 - Psychomotor stimulants 228
 - Psychotomimetics (hallucinogens) 230
 - Dopamine as a neurotransmitter in the central nervous system 231
 - Other CNS stimulants: analeptics 232
 - Amphetamine and dexamphetamine 233
 - Amitriptyline 234
 - Dosulepin 236
 - Doxapram 237
 - Fluoxetine 238
 - Imipramine 239
 - Levodopa 240
 - Lithium 242
 - Methylamphetamine 243
 - Moclobemide 244

- 8 Histamine, antihistamines; drugs affecting bronchial calibre 246**
 - Histamine 246
 - Antihistamines 250
 - Bronchoconstrictors 254
 - Bronchodilators 255
 - Mucolytic agents 256
 - Drugs for hay fever 256
 - Chlorpheniramine 257
 - Cimetidine 257
 - Cromoglicate 259
 - Cyclizine 259
 - Ipratropium 261
 - Ranitidine 261
 - Salbutamol 263
 - Theophylline and aminophylline 264

- 9 Neuromuscular blocking agents 266**
 - Physiology of neuromuscular transmission 266
 - Neuromuscular block 267
 - Pharmacokinetics of relaxants 272
 - Clinical use of relaxants 274

- Abnormal reactions to relaxants 276
- Muscle rigidity and spasm 278
- Alcuronium* 279
- Atracurium* 279
- Cisatracurium* 281
- Dantrolene* 282
- Gallamine* 283
- Mivacurium* 284
- Pancuronium* 286
- Rocuronium* 287
- Suxamethonium salts* 288
- Tubocurarine* 291
- Vecuronium* 293

- 10 Parasympathomimetic and cholinergic agents; anticholinesterases 296**
 - Drug action 296
 - Anticholinesterases 300
 - Myasthenia gravis 302
 - Edrophonium* 303
 - Neostigmine* 304
 - Physostigmine* 306
 - Pyridostigmine* 307

- 11 Parasympathetic antagonists and anticholinergic agents 309**
 - Synthetic atropine-like compounds 310
 - Belladonna alkaloids 310
 - Anti-Parkinsonian drugs 311
 - Mydriatics 311
 - Atropine* 312
 - Glycopyrrolate* 314
 - Hyoscine* 315
 - Other synthetic anticholinergics 316

- 12 Drugs used for their effects on vascular tone and cardiac contractility 317**
 - Cardiovascular control mechanisms 317
 - The myocardium 320
 - Pressor agents and vasoconstrictors 322
 - Inotropic agents 325
 - Hypotensive agents and vasodilators 330
 - Ganglion blocking agents 332
 - Agents inhibiting norepinephrine release 333
 - Adrenoceptor blocking agents 333
 - Inhibitors of angiotensin conversion 335
 - Direct-acting vasodilators 336
 - Nitric oxide donors 337
 - Calcium channel blockers 338
 - Phosphodiesterase inhibitors 341
 - ATP-ase-dependent potassium channel openers 341
 - Adenosine uptake inhibitors 342
 - Vasodilators with an unknown mechanism 342

Drugs affecting coronary blood vessels 342

- Captopril* 349
- Clonidine* 350
- Dobutamine* 352
- Dopamine* 353
- Dopexamine* 354
- Ephedrine* 355
- Epinephrine* 355
- Glyceryl trinitrate* 356
- Guanethidine* 357
- Hydralazine* 359
- Isoprenaline salts* 359
- Metaraminol* 361
- Methoxamine* 362
- Methyldopa* 363
- Milrinone* 364
- Nifedipine* 365
- Nimodipine* 366
- Nitric oxide* 367
- Nitroprusside* 367
- Norepinephrine* 369
- Phenoxybenzamine* 371
- Phentolamine* 372
- Phenylephrine* 373
- Prazosin* 374
- Sildenafil* 375
- Trimetaphan* 376
- Verapamil* 377

13 Drugs used for their effects on cardiac rhythm and rate 379

- The cardiac electrical cycle 379
- Cardiac arrhythmias 383
- Anti-arrhythmic agents 383
- Digitalis glycosides 390
- Chronotropic agents 391
- Adenosine* 392
- Amiodarone* 394
- Atenolol* 395
- Digoxin* 396
- Disopyramide* 398
- Esmolol* 399
- Metoprolol* 400
- Propranolol* 401
- Quinidine* 403
- Sotalol* 404

14 Diuretics 405

- Structure of the nephron 405
- The glomerular filtrate 406
- Modification of the glomerular filtrate 406

