Part 01

Introduction to information management

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	5
Introduction	6
Information in today's world	7
The information society	7
The information economy	8
The information age	9
Information in today's organization	10
Information overload	10
RESEARCH INSIGHT 1.1 <i>How much information?</i>	11
Using information to support processes	13
Using information to create value	14
■ MINI CASE STUDY 1.1 <i>Capital One creates value through information</i>	15
■ ACTIVITY 1.1 <i>Types of organizational information</i>	18
Fundamentals of business information management	18
What is business information management?	19
Information resources	20
Information quality	23
■ ACTIVITY 1.2 <i>Assessing information quality for the Lo-cost Airline Company</i>	24
The data-to-information transformation process	24
Systems theory	26
■ ACTIVITY 1.3 <i>Why are environment influences important?</i>	28
Information types and sources	28
Online information sources	28
■ ACTIVITY 1.4 <i>Smarter searching using Google</i>	30
The information lifecycle	31
Records management	32
Decision-making theory	33

❖ RESEARCH INSIGHT 1.2 <i>How people process information.</i>	34
From information to knowledge and from knowledge to information	35
DEBATE 1.1	39
■ CASE STUDY 1.1 <i>Knowledge management in financial services</i>	39
Technology resources	42
Software resources	42
Technology infrastructure resources	43
Information systems	43
E-business and e-commerce	44
Informatics	44
Does IT matter?	45
DEBATE 1.2	46
■ CASE STUDY 1.2 <i>Has corporate IT failed to deliver?</i>	47
People resources	49
Information orientation	50
Summary	50
Exercises	51
SELF-ASSESSMENT QUESTIONS	51
ESSAY AND DISCUSSION QUESTIONS	51
References	52
Further reading	54
Weblinks	54

Software for information management

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	57
Introduction	58
The main categories of software	59
Applications software	61
Categorizing applications by level of decision making	62
Enterprise applications	63
■ MINI CASE STUDY 2.1 <i>Enterprise applications improve information access at Minolta Europe</i>	66
Document and records management systems	67
Departmental applications	68
Personal productivity or office software	68
Groupware	69
■ ACTIVITY 2.1 <i>Options for using groupware to support student learning</i>	70
Database systems	71
Systems software	71
Operating systems software	72
Network software	75
Development software	76
Selecting appropriate software	76
The software selection process	76
Criteria for selecting software	77

■ ACTIVITY 2.2 <i>Selecting applications software for a small business</i>	78
The make-buy-or-rent decision	78
■ ACTIVITY 2.3 <i>On-demand computing</i>	80
Best-of-breed or single-vendor?	81
RESEARCH INSIGHT 2.1 <i>Single-vendor or best-of-breed?</i>	81
■ CASE STUDY 2.1 <i>Electricity, water, phone, IT., can IT become a utility?</i>	82
Open-source software	83
■ MINI CASE STUDY 2.2 <i>Munich makes the move to Linux</i>	84
DEBATE 2.1	85
■ ACTIVITY 2.4 <i>Selecting open-source software</i>	86
■ CASE STUDY 2.2 <i>Is open-source software a realistic choice?</i>	87
E-business applications	88
RESEARCH INSIGHT 2.2 <i>Online transaction costs</i>	89
■ MINI CASE STUDY 2.3 <i>Dabs.com profit from e-business</i>	92
E-business defined	92
E-business benefits and management issues	95
From the Internet to intranets and extranets	97
Intranet applications	97
■ MINI CASE STUDY 2.4 <i>A modern intranet for Ceva Santé Animale</i>	98
Intranet benefits and management issues	99
Extranet applications	100
■ MINI CASE STUDY 2.5 <i>Herman Miller puts the extranet first</i>	102
Extranet benefits and management issues	102
Web logs	103
Customer relationship management applications	104
■ MINI CASE STUDY 2.6 <i>Standard Life Bank justifies new data warehouse</i>	106
Supply chain management applications	107
■ MINI CASE STUDY 2.7 <i>Iceland brings its suppliers in from the cold</i>	109
Summary	110
Exercises	111
Self-assessment questions	111
Essay and discussion questions	111
References	112
Further reading	112
Weblinks	113

