

## Table of contents

### *Introduction*

### ***Part I: Tariff preferences and protection policies in the industrialised countries***

#### **Chapter One: The theory of tariff preferences**

- I. The effects of introducing a tariff preference: a theoretical analysis model
- II. Behaviour of the components that make up the model
  1. The exporter of the beneficiary country
  2. The importer from the preference-giving country
  3. The exporter from the non-beneficiary country
  4. The producer from the preference-giving country
  5. The government of the preference-giving country
- III. Discussion on the assumptions of the model and the type of analysis selected
  1. Implicit assumptions
  2. The limitation of the preferential treatment to one single product
  3. The characteristics of the product receiving the preferential treatment
  4. The limitations of the constituent parts of the model
  5. Tariff levels
  6. The short-term analysis
  7. The partial-equilibrium analysis
- IV. “Effective protection” and its incidence within the GSP
  1. The theoretical question
  2. Tariff escalation in the industrialised countries
  3. The limitations of the quantitative estimates

#### **Chapter Two: Protection in the industrialised countries and the potential of the GSP**

- I. Motives and patterns of protectionism in the industrialised countries
- II. Protection in the agriculture sector
- III. The reduction in tariff protection in the industrial sector
- IV. The persistence of tariff escalation
- V. The incidence of non-tariff barriers
- VI. Sensitive and semi-sensitive products
- VII. A few preliminary conclusions on the scope of the GSP

### ***Part Two. The international economic context and the Generalized System of Preferences***

#### **Chapter Three. The changes in the international economy from the end of the sixties up to the present day**

- I. The years leading up to the GSP
- II. From the non-convertibility of the dollar to the second oil shock
- III. From the crisis of 1980 until the reunification of Germany
- IV. The nineties, a decade of highly significant changes

## **Chapter Four. Changes in the structure of international trade since the introduction of the GSP**

- I. The changes in country participation in world trade
- II. Changes in the product-related composition of world trade
- III. Factors which lead to changes in the structure of international trade

### ***Part Three: The GSP in operation***

## **Chapter Five. The subject matter of the GSP**

- I. The components which are common to the whole system
  1. Beneficiary countries
  2. Products included
  3. Preference margins
  4. Escape clauses
  5. Clauses aiming at preventing a concentration of benefits among a few countries
  6. Special treatment for the least developed countries
  7. Rules of origin
- II. The main limitations of certain schemes
  1. Administration of the GSP and the national schemes
  2. Criteria for granting or losing the status of beneficiary
  3. The exclusion of products and the treatment given to sensitive products
  4. "Graduation" as a mechanism for redistributing the benefits of the system
  5. Criteria for establishing and administering the ceilings and safeguards
  6. The new conditions imposed and the additional benefits of some schemes
  7. The erosion of the margins of preference

## **Chapter Six. The results of the GSP**

- I. Methods of analysis of the GSP
- II. The overall results of the GSP
- III. The results of the implementation of the different schemes
  1. European Union
  2. United States
  3. Japan
  4. Canada
  5. Switzerland
  6. Norway
- IV. Beneficiary countries and the GSP

## **Chapter Seven. The future of the GSP**

- I. The GSP, expectations and realities
- II. Is there a future for the GSP?

## **Conclusions**
