ALZHEIMER’S DISEASE
A COMPRENDIUM OF CURRENT THEORIES

Editors
ZAVEN S. KHACHATURIAN AND M.-MARSEL MESULAM

Conference Organizers
KRA, INC.; KHACHATURIAN, RADEBAUGH & ASSOCIATES, INC.,
AN INTERNATIONAL CONSULTING GROUP ON ALZHEIMER’S DISEASE;
AND PROFESSIONAL POSTGRADUATE SERVICES®,
A DIVISION OF PHYSICIANS COMMUNICATIONS GROUP

This volume is the result of a conference entitled Towards a Comprehensive Theory for Alzheimer’s Disease held on April 30 – May 2, 1999 in Orlando, Florida.

CONTENTS

Preface. By ZAVEN S. KHACHATURIAN AND M.-MARSEL MESULAM .......................... ix

Part I. Theories on Structural Changes: Protein Synthesis,
Aggregation, and Degradation

A. Pros and Cons of Amyloid

Genetic Factors in the Genesis of Alzheimer’s Disease. By P.H. ST GEORGE-HYSLOP .......................................................... 1

A Very Incomplete Comprehensive Theory of Alzheimer’s Disease. By PETER
DAVIES ............................................................................. 8

Toward a Comprehensive Theory for Alzheimer’s Disease. Hypothesis:
Alzheimer’s Disease Is Caused by the Cerebral Accumulation and
Cytotoxicity of Amyloid β-Protein. By DENNIS J. SELKOE ................. 17

The Pathogenesis of Alzheimer’s Disease: Is Amyloid β-Protein the Begin-
ning or the End? By BRUCE A. YANKNER ........................................... 26

Pathways to Primary Neurodegenerative Disease. By JOHN HARDY ............ 29

Arson: Tracking the Culprit in Alzheimer’s Disease. By MARK A. SMITH,
JAMES A. JOSEPH, AND GEORGE PERRY ........................................ 35

Synaptic Structure and Function in Transgenic APP Mice. By
KAREN HSIAO ASHE ............................................................. 39
B. Cytoskeleton Proteins and Synapses

A Plasticity-Based Theory of the Pathogenesis of Alzheimer's Disease. By M.-MARSEL MESULAM ........................................ 42
Vulnerability of Select Neuronal Types to Alzheimer's Disease. By HEIKO BRAAK, KELLY DEL TREDICI, CHRISTIAN SCHULTZ, AND EVA BRAAK ...... 53
"Fatal Attractions" of Proteins: A Comprehensive Hypothetical Mechanism Underlying Alzheimer's Disease and Other Neurodegenerative Disorders. By JOHN Q. TROJANOWSKI AND VIRGINIA M.-Y. LEE .............. 62
The Role of Synaptic Proteins in Alzheimer's Disease. By ELIEZER MASLIAH .. 68
The Long Reach of Evolution and Development: Effects on the Alzheimer Brain. By KENNETH S. KOSIK ........................................... 76

Part II. Theories on Functional Changes

A. Risk Factors: ApoE and Estrogen

Apolipoprotein E and Alzheimer's Disease: A Role in Amyloid Catabolism. By JUDES POIRIER ....................................................... 81
Apolipoprotein E and Alzheimer's Disease. By WARREN J. STRITTMATTER .... 91
Estrogens and Estrogen-Like Non-Feminizing Compounds: Their Role in the Prevention and Treatment of Alzheimer's Disease. By PATTIE S. GREEN AND JAMES W. SIMPKINS .................................................. 93
Alzheimer's Disease and Some Speculations about the Evolution of Its Modifiers. By ROBERT M. SAPOLSKY AND CALEB E. FINCH .................. 99

B. Trophins, Apoptosis, Proteases, and Inflammation

Comprehensive Theory of Alzheimer's Disease: The Effects of Cholesterol on Membrane Receptor Trafficking. By CASEY LYNCH AND WILLIAM MOBLEY ......................................................... 104
The Brain's Microenvironment, Early Functional Loss, and the Conversion to Alzheimer's Disease. By CARL W. COTMAN AND AILEEN J. ANDERSON ... 112
A "Protease Activation Cascade" in the Pathogenesis of Alzheimer's Disease. By RALPH A. NIXON ................................................. 117
A Perspective on Inflammation in Alzheimer's Disease. By JOSEPH ROGERS AND YONG SHEN ...................................................... 132

Part III. Theories on Energetics: Circulation, Metabolism, and Oxidation

Existing Data Suggest That Alzheimer's Disease Is Preventable. By MARK P. MATTSON ........................................................................ 153
Oxidative Stress Leading to Loss of Critical Proteases in Alzheimer's Disease: An Alternative View of the Etiology of AD. By JOHN M. CARNEY .................................................. 160
Oxidative Metabolism. By M. FLINT BEAL ....................................... 164
The Mitochondrial Spiral: An Adequate Cause of Dementia in the Alzheimer’s Syndrome. By John P. Blass

Part IV. Epilogue

Index of Contributors

Financial assistance was received from:

- Bayer
- Eisai
- Hoechst Marion Roussel
- Pfizer
- Roche

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