Technology for information management

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	115
Introduction	116
RESEARCH INSIGHT 3.1 <i>'From techno-speak to common speak'</i>	116
Technology infrastructure components	117
The client/server model	118
Types of client computer	120

Types of server computer	122
Computing architectures	123
■ CASE STUDY 3.1 <i>Why storage networks matter</i>	125
Selecting computer components	127
Selecting processors	128
Factors in microprocessor selection	128
Graphics and audio microprocessors	130
RESEARCH INSIGHT 3.2 <i>Moore's law</i>	130
Selecting memory devices	131
Factors in selection of RAM	132
■ ACTIVITY 3.1 <i>Understanding storage capacity</i>	132
Selecting permanent storage	134
Factors in selection of storage devices and media	136
■ ACTIVITY 3.2 <i>Selecting RAM, storage devices and media</i>	137
Selecting output devices	138
Monitors	138
Printers	139
Factors in selecting displays or monitors	140
Factors in selecting printers	140
Selecting input devices	141
Factors in selecting input devices	141
Introduction to network technology	142
Telecommunications channels	143
Different forms of guided media	143
Wi-Fi	144
Telecommunications components	144
Electronic data interchange (EDI)	145
Internet technology	146
The development of the Internet	147
What is the World Wide Web?	149
Internet standards – how does the Internet work?	150
Internet data transfer standards	150
Internet-related standards bodies	153
The HTTP protocol	153
Uniform resource locators (URLs)	153
HTML (Hypertext Markup Language)	154
Indexing, describing and referencing HTML documents	155
XML (eXtensible Markup Language)	157
Examples of XML applications	159
■ ACTIVITY 3.3 <i>The adoption of the Dublin Core by organizations</i>	161
■ MINI CASE STUDY 3.1 <i>Ancient stone helps create e-business standard</i>	162
■ ACTIVITY 3.4 <i>E-business standards</i>	165
The semantic web	165
The wireless Internet	166
SMS messaging	167
Interactive digital TV	168
■ CASE STUDY 3.2 <i>Online sales soar at easyJet</i>	169
Summary	172

Exercises	173
Self-assessment questions	173
Essay and discussion questions	173
References	174
Further reading	174
Weblinks	175

Part 02 STRATEGY

04 Information management strategy

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	179
Introduction	180
Why is an information management strategy needed?	181
■ MINI CASE STUDY 4.1 <i>Consequences of poor information strategy</i>	182
■ CASE STUDY 4.1 <i>Ten commandments for information management</i>	183
The relationship between strategies for managing information-related resources	185
Responsibility for information-related resources	185
Alternative relationships between strategies for managing information-related resources	187
RESEARCH INSIGHT 4.1 <i>How managers perceive information management</i>	188
DEBATE 4.1	191
Developing an information management strategy	191
The strategy process	191
Information management strategy issues	192
1 The Hawley Committee IM Guidelines	192
RESEARCH INSIGHT 4.2 <i>Information management guidelines from the Hawley Committee Report</i>	193
■ ACTIVITY 4.1 <i>Strategic issues of information management</i>	195
2 Orna's information policy and information audit	195
3 The Willard model of information resource management	196
Information management themes and approaches	197
IM theme 1: Information value	197
IM theme 2: Information quality (see Chapter 10)	199
■ ACTIVITY 4.2 <i>Assessing information quality of online resources</i>	200
IM theme 3: Information security (see Chapters 9 and 12)	201
IM theme 4: Legal and ethical compliance (see Chapter 12)	201
IM theme 5: Knowledge management (see Chapter 5)	202
IM theme 6: Technology support (see Chapters 2, 3 and 6)	202
IM management approach 1: Structuring the information management function	203
■ CASE STUDY 4.2 <i>A global information management strategy at GlaxoSmithKline</i>	204
IM management approach 2: Responsibilities	206
■ ACTIVITY 4.3 <i>Assigning responsibilities for information ownership at the Lo-cost Airline Company</i>	207

