LIST OF FIGURES	viii
LIST OF TABLES	x
LIST OF CONTRIBUTORS	xiii
PREFACE	xv
FOREWORD	xvii
ACKNOWLEDGEMENTS	xix
PART I	INTANGIBLES: A GENERAL FRAMEWORK
1. Intellectual Capital: Economic Theory and Analysis Jorgen Mortensen	3
2. Intangible Resources and Competitiveness: Towards a Dynamic View of Corporate Performance Ahmed Bounfour	17
3. Making Intangibles Visible: The Value, the Efficiency and the Economic Consequences of Knowledge Gunnar Eliasson	42
4. Accounting for Intangibles: Issues and Prospects Graham Vickery	72

PART II	INTANGIBLES: IMPACT ON SECTORS AND ENTERPRISES	
5.	The Adaptive Capacity of the Firm as a Key to European Competitiveness John Kay	103
6.	Intangible Assets and the Competitiveness of European Industries Michael Peneder	117
7.	Intangible Assets and Service Sectors: The Challenges of Service Industries Ian Miles and Mark Tomlinson	154
8.	Discussion Lionel Fontagné	187
9.	Tangible and Intangible Investment and Economic Performance: Evidence from Company Accounts Mary O'Mahony and Michela Vecchi	199
10.	Research and Development, Innovation and Corporate Performance in the Chemical Industry: A Case Study Alfonso Gambardella, Walter García-Fontes and Gérald Petit	228
11.	Discussion Christian Huveneers	251
PART III	INTANGIBLES: ANALYSIS OF INPUTS	
12.	Human Capital Stock and Productivity: The Case of Dutch Manufacturing Firms Martin Boon	259

13.	Patents and Trademarks as Indicators of International Competitiveness: The VAR versus the Hysteresis Approach	273
14.	Research and Development as a Source of Technological Change	297
	Dominique Guellec	
15.	Education and Information Society	309
	Jacques Lesourne	
16.	Discussion	316
	Elisabeth Waelbroeck-Rocha	
17.	Conclusion	
	Pierre Buigues, Alexis Jacquemin and Jean-François Marchipont	320
	INDEX	331

List of Figures

2.1	Four dimensions of competitiveness	27
2.2	Intellectual capital is at the heart of the MIR scope	28
2.3	The three types of value within companies	28
2.4	Internal processes for value-added services	30
2.5	The architecture of management of intangible resources (MIR)	36
4.1	Investment in tangibles and knowledge-related intangibles	74
4.2	Knowledge-based industry and services	77
4.3	Exports in high-technology industries	78
4.4	ICTs	79
4.5	Human resources	80
6.1	Intangible assets and competitive strategy: deviation of mean number of entries (%)	123
6.2	Unit values in EU trade: 1997 in ECU per kg	129
6.3	Standard deviation of unit values in the EU 1996	131
6.4	Aggregate labour productivity: EU-Japan-USA 1997 in 1000 ECU	136
6.5	Intangibles and labour productivity: factor intensities, shares of skilled labour	141
6.6	The dynamics of value added shares in the EU15, Japan and the USA	143
6.7	Relative similarity in value added shares across industries 1997: labour skills	146
6.8	Mapping European specialisation (I): value added shares by skill types 1997	146
6.9	Relative similarity in value added shares across industry types: factor inputs	149
6.10	Value added shares by skill types and factor inputs 1997	150

7.1	A classification and impressionistic mapping of services	161
7.2	Service 'clusters' from UK IO data: overlapping clusters in services	172
7.3	Selected services' technology related expenditures	179
7.4	Classification of innovation stances of Italian services from innovation survey data	180
9.1	Advertising expenditure and R&D expenditure as a proportion of GDP in the five countries	201
10.1	Chemical industry indicators, EU	230

