PART I INTRODUCTION

1. Introduction: scanning literature on institutions, organizations and innovation 3
Steven Casper and Frans van Waarden
2. Problems of measuring innovative performance 19
Brigitte Unger
3. National innovation systems 51
Marius Meeus and Leon Oerlemans

PART II INSIDE THE BLACK BOX: ORGANIZATIONS

4. Organizations and innovation: contributions from organizational sociology and administrative science 71
Jerald Hage
5. Innovation, organizational learning and institutional economics 113
Bart Nooteboom
6. Innovation strategies, interactive learning and innovation networks 152
Marius Meeus and Leon Oerlemans

PART III THE BROADER ENVIRONMENT: INSTITUTIONS

7. Varieties of capitalism: comparative institutional approaches to economic organization and innovation 193
Steven Casper, J. Rogers Hollingsworth and Richard Whitley

8. A prototypical institution: law, regulation and innovation <i>Frans van Waarden</i>	229
PART IV CONCLUSION	
9. Conclusion: questions for further research <i>Frans van Waarden and Steven Casper</i>	265
<i>Index</i>	293

Figures

1.1	German patent specialization 1983–84 and 1993–94	4
1.2	US patent specialization 1983–84 and 1993–94	5
1.3	The idea-innovation chain	12
5.1	A field of literature	114
5.2	Cognitive distance	130
5.3	Cycle of exploitation and exploration	141

Tables

2.1	The pros and cons of the three most widely used innovative indicators summarized	38
2.2	Shares in manufacturing: EU–Japan–USA 1996 in per cent	40
2.3	The WIFO taxonomy of manufacturing industries by Peneder	41
3.1	What are national systems of innovation?	53
3.2	NSI organizations	55
3.3	Institutions structuring innovation processes	55
3.4	Hard and soft functions of NSIs	56
8.1	Legal systems by degree of uncertainty reduction	242
8.2	Examples of substantive laws affecting innovation in different stages of the cycle	245
9.1	Technological regime characteristics	273
9.2	National institutional framework orientations in Germany and the United States	279