The chief information officer (CIO) role	208
DEBATE 4.2	208
RESEARCH INSIGHT 4.3 <i>The elusive CIO</i>	209
IM management approach 3: Information resource analysis	210
Information mapping	210
IM management approach 4: Information policy	211
IM management approach 5: Risk management	211
■ MINI CASE STUDY 4.2 <i>An example information policy from an SME</i>	212
■ ACTIVITY 4.4 <i>Evaluating information strategies at UK universities and colleges</i>	214
■ CASE STUDY 4.3 <i>Information management at GlaxoSmithKline – the Robin Hood connection</i>	215
Summary	217
Exercises	218
Self-assessment questions	218
Essay and discussion questions	218
References	218
Further reading	219
Weblinks	219

05 Knowledge management strategy

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	221
Introduction	222
Defining knowledge	223
Defining knowledge management	227
✎ RESEARCH INSIGHT 5.1 <i>Deadly sins of knowledge management</i>	230
■ ACTIVITY 5.1 <i>Defining knowledge management</i>	231
Knowledge management strategy	231
✎ RESEARCH INSIGHT 5.2 <i>How important is knowledge management to business?</i>	232
The knowledge audit	233
Define audit objectives	234
Identify ideal state	235
Define audit sample	235
Select audit assessment tools	236
■ ACTIVITY 5.2 <i>Using the ASHEN model</i>	236
Build profiles of employees	237
Develop a knowledge map	238
■ CASE STUDY 5.1 <i>Using social network analysis as part of a knowledge audit</i>	240
Develop a knowledge value chain to represent core knowledge processes	242
Determine key issues and conclusions	244
Discuss key findings in groups to test conclusions	244
Highlight good practice examples of knowledge management already in action in the organization	244
Knowledge management objectives, vision and mission	244

■ ACTIVITY 5.3 <i>Defining knowledge management objectives</i>	245
Strategy selection	245
Codification versus personalization	245
■ ACTIVITY 5.4 <i>Assessing knowledge management strategy approaches</i>	246
Explorer versus exploiter	247
Aggressive versus conservative	247
Technocratic versus economic versus behavioural	248
■ CASE STUDY 5.2 <i>Knowledge management strategy at the UK Department of Trade and Industry (DTI)</i>	248
Strategy options: knowledge management in action	250
Communities of practice	250
Competitive intelligence	253
Story and narrative management	254
Using information and communications technologies (ICT) to enable knowledge management	257
Matching ICT to knowledge management requirements	257
Intranets and extranets	257
Expertise databases and corporate yellow pages	258
Collaborative tools	259
Corporate portals	260
Customer relationship management (CRM) systems	261
Document management/Content management systems	261
E-learning	262
Roles and competencies	263
■ ACTIVITY 5.5 <i>Knowledge management roles and competencies</i>	265
Creating a knowledge sharing culture: rewards and incentives for knowledge management	265
■ ACTIVITY 5.6 <i>Debate: can a standard be developed for knowledge management?</i>	266
Summary	267
Exercises	267
Self-assessment questions	267
Essay and discussion questions	268
References	268
Further reading	270
Weblinks	270

06 Information systems strategy

Chapter at a glance • Objective • Learning outcomes • Management issues	273
Links to other chapters	273
Introduction	274
What is IS strategy?	275
IT governance	276
■ MINI CASE STUDY 6.1 <i>Philips benefits from COBIT IT governance</i>	278
Information systems strategy activities	279
Defining a process for IS strategy development	281
Long-term v. short-term scope of IS strategy	281

