Introduction xi
Author’s Notes xii

1. Developmental Considerations 1
   Learning about normal child development 1
   Development stages 2
   The development of self-esteem 6
   Development in adulthood 6
   Family development 7
   Further reading 8

2. Causes of Child Psychiatric Disorders 9
   Genetic factors 9
   Intra-uterine disease and injury 10
   Brain disease and injury 11
   Temperamental factors 11
   Environmental factors 13
   Multifactorial causation 15

3. Classification of Child Psychiatric Disorders 16
   The American Psychiatric Association’s scheme 17
   The World Health Organization’s diagnostic scheme 18
   Summary 20

4. Epidemiology 21
   A classic study 21
   Subsequent studies 22
   Summary 23

5. Assessing Children and Their Families 24
   Family interviews 24
   Taking the history 31
   The developmental history 32
   Examining the child 33
   The physical examination 37
   Other sources of information 37

12. Specific Disorders of Development 103
   Speech and language problems and communication disorders 104
   Reading and spelling problems 105
   Problems with mathematics 106
   Developmental disorders of motor function 106
   Mixed specific developmental disorders 107

13. Schizophrenia and Other Psychoses of Childhood 108
   Childhood-onset schizophrenia 108
   Outcome 113
   Schizoaffective disorders 113
   Acute and transient psychotic disorders and brief psychotic disorder 114
   Toxic confusional and delirious states 114

14. Enuresis and Encopresis 116
   Enuresis 116
   Encopresis 118

15. Reactions to Stress 123
   Adjustment disorders 123
   Post-traumatic stress disorder 125
   Acute stress reaction and acute stress disorder 127
16. Other Psychiatric Syndromes
   Personality disorders
   Psychosexual problems
   Other psychosexual problems
   Tics and Tourette’s syndrome
   Stuttering
   Elective mutism/selective mutism
   The Kleine-Levin syndrome
   Episodic dyscontrol syndrome/intermittent explosive disorder
   Factitious illness by proxy

17. Mind-Body Relationships
   The influence of the body on the mind
   The effects of the mind on the body
   Psychosomatic considerations in child psychiatry
   Asthma
   Eating disorders

18. Infant Psychiatry
   Assessment
   Disorders of infants and young children
   Regulatory disorders
   Sleep disorders
   Feeding difficulties and failure to thrive
   Depression
   Aggressive behaviour disorders
   Treatment in infant psychiatry

19. Special Problems of Adolescence
   Prevalence of psychiatric disorders in adolescence
   Unresolved childhood disorders
   Disorders related to puberty and adolescence
   Adult-type disorders arising in adolescence
   Suicidal behaviour in adolescence
   Treatment approaches
   Outcome

20. Psychiatric Disorders in Mentally Retarded Children
   Prevalence of psychiatric disorders in the mentally retarded
   Clinical associations and causes of mental retardation
   Types of mental retardation
   Clinical management
   Treatment approaches
   Some other points about management
   Outcome
21. Child Abuse and Neglect 182
   Background 182
   Incidence 183
   Causes 184
   Other associations of abuse and neglect 185
   Clinical considerations 186
   The role of psychiatrists 188
   Some points about managing abusive and neglectful families 189
   Outcome 190

22. Treatment Approaches 191
   Treatment goals 191
   Individual psychotherapy 192
   Therapy and counselling with parents 194
   Family therapy 195
   Group therapy 196
   Behaviour therapy 196
   Pharmacotherapy 198
   Hypnosis and hypnotherapy 204
   Day treatment 205
   Inpatient and residential treatment 206
   Educational measures 207
   Speech and language therapy 207
   Removal from parental care 207
   Child psychiatric consultation and liaison 208

23. Prevention 209
   Variations in vulnerability 212
   Primary prevention methods 213
   Secondary prevention 215
   Tertiary prevention 216
   Conclusion 216
