Table of Contents

Foreword ........................................................................................................................................... xix

Preface ............................................................................................................................................. xxii

Section I
Usage of Online Surveys and Measurements

Chapter I
E-Survey Methodology / Karen J. Jansen, Kevin G. Corley, and Bernard J. Jansen ..................... 1

Chapter II
Web Survey Design / Qingxiong Ma and Mary McCord ................................................................. 9

Chapter III
Opportunities and Constraints of Electronic Research / Lynne D. Roberts ............................... 19

Chapter IV
Electronic Data Collection Methods / Mohini Singh and Stephen Burgess .............................. 28

Chapter V
Online-Questionnaire Design Guidelines / Joanna Lumsden ....................................................... 44

Chapter VI
Dual-Mode Electronic Survey Lessons and Experiences / Michael Lang ................................. 65

Chapter VII
Software Design Tips for Online Surveys / John M. Artz ............................................................ 76

Chapter VIII
Overcoming Challenges to Conducting Online Surveys / Jiali Ye ........................................... 83

Chapter IX
Sampling in Online Surveys / Gerd Beidernikl and Arno Kerschbaumer .................................... 90
Chapter X
Equivalence of Electronic and Off-Line Measures / Lynne D. Roberts ........................................... 97

Chapter XI
Electronic vs. Conventional Surveys / Rhonda Dixon and Rodney Turner ........................................... 104

Chapter XII
The Ethics of Online Surveys / Călin Gurău ......................................................................................... 112

Chapter XIII
Legal and Ethical Concerns of Collecting Data Online / Amanda Sturgill and Pattama Jongsuwanwattana ............................................................... 120

Chapter XIV
Measuring Internet Dependency / Jaime L. Melton and J. Lynn Reynolds ........................................... 126

Chapter XV
Online Advertising Metrics / Ginger Rosenkranz .............................................................................. 136

Chapter XVI
Measurements in E-Business / Damon Aiken .................................................................................. 144

Chapter XVII
Measurement in Public Relations / Renée A. Botta ............................................................................. 153

Chapter XVIII
Measuring Intrinsic Motivations / J. Lynn Reynolds ........................................................................ 170

Chapter XIX
Measuring Disagreement / Brian Whitworth .................................................................................. 174

Chapter XX
Measuring Cognitive Load / Nanette M. Hogg .................................................................................. 188

Chapter XXI
Surveying Online Scholarship / J. D. Wallace .................................................................................. 195

Chapter XXII
Computer-Mediated Communication Research / J. D. Wallace ....................................................... 207

Section II
Survey Software

Chapter XXIII
Mixed-Mode Surveys with NetSurvey / Savvas Papagiannidis and Feng Li ........................................ 224
Chapter XXIV
Design and Development of an Electronic Survey System / Bruce Aaron and Samir Desai ........... 232

Chapter XXV
Open Source Surveys with Asset / Bert G. Wachsmuth ................................................................. 241

Chapter XXVI
Web Survey Methodology (WebSM) Portal / Katja Lozar Manfreda and Vasja Vehovar ............ 248

Chapter XXVII
Web-Based Survey Software for Academic Research / Hallie D’Agruma and Erika A. Zollet ...... 253

Chapter XXVIII
Comparison of Online Surveys Tools / Gerd Beidernikl and Arno Kerschbaumer .................. 264

Chapter XXIX
SurveyTracker E-Mail/Web Survey Software / Eun G. Park ...................................................... 269

Chapter XXX
Open Source Survey Software / Jason D. Baker ................................................................. 273

Section III
Instrument Profiles of Interest to Survey Researchers

Chapter XXXI
Hyperlink Analysis / Mike Thelwall ................................................................. 277

Chapter XXXII
Web Site Experience Analysis / Mihaela Vorvoreanu .................................................. 283

Chapter XXXIII
Bit-Wise Coding for Exploratory Analysis / Thomas O’Daniel ........................................ 287

Chapter XXXIV
Measurement of End-User Computing Satisfaction / Rodney A. Reynolds ......................... 293

Chapter XXXV
Web Credibility Measurement / Rodney A. Reynolds .................................................. 296

Chapter XXXVI
Constructivist Online Learning Environment Survey / Jason D. Baker ..................... 299