Top-down v. bottom-up IS strategy	282
DEBATE 6.1	283
❖ MINI CASE STUDY 6.2 <i>Test Valley Council IS Strategy 2002–2005</i>	283
■ ACTIVITY 6.1 <i>Evaluating different approaches to the IS strategy development process</i>	287
Responsibilities and controls for IS strategy	288
■ CASE STUDY 6.1 <i>Jean-Pierre Corniou of Renault shows how to bring business technology out into the open</i>	288
■ ACTIVITY 6.2 <i>Where should ultimate responsibility for IS lie?</i>	291
RESEARCH INSIGHT 6.1 <i>Does IS have a voice?</i>	292
❖ MINI CASE STUDY 6.3 <i>The incredible shrinking CIO</i>	292
The stages of IS strategy development	293
Strategic situation analysis	294
1 Internal organizational environment.	295
IS analytical tool 1: The 7S model	295
2 Internal IS environment	296
IS analytical tool 2: Stages of growth models	296
■ ACTIVITY 6.3 <i>Stage of growth and maturity models of IS strategy</i>	301
E-business adoption stages model	301
■ ACTIVITY 6.4 <i>Time travel using the Wayback machine</i>	303
IS analytical tool 3: IS applications portfolio	304
IS analytical tool 4: Internal value chain analysis.	304
3 External micro-environment.	306
IS analytical tool 5: Porter's five competitive forces model	306
■ ACTIVITY 6.5 <i>Evaluating the impact of the Internet on the five competitive forces</i>	307
External value chain analysis	307
■ MINI CASE STUDY 6.4 <i>Sainsbury's optimise value chain</i>	307
4 External macro-environment.	309
Social factors	310
Legal constraints	312
Economic	312
Political	312
Technological	312
Strategic objective setting	314
Critical success factors (CSFs)	314
The balanced scorecard	316
■ MINI CASE STUDY 6.5 <i>A sobering approach to improving IS at Booz Allen Hamilton</i>	316
Strategy definition	317
❖ RESEARCH INSIGHT 6.2 <i>What does IS alignment mean in practice?</i>	318
❖ DEBATE 6.2	319
IS portfolio management	319
■ MINI CASE STUDY 6.6 <i>IS portfolio management</i>	320
IS investment appraisal	323
IS services strategy	324
IS infrastructure strategy	325
■ CASE STUDY 6.2 <i>Supermarket Tesco sets out its infrastructure strategy</i>	325

Summary	327
Exercises	328
Self-assessment questions	328
Essay and discussion questions	328

Part 03 IMPLEMENTATION

07 Managing systems development

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	335
Introduction	336
Types of information systems project	338
■ MINI CASE STUDY 7.1 <i>The UK National Health Service project to develop an integrated care records service (ICRS)</i>	339
Project management goals	339
Approaches to building information management applications	343
■ ACTIVITY 7.1 <i>Choices in systems build</i>	344
DEBATE 7.1	345
■ MINI CASE STUDY 7.2 <i>Alstom replaces legacy systems with enterprise resource planning system</i>	345
The project management process	346
● RESEARCH INSIGHT 7.1 <i>Balance resourcing for IS projects</i>	346
Planning tools to support the project management process	347
Methodologies to support the project management process	349
The PRINCE2 methodology	349
Euromethod	350
British Standard 6079	350
The Dynamic Systems Development Method (DSDM)	351
COBIT IT governance framework	351
Systems analysis and design methodologies	351
The European Foundation for Quality Management (EFQM)	352
Organizing to support the project management process	352
■ CASE STUDY 7.1 <i>Reading Council implements the PRINCE2 project management methodology</i>	353
The systems development process	355
The waterfall model of systems development	356
Prototyping	357
The Dynamic Systems Development Method (DSDM)	359
The DSDM systems development framework	360
Timeboxing	361
● RESEARCH INSIGHT 7.2 <i>Rapid results teams</i>	362
Risk management	363
■ MINI CASE STUDY 7.3 <i>Risk management in the NHS</i>	365

DEBATE 7.2	367
Key activities in systems development	367
Systems initiation phase	367
Key activities of systems initiation	367
1 Produce feasibility study	367
2 Project plan	368
Typical problems of the initiation phase	368
Systems analysis phase	368
Key activities of systems analysis	368
1 Focus groups	368
2 Documentation	369
3 Surveys	369
4 Observation	369
5 Interviews	369
6 Prototyping	369
7 Producing the requirements specification	369
Typical problems	370
Systems design phase	370
Key activities in systems design	370
Typical problems and solutions	371
Systems development phase	371
Key activities in systems development	371
Typical problems and solutions	371
Systems implementation phase	372
Key activities in systems implementation	372
1 Changeover	372
2 Data migration	372
3 Testing	373
Typical problems and solutions	373
Systems maintenance phase	373
Key activities	373
Typical problems and solutions	373
Specific risks related to Internet and content-based projects	374
■ CASE STUDY 7.2 <i>The Passport Office Project – what should have been done differently?</i>	375
Summary	378
Exercises	378
Self-assessment questions	378
Essay and discussion questions	379
References	379
Further reading	380
Weblinks	380

