<i>List of Figures</i>	xi
1. Introduction	1
Making sense of the internet	2
That's a nice story, but so what?	6
Supercomputers	9
The basic premise	12
Back to the future of the internet	14
The plan of the book	16
A few disclaimers	17
References and further reading	19
2. Where do new technologies come from?	21
Television	22
The drivers of innovation: demand pull and supply push	24
Demand pull	26
Computers, scientific instruments, and television (again)	32
Science, technology, and patterns of innovation	35
A digression on technological trajectories	42
Supply push in a nutshell	45
Product variety at the birth of markets	46
More stories: e-grocery businesses and internet service provision	48

viii Contents

The role of demand, again	52
Two caveats	55
And so . . . ?	56
References and further reading	58
3. The structure of new markets	61
Automobiles and the Detroit miracle	62
More stories	67
Some stylized facts	72
The challenge	74
Product variety and entry	75
A digression on product characteristics	78
Cars (again) and other illustrations	80
Getting back to the point	83
Two further questions	85
So, what's the rush?	86
The dot.com bubble	90
And, finally, where do these guys come from?	91
Medical diagnostic imaging and other stories	94
And so . . . ?	96
References and further reading	97
4. Developing the new product design	101
Typewriters	102
The importance of making a choice	105
What exactly is a dominant design?	111
Computer operating systems	113
So, how many designs will dominate?	117
Two more complications	120
Cars (again)	123
Dominant designs and niches	124
The problem of choosing a dominant design	127

Whatever happened to quadrophonic sound?	129
So, how does it actually happen?	132
Satellite television, video cassette recorders, and other stories	134
Does every market go through this process?	138
And so . . . ?	142
References and further reading	143
5. The growth of the market	145
Mobile phones	146
More generally	148
The delights of logistical growth	151
A red herring	154
What are they waiting for?	161
Getting comfortable with genetically modified food and baked beans	163
Climbing on the bandwagon	167
A digression: consumer heterogeneity	169
Facing up to failure	174
Another digression: the old product almost always fights back	178
A final observation: shakeouts	184
Pulling it all together	186
References and further reading	188
6. Into the future	191
First movers and first mover advantages	192
The changing basis of competition	199
Getting locked in	205
So, where does the next new technology come from?	209
References and further reading	212
<i>Index</i>	215

List of Figures

2.1. A technological trajectory	41
2.2. An S-curve	44
3.1. Entry and exit into the US automobile industry	64
3.2. Number of automobile producers and total industry sales	65
3.3. The number of semi-conductor producers and total sales (NOF: number of firms)	70
3.4. Several semi-conductor populations	71
3.5. Net entry over an industry life cycle	73
5.1. The diffusion of various new products during the twentieth century	150
5.2. Another S-curve	152
5.3. Two exponential growth paths	152
5.4. Total sales of several generations of semi-conductors	179
5.5. The production of wooden and iron ships	181
5.6. Asymmetric S-curves	183