Chapter XXXVII
Celebrity-Persona Identification Scale / William J. Brown and Mihai C. Bocarnea .............. 302
Chapter XXXVIII
Technology Acceptance Model / Mary McCord ................................................................. 306

Chapter XXXIX
Celebrity-Persona Parasocial Interaction Scale / Mihai C. Bocarnea and William J. Brown .......... 309

Chapter XL
Organizational Culture Profile / Katty Marmenout .................................................................. 313

Chapter XLI
Measuring Online Flow / Damon Aiken ............................................................................... 317

Chapter XLII

Chapter XLIII
Reactance Proneness Assessment / Lijiang Shen and James P. Dillard ................................. 323

Chapter XLIV

Chapter XLV
The Listening Styles Profile / Stephanie Lee Sargent and James B. Weaver, III..................... 334

Chapter XLVI
Servant Leadership Assessment Instrument / Rob Dennis and Mihai C. Bocarnea .................. 339

Chapter XLVII
The Aggression Questionnaire / Christian Kiewitz and James B. Weaver, III ...................... 343

Chapter XLVIII
Motivational Gifts Survey / Dorena DellaVecchio, Bruce E. Winston, and Mihai C. Bocarnea ...... 348

Chapter XLIX
Queendom Online Test Repository / Jason D. Baker ............................................................ 352

Chapter L
Willingness to Communicate / Sharon Berry ......................................................................... 355

Chapter LI
Leadership Practices Inventory / Sharon Berry ...................................................................... 357

Chapter LII
Eysenck Personality Questionnaire / James B. Weaver, III and Christian Kiewitz .................. 360
Chapter LIII
Personal Report of Intercultural Communication Apprehension / Sharon Berry ......................... 364

Chapter LIV
Gender Role Inventory / James B. Weaver, III and Stephanie Lee Sargent............................... 367

Chapter LV
Internet Motives Questionnaire / Stephanie Lee Sargent..................................................... 371

Chapter LVI
Situational Communication Apprehension Measure / Sharon Berry...................................... 376
Detailed Table of Contents

Foreword ........................................................................................................................................... xix
Preface ............................................................................................................................................... xxii

Section I  
Usage of Online Surveys and Measurements

Chapter I  
E-Survey Methodology / Karen J. Jansen, Kevin G. Corley, and Bernard J. Jansen .................. 1

Consideration of conceptual, ethical, and methodological issues associated with various computer-based survey techniques.

Chapter II  
Web Survey Design / Qingxiong Ma and Mary McCord ............................................................... 9

The chapter offers a very hands-on approach to stages of Web survey design that new and returning survey researchers will find useful.

Chapter III  
Opportunities and Constraints of Electronic Research / Lynne D. Roberts .............................. 19

With a historical perspective on the development of electronic survey capabilities, the author offers insights into practical issues on converting from traditional survey forms to electronic survey forms and procedures.

Chapter IV  
Electronic Data Collection Methods / Mohini Singh and Stephen Burgess .......................... 28

This innovative chapter provides clear insight into the processes of doing online research through the lens of case studies.
Chapter V
Online-Questionnaire Design Guidelines / Joanna Lumsden .............................................. 44

This synthesis of survey research practices and Web site design practices allows for the establishment of a set of "best practices" principles for researchers to follow when constructing online questionnaires.

Chapter VI
Dual-Mode Electronic Survey Lessons and Experiences / Michael Lang ............................................. 65

Combining traditional mail surveys with online survey methods afford a number of opportunities to improve the quality of research. Particular attention is offered on the task of increasing response rates to surveys.

Chapter VII
Software Design Tips for Online Surveys / John M. Arzt ................................................................. 76

This chapter offers specific directions for working through the Web page construction and the programming needed to optimize the online survey process.

Chapter VIII
Overcoming Challenges to Conducting Online Surveys / Jiali Ye ...................................................... 83

The specific research challenges addressed in the chapter are response rates, sampling, and controlling the data collection environment.

Chapter IX
Sampling in Online Surveys / Gerd Beidernikl and Arno Kerschbaumer ........................................... 90

A key argument here is that the requirement of representativeness limits the usefulness and validity of online surveys.

