1 Introduction 1
  1.1 Background 1
  1.2 Main points 6
  1.3 Organization of the book 8

2 Organizational innovations from the 1860s in the USA and Japan 12
  2.1 Introduction 12
  2.2 OIs in the USA up to World War II 12
  2.3 OIs in Japan up to World War II 18
  2.4 OIs in the USA after World War II 22
  2.5 Japanese OIs after World War II 25
  2.6 Japanese and American evolutions of firms and OIs: a brief comparison 30
  2.7 Conclusions 31

3 The role of OIs in the theory of economic growth 33
  3.1 Introduction 33
  3.2 Literature review about OIs 34
  3.3 OIs and TIs 46
  3.4 Inclusion of OIs in the production function 57
  3.5 Conclusions 62

4 Contribution of specific OIs to economic growth and the three axes of OIs 66
  4.1 Introduction 66
  4.2 American firm organization and economic growth 67
  4.3 Japanese firm organization and industrial growth 80
  4.4 The three axes of OIs 101
  4.5 Conclusions 108
## Contents

5 The process of firm operations: core of the atomic/systemic model of economic growth

5.1 Introduction 111
5.2 The system of four bio-socio-economic processes 112
5.3 Leading firms and sectors, and diffusion of OIs 131
5.4 An atomic/systemic model of economic growth 141
5.5 Conclusions 147

6 OIs and manufacturing sectors’ growth in the USA and Japan 152

6.1 Introduction 152
6.2 The period from the end of the 19th century to World War II 153
6.3 The period from the 1960s to the end of the 20th century 166
6.4 Conclusions 198

Appendix 6.1: Indices of real output in three-digit SIC sectors in the USA, 1963 to 1998 200
Appendix 6.2: List of manufacturing sectors on a three-digit basis with their code numbers 207

7 Empirical evidence on the links between industrial sectoral growth and the lean production system (JIT/QC) in the USA 210

7.1 Introduction 210
7.2 Implementation of the JIT and QC systems in the two countries 212
7.3 Quantitative evidence 218
7.4 Conclusions 252

Appendix 7.1: Transformation of the 459-sector data to 85-sector and 28-sector data 257
Appendix 7.2: Basic data for the 28 ISIC sectors in the USA, expressed as percentage 258
Appendix 7.3: The 85-sector database, USA, from 1987 to 1996 annual average growth rate, as percentage 260
Appendix 7.4: Stationary long-term coefficients and vectors V 263

8 Conclusions, limitations, implications 270

8.1 Introduction 270
8.2 Synthesis of the major conclusions 271
8.3 Limitations, omissions and future research 277
8.4 Implications and recommendations 284
8.5 Epilogue 286

6.13b Real output, annual percentage growth rates for the USA and Japan, 1977–86
6.13c Real output, annual percentage growth rates for the USA and Japan, 1987–98
6.14 TFP annual percentage changes 1960–80 for the USA and Japan
6.15 TFP annual percentage changes, two-digit sectors, 1960–70 and 1960–85, for the USA and Japan
6.16 Real output and TFP annual percentage changes, 1960–85, USA and Japan
6.17 TFP annual percentage changes, 1987–98, in Japan and the USA
6.18 Real output, annual percentage changes, 1987–98, for Japan and the USA
7.1 Chronology of implementation of JIT in the USA and Japan
7.2 From JIT/QC to industrial growth
7.3 USA, inventories to shipments ratio, 28 ISIC sectors
7.4a USA, sector 382, inventories to shipments ratio
7.4b USA, manufacturing total, inventories to shipments ratio, 1929–97
7.4c USA, sector 383, TFP, labour productivity, inventories to shipments ratio and unemployment (total USA), in percentage changes
7.5 USA TFP 28 SIC sectors, 1964–96
7.6 USA TFP versus other variables
7.7 USA TFP average NBER and UNIDO for 28 ISIC sectors
7.8 The links between theoretical concepts and quantitative analysis
Tables

1.1 Organizational entities and innovations historically 2
1.2 Average annual real growth rates of industrial production for some key periods in the USA and Japan, 1866–1996 4
2.1 Initial steps of quality control in Japan 29
3.1 Concepts related to the impact of OIs on economic growth 45
3.2 Technical innovations 49
3.3 Technological regimes (TIs oriented): links with OIs 54
4.1 Characteristics of the main production systems 81
4.2 Characteristics of focal factories 83
4.3 Comparison between the JIT/QC and non-JIT/QC systems 90
4.4 Comparison of original Fordism and JIT/QC 102
5.1 Examples of major leading firms 133
6.1 Sectoral productivity growth in the USA from 1899 to 1937 154
6.2 Sectoral growth in the USA (1899–1937, based on the sub-periods of Table 6.1) 156
6.3 Growth rates in real output from 1964 to 1998, industry differences 170
7.1 The quality paradigms 216
7.2 ASQ’ s membership 217
7.3 Simple cross-sector OLS regression results 233
7.4 Comparison between the three periods, TFP and other variables 235
7.5 Average rates of growth for 85 sectors 237
7.6 Definitions of variables 241
7.7 Results of the simple OLS and 2SLS regressions 246
7.8 The vectors V of selected VAR models 248
7.9 ECMs of the three VAR models 250