08 Managing change

Chapter at a glance • Objective • Learning outcomes • Management issues
 Links to other chapters

Introduction	383
Different types of change	384
	385

DEBATE 8.1	386
Different scales of managing change in information management initiatives	386
Business process management	387
Discontinuous process change	387
■ CASE STUDY 8.1. <i>Business process management</i>	389
■ ACTIVITY 8.1 <i>The magnitude of change and information management applications</i>	391
Models of change	391
Individual responses to change	392
Organizational culture and change	394
■ ACTIVITY 8.2 <i>The constraints of culture on implementing a new knowledge management approach</i>	395
Approaches to managing change	395
Soft systems methodology	398
Stakeholder involvement in change management	398
Leadership qualities	399
Employee motivation	401
DEBATE 8.2	403
Changing job design	404
Education and training	404
■ ACTIVITY 8.3 <i>Managing e-commerce-related change at the Lo-cost Airline Company</i>	405
Specific examples of change management in BIM	406
1 The corporate information portal	406
What is it?	406
What are the benefits?	408
Problems of change management	408
Approaches to managing change	408
■ MINI CASE STUDY 8.1 <i>An HR-focused portal for Nortel Networks</i>	409
■ ACTIVITY 8.4 <i>Keeping a portal alive</i>	410
2 Sell-side e-commerce	410
What is it?	410
What are the benefits?	411
Problems of change management	413
Approaches to managing change	413
3 Customer relationship management	416
What is it?	416
What are the benefits?	417
Problems of change management	417
Approaches to managing change	418
4 Business intelligence	420
What is it?	420
What are the benefits?	421
Problems of change management	422
■ CASE STUDY 8.2 <i>Boots mine diamonds in their customer data</i>	423
Approaches to managing change	425
■ ACTIVITY 8.5 <i>Summarizing common themes in change management for BIM</i>	428
■ CASE STUDY 8.3 <i>Fighting the flood of data</i>	428

Summary	430
Exercises	431
Self-assessment questions	431
Essay and discussion questions	431

09 Building an information architecture

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	435
Introduction	436
Definitions	436
Information architecture	438
Standards for information architecture	440
Systems analysis	441
Identifying information architecture requirements	441
Using the results from the information and knowledge audits	441
Identifying stakeholders	441
Questionnaires	442
Interviews	442
■ <i>ACTIVITY 9.1 Researching requirements at the Lo-cost Airline Company: questionnaire</i>	443
Observation	443
Audit of documentation	444
Systems diagrams	444
Information flow diagrams	445
■ <i>ACTIVITY 9.2 Understanding an information flow diagram</i>	446
Data flow diagrams	447
Entity relationship diagrams	449
UML	451
Use case analysis	452
Actors	452
Use cases	452
Use case diagramming	452
Card sorting	453
Card sorting for web classification	454
Class Responsibility Collaborator (CRC) cards	455
Analysis for interoperability	457
Security analysis	457
Introduction to information security	457
Standards: British Standard for Information Security BS7799	458
Design	459
Database design	459
Normalization	461
Data dictionaries	461
■ <i>CASE STUDY 9.1 The role of the database administrator</i>	462