Chapter X
Equivalence of Electronic and Off-Line Measures / Lynne D. Roberts .............................................. 97

This chapter advances the case and the processes for researchers to demonstrate the empirical evidence of the equivalence of electronic and offline measures.

Chapter XI
Electronic vs. Conventional Surveys / Rhonda Dixon and Rodney Turner ......................................... 104

This chapter is a report on quantitative data on the similarities, differences, and potential problems when using electronic or conventional surveys.
Chapter XII
The Ethics of Online Surveys / Călin Gurău ................................................................. 112

This chapter moves beyond the basic ethical challenges of online research to present the solutions adopted by different organizations. An examination of the actual applications of research ethics in online surveys revealed serious ongoing ethical problems.

Chapter XIII
Legal and Ethical Concerns of Collecting Data Online / Amanda Sturgill and Pattama Jongsuwanwattana ................................................................. 120

This chapter explores issues related to legal and sociocultural perspectives that should concern the international survey researcher.

Chapter XIV
Measuring Internet Dependency / Jaime L. Melton and J. Lynn Reynolds ........................................ 126

The argument in this chapter is that doing research on or about the Internet requires consideration of the goals unique to Internet use (as opposed to general media use). The chapter presents factor analytic data on a measure of Internet dependency.

Chapter XV
Online Advertising Metrics / Ginger Rosenkrans ............................................................. 136

This chapter explains common online advertising metrics for measuring advertising effectiveness and encourages consideration of alternative models for the measurement of advertising effects.

Chapter XVI
Measurements in E-Business / Damon Aiken ................................................................. 144

After consideration of business measures and the uniqueness of electronic business and research environments, this chapter turns to address the evolving nature on electronic commerce and, thus, the evolving research environment for those interested in e-commerce.

Chapter XVII
Measurement in Public Relations / Renée A. Botta ......................................................... 153

This chapter reviews public relations measures and the development of online surveys and measurements in public relations. Consideration is also given to the future of measurement in public relations.

Chapter XVIII
Measuring Intrinsic Motivations / J. Lynn Reynolds ....................................................... 170

As different groups expand into electronic surveys, they increasingly need to adapt existing measures in their field. This chapter reviews a number of measures from religion and spirituality research relevant to future research interests.
Chapter XIX
Measuring Disagreement / Brian Whitworth ......................................................... 174

With increasing use of computer-mediated group communication, there is an increasing need for group process measures and application of those measures in the online environment. This chapter offers conceptual explication of a measure of disagreement, and then explains how to employ that measure in the context of online group discussions.

Chapter XX
Measuring Cognitive Load / Nanette M. Hogg ....................................................... 188

A key concept in the information age is the capacity to handle cognitive load. This chapter reviews the conceptual and operational approaches to cognitive load, and suggests applications for both traditional and electronic-based research.

Chapter XXI
Surveying Online Scholarship / J. D. Wallace ..................................................... 195

This chapter synthesizes and summarizes advances in information search and research techniques as applied to the computer-mediated communication research area.

Chapter XXII
Computer-Mediated Communication Research / J. D. Wallace .............................. 207

This chapter is a state-of-the-art review of who is doing what research in the computer-mediated communication research area.

Section II
Survey Software

Chapter XXIII
Mixed-Mode Surveys with Netsurvey / Savvas Papagiannidis and Feng Li .................. 224

The authors introduce and explain a software tool that can facilitate mail, e-mail, and Web-based surveys.

Chapter XXIV
Design and Development of an Electronic Survey System / Bruce Aaron and Samir Desai ....... 232

The authors introduce and explain a Web-based tool for survey construction, and demonstrate the application in training and development assessments.
Chapter XXV
Open Source Surveys with Asset / Bert G. Wachsmuth ................................. 241

The author explains a Web-based tool for survey construction and compares the tool with other such tools.

Chapter XXVI
Web Survey Methodology (WebSM) Portal / Katja Lozar Manfreda and Vasja Vehovar .......... 248

The authors describe a Web portal dedicated to survey research. The portal includes various resources of particular interest to those who do Web-based surveys.

Chapter XXVII
Web-Based Survey Software for Academic Research / Hallie D’Agruma and Erika A. Zollet .... 253

The authors explain a Web-based tool for survey construction and data management that offers flexibility in formatting, design, and implementation of interactive surveys.