- Action of diuretics 407
- Acetazolamide* 409
- Furosemide* 409
- Mannitol* 411
- Spironolactone* 412
- Thiazides* 413
- Triamterene* 414

- 15 Drugs acting on the uterus 416**
 - Uterine muscle 416
 - Uterine stimulants 416
 - Tocolytic agents 416
 - Ergometrine* 418
 - Oxytocin* 419
 - Prostaglandins* 420

- 16 Chemical transmitters and enzymes 423**
 - Chemical transmitters 423
 - Autacoids 423
 - Prostaglandins 423
 - Slow-reacting substance 427
 - 5-Hydroxytryptamine 427
 - Angiotensin 429
 - Plasma kinins 430
 - Substance P 430
 - Enzymes 431
 - Amine oxidases 431
 - Carbonic anhydrase 432
 - Cholinesterases 433
 - Hyaluronidase 434
 - Proteinases 435
 - References 435

- 17 Hormones 436**
 - Effects of anaesthesia 436
 - Pituitary gland (hypophysis) and hypothalamus 437
 - Adrenal cortex 437
 - Adrenal medulla 442
 - Thyroid 442
 - Antithyroid drugs 442
 - Pancreas 443
 - Oral hypoglycaemic drugs 450
 - Carbimazole* 445
 - Chlorpropamide* 446
 - Dexamethasone* 446
 - Glibendamide* 447
 - Glucagon* 448
 - Hydrocortisone* 448
 - Insulin* 449
 - Metformin* 450

Octreotide 451
Prednisolone 451
Somatotropin 452
Thyroid hormones 453
Tolbutamide 453
Vasopressin 454

18 Anticoagulants, antithrombotic, thrombolytic and haemostatic agents 456

The normal clotting process 456
Control mechanisms 458
Sites of action of anticoagulants 458
Fibrinolysis 459
Oral anticoagulants 461
Anistreplase 463
Dextrans 464
Epoprostenol 465
Ethamsylate 466
Heparin 467
Protamine 469
Tranexamic acid 470
Warfarin 470

19 Antibiotics and other antimicrobial agents 473

History 473
General approach to the use of antibiotics 473
Mode of action of antibiotics 475
Mechanisms of antibiotic resistance 477
Hypersensitivity 478
Antimicrobial agents 478
Sulphonamides 478
 β -Lactam antibiotics 479
Penicillins 479
Benzylpenicillin 480
Anti-staphylococcal penicillins 480
Pencillins active against Gram-negative bacilli 481
Ampicillin and amoxycillin 481
Other pencillins active against Gram-negative bacilli 481
Cephalosporins 481
Imipenem 483
Aztreonam 483
Aminoglycosides 484
Gentamicin 485
Macrolides 485
Erythromycin 485
Fusidic acid 486
Tetracyclines 486
Chloramphenicol 486
Quinolones 486
Ciprofloxacin 486
Glycopeptides 487

<i>Vancomycin</i>	487
<i>Teicoplanin</i>	487
Antimycobacterial agents	487
Antituberculous agents	487
<i>Isoniazid</i>	488
<i>Rifampicin</i>	488
<i>Ethambutol</i>	489
<i>Pyrazinamide</i>	489
<i>p</i> -Aminosalicylic acid	489
Cycloserine	489
Antileprotic agents	490
Antiprotozoal agents	490
<i>Metronidazole</i>	491
Antiviral agents	492
Interferons	492
Antiviral drugs	492
<i>Idoxuridine</i>	492
<i>Amantadine</i>	493
<i>Cytosine arabinoside</i>	493
<i>Adenine arabinoside</i>	493
<i>Acyclovir</i>	493
<i>Ganciclovir</i>	494
<i>Zidovudine</i>	494
<i>Ribavirin</i>	494
Antifungal agents	495
The polyenes	495
<i>Nystatin</i>	495
<i>Amphotericin B</i>	495
<i>Fluocytosine</i>	496
<i>Imidazoles</i>	497
<i>Clotrimazole</i>	497
<i>Miconazole</i>	497
<i>Ketoconazole</i>	497
<i>Triazoles</i>	498
<i>Itraconazole</i>	498
<i>Fluconazole</i>	498
<i>Griseofulvin</i>	498
Antimicrobial aerosols	499
20 Plasma substitutes	500
Oxygen-carrying solutions	501
<i>Dextran</i>	505
<i>Gelatins</i>	506
<i>Human albumin</i>	506
<i>Starch</i>	508
Appendix: Changes in the names of drugs	509
Index	515