List of Tables

1.1	Capital stock and capital/output ratio in the United States 1929-1990	8
2.1	Examples of intangible resources considered in the resource and capabilities views	22
2.2	Examples of companies implementing an approach for Intellectual Capital and Knowledge Management	24
2.3	Elements of Intellectual Capital – example of a taxonomy used	25
2.4	Example of calculation of present performance indicators, for three dimensions of competitiveness	32
2.5	Estimation of 10 major intangible assets for an SME	34
3.1	The statistical accounts of the knowledge-based information economy	51
3.2	Actors in the competence bloc	55
3.3	The complete balance sheet of a firm (9 and 17 Swedish firms)	61
4.1	Nature of intangible assets recognised: early 1990s	93
4.2	Measurement of research and development	94
6.1	Non-parametric tests for significant differences in unit values 1997: factor inputs	133
6.2	Non-parametric tests for significant differences in unit values 1997: skill types	134
6.3	Non-parametric tests for significant differences in labour productivity and wages 1997: factor inputs	137
6.4	Non-parametric tests for significant differences in labour productivity and wages: skill types	138
6.5	Value added shares in total manufacturing 1997 (%): skill types	144

6.6	Value added shares in total manufacturing 1997 (%): factor inputs	147
7.1	Occupations in UK services, 1991, OECD dataset	163
7.2	Services in UK ranked by HSWC intensity	164
7.3	Three countries' data on the share of high-skilled employees in the workforce of service sectors	165
7.4	Services' use of intermediate services and labour, UK 1990	168
7.5	'Clusters' of services from factor analysis 1990	171
7.6	OECD data on services' share of business R&D expenditures, c 1993	174
7.7	UK services technology activities, CIS2 data (1997)	177
7.8	Employment by non-national enterprises in EU services (%)	184
8.1	Average technological intensity for major industrialised countries (%), 1990-93	191
8.2	Share of high tech products (OECD-Eurostat list) in EU15 trade by NACE three-digit position, 1996	192
8.3	Revealed comparative advantage by technological level and by position on the quality ladder, Germany and United Kingdom, 1996	196
9.1	Pooled regressions with interactive dummies (base category: United States)	211
9.2	Pooled regressions with manufacturing and non-manufacturing dummies (base category: non-manufacturing)	212
9.3	Profitability rate regression (base category: United States)	214
9.4	Profitability ratio in the manufacturing and non-manufacturing sector	215
9.5	The chemical sector	216
9.6	Econometric results: machinery sector	218
9.7	Econometric results: business services	219
9.A.1	Econometric results: panel methods	226
9.A.2	Econometric results: GMM estimation	227

10.1	Firms with highest 1996 market values	234
10.2	Average annual growth rate of sales 1990-96 (%), by sector	235
10.3	Average profitability 1996 (%), by sector and origin of firm	235
10.4	Average stock of patent by firm, by sector	236
10.5	Average R&D intensities (1990-1996), by sector	237
10.6	External growth strategies (average numbers by firm, 1990-96), by sector	238
10.7	Definition of variables used in the regressions	239
10.8	Market value in chemicals, 1990-1996 – OLS	242
10.9	TFP in chemicals, 1991-1996 – OLS	245
10.10	Net profits over sales in chemicals, 1991-1996 – OLS	247
12.1	Summary statistics	263
12.2	Estimates of the gross output elasticity with respect to human capital	268
12.3	Estimates of the value added elasticity with respect to human capital	269
13.1	Export-shares, relative unit labour cost, relative R&D intensities, patent shares and trademark shares in manufacturing industry in twelve OECD countries	281
13.2	Results of the co-integration analysis of eleven OECD countries	286
13.3	Long-run competitiveness (C) and labour cost (W) equations for seven OECD countries	287
13.4	First difference regression results for OECD export shares (1970-1995)	292
13.A.1	Results of the (Augmented) Dickey-Fuller unit root tests	295
14.1	Growth of R&D expenditures in the business sector: average annual growth rate at 1990 GDP prices	299
14.2	Estimated results	301
14.3	Average results from available estimates of internal rate of return to R&D at the industry level	306
17.1	Tangible versus intangible activities and market structure	323
