List of Principal Authors viii

Preface xi

SECTION I: VIRAL AETIOLOGY

1 Mechanisms of hepatitis B virus replication
   M. Nassal 3

2 Modulation of hepatitis B virus infection by viral and cellular mechanisms
   T. Heise, M. Dandri, J. Petersen, A. Rang, M.R. Burda and H. Will 23

3 Subgenomic hepatitis C virus replicons: a novel system to study replication and pathogenesis in cell culture
   V. Lohmann, F. Görner, J.O. Koch and R. Bartenschlager 34

4 Modulation of intracellular signalling pathways and therapeutic response by hepatitis C virus
   M.J. Korth, S.-L. Tan and M.G. Katze 45

SECTION II: IMMUNOPATHOGENESIS

5 Cellular immune response in chronic hepatitis C
   B. Rehermann 57

6 Humoral mechanisms in the pathogenesis of chronic hepatitis
   J. Herkel, S. Kanzler and A.W. Lohse 67
CONTENTS

7 Unique regulation of the hepatic immune response by a new antigen-presenting cell type: the sinusoidal endothelial cell of the liver
P.A. Knolle, J. Ohl and A. Limmer

SECTION III: CELL DEATH AND REGENERATION

8 Regulation of programmed cell death in chronic liver disease – the CD95 (APO-1/Fas) gene is a DNA-damage-inducible p53 regulated death receptor gene
M. Müller, A. Kairat, S.L. Friedman, P.R. Galle, T. Schilling, M. Oren, W. Stremmel and P.H. Krammer

9 Mitoinhibition and apoptosis-induction by TGF-β in liver disease
A.M. Gressner and S. Dooley

10 Hepatic regeneration

11 EGF-receptor and c-MET: cross-talk between the two growth factor receptors mediated by STAT proteins in human hepatocytes

SECTION IV: FIBROGENESIS

12 Cellular sources of liver fibrosis
S.L. Friedman

13 Cytokine regulation in liver fibrogenesis
M. Pinzani

14 The role of tissue inhibitors of metalloproteinases (TIMPs) in the pathogenesis of liver fibrosis
M.J.P. Arthur

15 A novel tissue inhibitor of metalloproteinases (TIMP-1) antagonist neutralizes TIMP-1 in liver cells
E. Roeb, I. Behrmann, J. Grötzingner, B. Breuer, S. Matern

16 Serum markers and therapeutic approaches to fibrosis
D. Schuppan, M. Bauer, C. Herold, E.G. Hahn
SECTION V: HEPATOCCARCINOGENESIS

17 Hepatitis B virus and hepatocarcinogenesis: viral factors and molecular genetics 199
   M.A. Buendia, C.-A. Renard, O. Terradillos, T. Pollicino and Y. Wei

18 Growth factors and cell cycle regulation in hepatocarcinogenesis 208
   S.S. Thorgeirsson

19 Hepatitis C virus-induced hepatocarcinogenesis 214
   J.R. Wands

SECTION VI: THERAPY

20 Chronic hepatitis type B and C: recent progress in antiviral therapy 229
   C. Jochum and G. Gerken

21 Treatment of autoimmune hepatitis 236
   A. Schüler, M.P. Manns

22 Transplantation in chronic hepatitis and its consequences 242
   U. Dahmen, O.R. Dirsch and C.E. Broelsch

23 Gene therapy of viral hepatitis and its sequelae 255

Index 269
