<i>List of Figures</i>	<i>page</i> xiv
<i>Preface</i>	xvii
1 Introduction	1
1.1 Two Theorems	2
1.2 Market Failure	4
1.3 Information and the Second Theorem	11
1.4 The Usefulness of the Two Theorems	11
1.5 The Role of the Government	12
Markets	
2 The Exchange Economy	17
2.1 The Edgeworth Box	18
2.2 Pareto Optimality	22
2.3 Competitive Equilibrium	26
2.4 Markets	30
2.5 The Two Fundamental Theorems of Welfare Economics	35
2.6 Summary	38
<i>Questions</i>	39
3 An Algebraic Exchange Economy	41
3.1 Utility Functions	41
3.2 The Marginal Rate of Substitution	42
3.3 Pareto Optimal Allocations	43
3.4 Competitive Equilibrium	46
3.5 The Two Theorems	51
3.6 Conclusions	53
<i>Questions</i>	54
4 The Production Economy	57
4.1 Pareto Optimality	59
4.2 Competitive Equilibrium	64

4.3	An Example of Competitive Equilibrium	68
4.4	The Two Theorems	72
4.5	Conclusions	73
	<i>Appendix: An Example of Production Efficiency</i>	73
	<i>Questions</i>	77
5	Consumer and Producer Surplus	80
5.1	Margins and Totals	80
5.2	Surplus	82
5.3	The Welfare Cost of Intervention	84
5.4	Market Interactions	89
5.5	Conclusions	95
	<i>Appendix: Margins and Totals</i>	95
	<i>Questions</i>	97
Externalities		
6	Externalities and Negotiation	103
6.1	Negotiated Compensation	103
6.2	Why Doesn't Negotiation Occur?	108
6.3	Government Intervention	109
	<i>Questions</i>	112
7	Permit Trading	113
7.1	Environmental Pollution and Abatement	114
7.2	Direct Emissions Controls	114
7.3	Permit Trading	115
7.4	Discussion	120
	<i>Questions</i>	121
8	Renewable Common Property Resources	123
8.1	The Static Common Property Problem	123
8.2	The Dynamic Common Property Problem	127
8.3	Extinction	137
	<i>Appendix: An Algebraic Example</i>	139
	<i>Questions</i>	142
9	Co-ordination Failures	144
9.1	A Co-ordination Game	145
9.2	A Co-ordination Game with Uncertainty	147
9.3	Conclusions	151
	<i>Questions</i>	152
Public Goods		
10	Pure Public Goods	157
10.1	Optimal Provision of a Public Good	157
10.2	Voluntary Provision of the Public Good	162

10.3	Is Non-Excludability the Source of the Problem?	167
10.4	Conclusions	168
	<i>Questions</i>	169
11	Two Examples of Pure Public Goods	171
11.1	Knowledge	171
11.2	Income Redistribution	175
	<i>Questions</i>	184
12	Impure Public Goods	187
12.1	Club Goods	188
12.2	Variable-Use Public Goods	191
12.3	Summary	198
	<i>Questions</i>	198
13	The Link between Public Goods and Externalities	200
13.1	Interdependent Preferences	201
13.2	Indifference Curves	202
13.3	Pareto Optimal Allocations	205
13.4	A Public Good	206
13.5	A Good with a Positive Externality	210
13.6	A Good with a Negative Externality	213
13.7	Summary	214
	<i>Questions</i>	214
 Imperfect Competition		
14	Monopoly	219
14.1	Natural Monopoly	219
14.2	Rent-Seeking Behaviour	222
14.3	Conclusions	226
	<i>Questions</i>	226
15	Pricing Rules under Imperfect Competition	228
15.1	Marginal Cost Pricing	228
15.2	Undifferentiated Goods	229
15.3	Differentiated Goods	231
15.4	Summary	236
	<i>Appendix: Marginal Cost Pricing and Economic Efficiency</i>	237
	<i>Questions</i>	238
 Taxation and Efficiency		
16	Taxation	241
16.1	Is Lump-Sum Taxation Possible?	242
16.2	The Optimal Size of Government	252
16.3	Conclusions	254
	<i>Questions</i>	254

17	The Welfare Cost of Tax Interactions	256
17.1	A Robinson Crusoe Economy	257
17.2	Pareto Optimality	257
17.3	Competitive Equilibrium	258
17.4	Welfare Cost Calculations	265
17.5	Conclusions	271
	<i>Questions</i>	271
18	The Theory of the Second Best	272
18.1	Optimal Taxation	272
18.2	Natural Monopoly and the Ramsey Pricing Rule	282
18.3	Conclusions	287
	<i>Questions</i>	287