Web design	464
The difference between websites and intranets	464
Analysis for web design: web blueprint	464
Page design and wireframes	467
Navigation systems	469
Search versus browse	471
Using search technologies	472
Organizational standard and guidelines	474
■ ACTIVITY 9.3 <i>Intranet design at the Lo-cost airline</i>	476
Uses of meta-data on web pages	477
■ ACTIVITY 9.4 <i>Creating Dublin Core meta-data using an online generator</i>	478
Designing for interoperability	478
Taxonomy, thesauri and controlled vocabularies	478
■ CASE STUDY 9.2 <i>Sainsbury's: getting connected with a taxonomy</i>	483
Using Extensible Markup Language - XML	485
XML schemas	486
Uses of XML	486
RSS	487
Usability	489
■ ACTIVITY 9.5 <i>Jacob Nielsen's 10 usability heuristics</i>	491
Security design	492
Security design: logical	492
Security policies	492
Acceptable use policies	493
Security design: physical	493
Summary	494
Exercises	495
Self-assessment questions	495
Essay and discussion questions	495

Part 04 MANAGEMENT

10 Managing information quality

Chapter at a glance • Objective • Learning outcomes • Management issues	
Links to other chapters	503
Introduction	504
Define information quality	506
The DIKAR and RAKID models	506
Data quality	508
■ MINI CASE STUDY 10.1 <i>Abbey Bank cuts costs through improving data quality</i>	510

- Information quality 511
- COBIT information quality requirements 515
 - ACTIVITY 10.1 *Evaluation of information quality* 516
- Knowledge quality 518
 - ACTIVITY 10.2 *Management of knowledge quality at AstraZeneca* 518
- Actions and results quality – performance management systems 519
 - The imperative for performance management systems 519
 - Corporate performance management 520
 - ACTIVITY 10.3 *Capabilities of a corporate performance management system* 523
 - MINI CASE STUDY 10.2 *Jigsaws always have more than one piece* 523
- Performance metrics 524
 - The balanced scorecard 525
 - Six Sigma quality improvement 527
 - Assessing the quality of business performance metrics 528
 - RESEARCH INSIGHT 10.1 *Successful metrics guidelines* 528
- Conduct information audit** 529
 - What is an information audit? 530
 - What is the purpose of an information audit? 530
 - What is the procedure for an information audit? 531
 - RESEARCH INSIGHT 10.2 *An information audit at the University of Glamorgan* 533
 - CASE STUDY 10.1 *An information audit at an SME* 535
- Define and implement information quality policy** 538
 - Approaches for managing data quality 539
 - The data dictionary 539
 - CASE STUDY 10.2 *Deutsche Bank finds value in its customer data* 540
 - Data validation 541
 - Data quality auditing 542
 - Data cleansing 543
 - Data migration to data warehouses 544
 - Targets for data quality 544
 - ACTIVITY 10.4 *Procedures for managing information quality – the challenge of the e-mail address* 544
 - Human factors in data quality 545
 - MINI CASE STUDY 10.3 *Managing data quality at the Lo-cost Airline Company* 546
- Approaches to managing information quality 547
 - MINI CASE STUDY 10.4 *A games retailer* 548
- Human factors in information quality 550
- Responsibilities for information quality 552
- Summary** 552
- Exercises** 553
 - Self-assessment questions 553
 - Essay and discussion questions 553
- References 553
- Further reading 553
- Weblinks 555

Chapter at a glance • Objective • Learning outcomes • Management issues	557
Links to other chapters	
Introduction	558
What is information service quality?	560
Attributes of service quality	561
■ ACTIVITY 11.1 <i>End-user information service quality requirements</i>	562
Costs of service delivery	562
Managing information delivery	563
■ MINI CASE STUDY 11.1 <i>The World Bank pulls information using the Google Search Appliance</i>	564
Managing the quality of information delivery	566
Controlling information security	567
Business continuity planning	569
Managing computer viruses	570
Types of virus	570
Protecting computer systems against viruses	572
Controlling information service usage	574
E-mail management	574
RESEARCH INSIGHT 11.1 <i>E-mail volume</i>	575
1 Minimizing spam (unsolicited e-mail)	576
2 Minimizing internal business e-mail	578
3 Minimizing external business e-mail	579
4 Minimizing personal e-mail (friends and family)	580
DEBATE 11.1	581
5 Legal liability	581
End-user support	581
✳ RESEARCH INSIGHT 11.2 <i>Press Delete for IT time wasters</i>	582
End-user development	583
ICT infrastructure	586
✳ RESEARCH INSIGHT 11.3 <i>Service quality disruptions</i>	587
