Contents

Foreword ........................................... v
Preface ........................................ vii
Acknowledgments ................................. ix

1 Hearing and Hearing Loss in Children ........ 1
   Hearing Loss—The Hidden Disability ........ 2
   How We Hear .................................. 4
   Nature of Sound ................................ 6
   Nature of Hearing Loss ......................... 7
   When Does Hearing Loss in Children Become a Disability? ........ 11
   Acoustics of Speech ............................ 15
   Effect of Hearing Loss on Speech and Language ........ 19
   Degrees of Hearing Impairment ................. 20
   Defining Hearing Loss ......................... 23
   Children With Unilateral Deafness ............... 23
   The Malingering Child ......................... 25
   Parent Management ............................ 26
   Economic Burden of Deafness .................... 28

2 The Auditory System ........................... 33
   Origins and Evolution of the Hearing Mechanism ........ 34
   Development of the Ear ......................... 37
   Physiology of Hearing ......................... 44
   Anatomy of the Ear Through Temporal Bone Study .......... 55

3 Otitis Media .................................. 65
   Economic Considerations ...................... 67
   Ear Disease in Native Populations ............ 69
   Pathophysiology of Otitis Media ............... 70
   Treatment of Otitis Media ..................... 71
   AHCPR Recommendations ....................... 74
   Complications Associated With Otitis Media ........ 75
   Middle Ear Effusion (MEE) in Neonates .......... 79
   Speech and Language Development ............ 80
   Management of the Child With Otitis Media ....... 84
   Recommended Audiologic Guidelines ............ 88
# 4 Medical Aspects of Hearing Loss