Asymmetric Information and Efficiency

19	Asymmetric Information	293
19.1	Adverse Selection	294
19.2	Moral Hazard	296
	<i>Questions</i>	300
20	Preference Revelation	304
20.1	Preference Revelation in a Simple Economy	304
20.2	The Groves–Clarke Mechanism	311
20.3	Preference Revelation in Practice	315
	<i>Questions</i>	316
21	Regulation of a Natural Monopoly	317
21.1	Natural Monopoly with a Role for Management	318
21.2	Full Information	319
21.3	The Consequences of Asymmetric Information	322
21.4	Adjusting the Menu	324
21.5	Conclusions	325
	<i>Appendix: Optimal Regulation under Asymmetric Information</i>	325
	<i>Questions</i>	331
22	Other Examples of Asymmetric Information	333
22.1	Health Care and Health Care Insurance	333
22.2	The Standard Debt Contract	336
22.3	Efficiency Wages	341
	<i>Questions</i>	344

Asymmetric Information and Income Redistribution

23	The Distribution of Income	349
23.1	Determinants of Income	350
23.2	Income and Welfare	359
23.3	Reasons for Income Redistribution	360
23.4	Policy Options	364
	<i>Questions</i>	365

24	The Limits to Income Redistribution	368
24.1	An Economy with Self-Selection	369
24.2	Redistributive Policies	370
24.3	Welfare and Pareto Efficient Taxation	375
24.4	Conclusions	378
	<i>Questions</i>	379
25	Redistributing Income through Tagging and Targeting	380
25.1	Tagging	380
25.2	Targeting	382
25.3	Conclusions	387
	<i>Questions</i>	388
26	The Role of Government in a Market Economy	390
26.1	Repair of Market Failures	390
26.2	Redistribution of Income	391
26.3	The Limits on Government Action	392
	<i>A Note on Maximization</i>	395
	<i>References</i>	405
	<i>Index</i>	409

List of Figures

2.1 An Edgeworth Box	page 19
2.2 Pareto Optimality in the Edgeworth Box	25
2.3 This Price is not Market-Clearing	28
2.4 This Price is Market-Clearing	30
2.5 Two Prices	31
2.6 Supply and Demand Curves	33
4.1 The Production Possibility Frontier	60
4.2 A Competitive Labour Market	67
5.1 An Example	81
5.2 Two Equilibria	82
5.3 The Effects of a Tax	86
5.4 The Effects of a Subsidy	89
5.5 The Welfare Cost of Taxes Imposed upon Complementary Goods	91
5.6 The Welfare Cost of Taxes Imposed upon Two Substitutes	93
5.7 Approximations of the Increase in Total Cost when Output Rises from 2 to 10	96
6.1 Externalities and Property Rights	105
6.2 The Pigouvian Tax	111
7.1 The Permit Market	118
8.1 The Static Problem	124
8.2 The Derivation of the Steady-State Locus	130
8.3 The Steady-State Locus	131
8.4 The Iso-Profit Map	131
8.5 The Steady State under Competition	132
8.6 The Steady State under Myopic Management	133
8.7 The Steady State under Far-Sighted Management	135
8.8 Growth and Net Natural Additions	138
8.9 The Possibility of Extinction	138
8.10 The Evolution of Stock and Catch under Alternative Regimes	141
9.1 The Co-ordination Game	146
10.1 A Pareto Optimal Allocation	158

11.1	Utility and the Distribution of Income	178
11.2	The Utility Possibility Frontier	179
11.3	Best Response Functions and Nash Equilibrium	182
12.1	Optimal Membership of a Club of Given Size	189
12.2	Social Indifference Curves	193
12.3	The Marginal Costs and Benefits of Travel in a Symmetric Equilibrium	197
13.1	Indifference Curves in the Shibata Box	202
13.2	The Efficiency Locus in the Shibata Box	206
13.3	Income Expansion Paths	208
13.4	Nash Equilibrium	209
13.5	Nash Equilibria in the Presence of a Positive Externality	211
13.6	A Negative Externality	214
14.1	Natural Monopoly	221
15.1	Demand Curves for a Monopolistically Competitive Firm	235
16.1	Consumer Choice under a Lump-Sum Tax	246
16.2	Consumer Choice under Commodity Taxes	248
16.3	The Effects of a More Efficient Tax System	254
17.1	The Efficient Allocation	258
17.2	Equilibrium in the Presence of Commodity Taxes	264
17.3	The Welfare Cost of the Ale Tax	267
17.4	The Welfare Cost of a Bread Tax Imposed in the Presence of an Ale Tax	269
19.1	Equilibrium in the Robbery Game	299
21.1	Price and Effort	322
22.1	The Relationship between the Fixed Payment and the Lender's Expected Return	339
22.2	Labour Market Equilibrium under Full and Asymmetric Information	343
23.1	Bargaining between a Firm and a Union	356
24.1	Incomes of the High- and Low-Wage Workers as the Tax Varies	371
24.2	The Relationship between the Tax and the Subsidy	373
24.3	High-Wage Employment under Fixed and Endogenous Wages	374
24.4	Output under Fixed and Endogenous Wages	375
