<i>List of Figures</i>	xviii
<i>List of Tables</i>	xix
<i>List of Boxes</i>	xx
1 Innovation Technology	1
1.1 Introduction	1
1.2 Three generic technologies	7
1.3 Innovation technology	8
1.4 The importance of innovation	12
1.5 Why study innovation	16
1.6 Risk and uncertainty in innovation	17
1.7 Conclusions	23
2 Understanding Innovation	26
2.1 Introduction	26
2.2 Principle 1: Historical context	27
2.3 Principle 2: Relationships and interdependencies	38
2.4 Principle 3: Social mediation of innovation	41
2.5 Conclusions	44
3 Using Innovation Technology: Procter & Gamble and Arup	45
3.1 Introduction	45
3.2 Procter & Gamble	46
3.3 Arup	59
3.4 Conclusions	80
4 'Think'	81
4.1 Introduction	81
4.2 Instrumentation	82
4.3 The expansion of research and education	85
4.4 A new infrastructure: the Grid	90
4.5 A large firm perspective: GlaxoSmithKline	92

Contents

4.6	A public policy perspective: the transport congestion charge	96
4.7	Data creation, searching, and mining	98
4.8	Visualization	101
4.9	Artificial intelligence	102
4.10	Interdisciplinarity	103
4.11	Conclusions	105
5	'Play'	107
5.1	Introduction	107
5.2	The practice of design	110
5.3	Emerging practices of design	113
5.4	Benefits and challenges of playing with IvT	133
5.5	Combining craft and code	134
5.6	Reflections	135
5.7	Conclusions	137
6	'Do'	139
6.1	Introduction	139
6.2	Fordism: standardization and modularity	141
6.3	Toyotaim: integrating workflow and innovation processes	142
6.4	New technologies for doing	146
6.5	The impact of IvT on manufacturing processes	149
6.6	IvT for production planning	156
6.7	Improving processes in the mining industry	159
6.8	Conclusions	161
7	The Strategic Management of Innovation	164
7.1	Introduction	164
7.2	Impact of IvT on competencies	165
7.3	Integrating across boundaries	168
7.4	Organizing internal structures and processes	173
7.5	Learning, creativity, and knowledge	182
7.6	Conclusions	186
8	A New Innovation Process	188
8.1	Introduction	188
8.2	Summary of the key arguments	189
8.3	IvT and the intensification of innovation	191
8.4	New craft skills in innovation	193
8.5	New management challenges of innovation	195
8.6	Public policy challenges of the new innovation process	199
8.7	Challenges of innovation research in the new innovation process	201

<i>Appendix: Research methods</i>	205
<i>Endnotes</i>	213
<i>References</i>	223
<i>Website references</i>	238
<i>Glossary</i>	241
<i>Index</i>	244

List of Figures

1.1	The intensification of innovation	4
1.2	Three generic types of technology (1)	7
1.3	Three generic types of technology (2)	9
1.4	Three generic types of technology (3)	13
2.1	The first generation innovation process: science/supply-driven model	33
2.2	The second generation innovation process: demand/market-driven model	34
2.3	The third generation innovation process: coupling model	35
2.4	The fourth generation innovation process: integrated model	36
2.5	The fifth generation innovation process: systems integration and network model	36
2.6	Historical idealized character of innovation	37
6.1	Time compression through rapid prototyping	148
7.1	The impact of IvT on strategic management	166

List of Tables

2.1	Some major analytical approaches to innovation	29
2.2	Technological revolutions	30

List of Boxes

1.1	A new kind of player	6
2.1	Theoretical and analytical approaches to innovation	28
2.2	Open innovation	38
2.3	New thinking about prototyping	43
4.1	International collaborative thinking: skin science	84
4.2	Simulation and process intensification in drug discovery	94
4.3	Using data mining in cell biology	99
4.4	A visionary past	105
5.1	Measuring play	109
5.2	Playing with serious games	120
6.1	Predictive technology assisting supply-chain management at Wal-Mart	144
6.2	Trends in advanced manufacturing	146
6.3	Three types of rapid prototyping machines	149
7.1	Strategic management theory	167
7.2	IvT, tacit, and codified knowledge	183
A1	Interview template	207
