

CONTENTS

Preface	v
<i>Part I: Time Series Methodology</i>	
Heavy-tailed and Non-linear Continuous-Time ARMA Models for Financial Time Series <i>P.J. Brockwell</i>	3
Nonlinear State Space Model Approach to Financial Time Series with Time-Varying Variance <i>G. Kitagawa and S. Sato</i>	23
Nonparametric Estimation and Bootstrap for Financial Time Series <i>J.-P. Kreiß</i>	45
Comparison of Two Discretization Methods for Estimating Continuous-Time Autoregressive Models <i>H. Tsai and K.S. Chan</i>	68
A Note on Kernel Estimation in Integrated Time Series <i>Y.-C. Xia, W.K. Li and H. Tong</i>	86
<i>Part II: Long Memory and Value at Risk</i>	
Stylized Facts on the Temporal and Distributional Properties of Absolute Returns: An Update <i>C.W.J. Granger, S. Spear and Z.-X. Ding</i>	97
Volatility Computed by Time Series Operators at High Frequency <i>U.A. Müller</i>	121
Missing Values in ARFIMA Models <i>W. Palma</i>	141
Second Order Tail Effects <i>C.G. de Vries</i>	153
<i>Part III: Volatility</i>	
Recent Developments in Heteroskedastic Time Series <i>N.H. Chan and G. Petris</i>	169
Bayesian Estimation of Stochastic Volatility Model via Scale Mixtures Distributions <i>S.T.B. Choy and C.M. Chan</i>	185

On a Smooth Transition Double Threshold Model <i>Y.N. Lee and W.K. Li</i>	205
Testing GARCH versus E-GARCH <i>S. Ling and M. McAleer</i>	226
 Part IV: Forecasting	
Interval Prediction of Financial Time Series <i>B. Cheng and H. Tong</i>	245
A Decision Theoretic Approach to Forecast Evaluation <i>C.W.J. Granger and M.H. Pesaran</i>	261
Learning and Forecasting with Stochastic Neural Networks <i>T.L. Lai and S.P.-S. Wong</i>	279
 Part V: Applications	
The Overreacting Behavior of Real Exchange Rate Dynamics <i>Y.-W. Cheung and K.S. Lai</i>	303
Portfolio Management and Market Risk Quantification Using Neural Networks <i>J. Franke</i>	319
Optimal Asset Allocation under GARCH Model <i>W.C. Hui, H. Yang and K.C. Yuen</i>	336
Statistical Modelling of the J-Curve Effect in Trade Balance: A Case Study <i>W.C. Ip, H. Wong, Z.J. Xie and Y.L. Liu</i>	347
Ruin Theory with Interest Incomes <i>H. Yang and L. Zhang</i>	355
Detecting Structural Changes Using Genetic Programming with an Application to the Greater-China Stock Markets <i>X.B. Zhang, Y.K. Tse and W.S. Chan</i>	370
