

CONTENTS

List of Boxes, Figures, and Tables	ix
1. Introduction	1
Methods of Knowledge Integration	3
Embedded Case Studies for Complex, Contextualized Problems	3
Historical Landmarks	4
Part I	
Case Study Design and Synthesis	
2. Types of Case Studies	9
Design	9
Motivation	11
Epistemological Status	11
Purpose	12
Format	12
Data Collection and Methods of Knowledge Integration	13

3. The Use of Case Studies in Different Disciplines	15
Neuropsychology	15
Educational Sciences	19
Law	22
Business	23
Environmental Sciences	25
4. The Architecture of Knowledge Integration in Embedded Case Studies	29
The Architecture of Embedded Case Studies	30
Strategies of Synthesis	31
The Brunswikian Lens Model	36
Types of Knowledge Integration	40
5. The ETH-UNS Case Study Zurich North	45
The Zurich North Case	46
Case Prospects and History	48
Understanding the Case	52
Faceting the Case for Embedded Case Design	55
Constraints of the Study	56
Organizing the Study	57

Part II Methods of Knowledge Integration

6. Overview	63
7. The Methods in Brief	65
8. How to Choose the Right Method	71

Part III The Methods in Detail

9. Formative Scenario Analysis	79
The Rationale	79
The Method in Detail	84

10. System Dynamics	117
The Rationale	117
The Method in Detail	127
11. Multi-Attribute Utility Theory	143
The Rationale	143
The Method in Detail	150
12. Integrated Risk Management	175
The Rationale	175
Incorporating Different Perspectives	184
The Method in Detail	186
13. Mediation: Area Development Negotiations	197
The Rationale	197
The Method in Detail	207
14. Future Workshops	225
The Rationale	225
The Method in Detail	232
15. Experiential Case Encounter	241
The Rationale	241
The Method in Detail	244
16. Synthesis Moderation and Group Techniques	247
The Rationale	247
The Method in Detail	253
17. Material Flux Analysis	271
The Rationale	271
The Method in Detail	277
18. Life Cycle Assessment	285
The Rationale	285
The Method in Detail	291
19. Bio-Ecological Potential Analysis	305
The Rationale	305
The Method in Detail	314

Part IV
Validation Perspectives

20. The Validation of Embedded Case Studies	331
The Rationale	331
Validation of Embedded Case Studies: A Practical View	347
References	351
Index	379
About the Authors	391

LIST OF BOXES, FIGURES, AND TABLES

Boxes

Box 2.1	Using Multiple Sources of Data and Evidence	14
Box 3.1	Novelistic Case Descriptions for Exploratory, Descriptive, and Explanatory Case Studies	17
Box 3.2	Synthesis Moderation	24
Box 3.3	Groundbreaking Case Studies for Ill-Defined Problems	26
Box 5.1	Experiential Case Encounter	54
Box 7.1	Types of Knowledge Integration in Case Study Methods	68
Box 9.1	Sufficiency in Case Modeling and Evaluation	83
Box 9.2	Dependent and Independent Variables	87
Box 9.3	Key Definitions in Formative Scenario Analysis	89
Box 9.4	Structuring the Case Through an Impact Matrix	96-97
Box 9.5	Novelistic Case Description of the Scenario <i>Polarization</i> of the Zurich North Shell Scenarios	111
Box 9.6	Cross-Impact Analysis: Can We Access the Probability of Future Developments of a Case?	112

Box 10.1	The General and the Specific: System Dynamics in Case Analysis	121
Box 10.2	Key Definitions for System Dynamics and Its Relation to Formative Scenario Analysis	134
Box 10.3	Causal Feedback Loops	136
Box 11.1	Formal Definition of the Multi-Attribute Utility Situation	151
Box 11.2	Techniques of Inquiry	158-159
Box 11.3	The Relation Between Evaluation and Utility	166
Box 11.4	Special Features of Multi-Attribute Software	167
Box 12.1	Formal Definition of Risk Situations	176
Box 12.2	Risk Functions	180-181
Box 12.3	How to Measure Risk and Subjective Probabilities	194-195
Box 13.1	Malignant and Benign Conflict Structures	203-204
Box 13.2	Key Definitions for Decision-Theoretic Situation Analysis	205
Box 13.3	Solutions for Malignant Conflicts	224
Box 14.1	Intuitive and Analytic Modes of Thought	233
Box 16.1	Moderator Responsibilities in Embedded Case Studies	252
Box 16.2	On the Role of Goal Formation	253
Box 16.3	Focus Groups	263
Box 18.1	Life Cycle Inventory Calculation	295
Box 19.1	Basic Biocybernetic Rules	313
Box 19.2	The Evaluation of Well-Structuredness	324-325
Box 20.1	Variants of Validity	336-337