Chapter XXVIII
Comparison of Online Surveys Tools / Gerd Beidernikl and Arno Kerschbaumer .................. 264

The authors compare the technical functions, the graphical representation, and the usability of two major online survey tools developed in Germany.

Chapter XXIX
SurveyTracker E-Mail/Web Survey Software / Eun G. Park ........................................ 269

The author describes the features, functions, and implementation of a survey software product that supports project management, survey authoring and design, and multiple electronic and paper data collection technologies. The discussion centers on applications of the software to research on schools, higher education, government, business, and healthcare.

Chapter XXX
Open Source Survey Software / Jason D. Baker ..................................................... 273

The author discusses free software that may be useful to survey researchers.

Section III
Instrument Profiles of Interest to Survey Researchers

Chapter XXXI
Hyperlink Analysis / Mike Thelwall ............................................................. 277

The author discusses the various methods for and uses of analyses of patterns of linkages between Web pages.
Chapter XXXII
Web Site Experience Analysis / Mihaela Vorvoreanu .................................................. 283

The author describes a battery of scales that “map” the experiential feeling resulting from a Web page encounter.

Chapter XXXIII
Bit-Wise Coding for Exploratory Analysis / Thomas O’Daniel ..................................... 287

The author discusses coding procedures that can help identify problems and false assumptions in survey data.

Chapter XXXIV
Measurement of End-User Computing Satisfaction / Rodney A. Reynolds ..................... 293

The author describes the end-user computing satisfaction instrument. The instrument is common in studies on electronic uses and effects.

Chapter XXXV
Web Credibility Measurement / Rodney A. Reynolds ...................................................... 296

The author reviews various perspectives on the measurement of Web credibility.

Chapter XXXVI
Constructivist Online Learning Environment Survey / Jason D. Baker ............................ 299

The author describes and comments on a key assessment tool for evaluating online learning experiences.

Chapter XXXVII
Celebrity-Persona Identification Scale / William J. Brown and Mihai C. Bocarnea ........... 302

The authors describe a scale for assessing media user’s degree of personal identification with a celebrity.

Chapter XXXVIII
Technology Acceptance Model / Mary McCord ............................................................... 306

The author reviews the TAM measure of perceived usefulness and perceived ease of use of computer technology as predictors of intent and actual use.

Chapter XXXIX
Celebrity-Persona Parasocial Interaction Scale / Mihai C. Bocarnea and William J. Brown .... 309

The authors describe a scale for assessing media user’s perceptions of relationship with celebrities.
Chapter XL
Organizational Culture Profile / Katty Marmenout ................................................................. 313

The author describes a measure that is useful for exploring the fit between the person and the organization, the need for organizational culture change, distinguishing subcultures, and the potential fit for planned organizational mergers.

Chapter XLI
Measuring Online Flow / Damon Aiken .................................................................................. 317

The author describes the measurement of the sense of “flow” (complete and total immersion in an activity), and the implications of flow for e-commerce.

Chapter XLII

The author describes a measure of communication apprehension (CA). CA has profound effects on individual performance and personal relationships.

Chapter XLIII
Reactance Proneness Assessment / Lijiang Shen and James P. Dillard .................................... 323

The authors describe a measure for assessing the degree of reactance (overvaluing denied alternatives) to messages.

Chapter XLIV

The authors report on the concepts and closed-ended measures for surprise, anger, fear, sadness, guilt, happiness, contentment.

Chapter XLV
The Listening Styles Profile / Stephanie Lee Sargent and James B. Weaver, III ...................... 334

The authors discuss a measure to assess preferences to listen for people, action, content, and time.

Chapter XLVI
Servant Leadership Assessment Instrument / Rob Dennis and Mihai C. Bocarnea .................. 339

The authors describe a measure of leaders for their love, empowerment, vision, humility, trusting, serving, and altruism.
Chapter XLVII
The Aggression Questionnaire / Christian Kiewitz and James B. Weaver, III. 343

The authors report on short-form measures of aggression. The measures tap dimensions of anger, hostility, verbal aggression, physical aggression, and indirect aggression.

Chapter XLVIII
Motivational Gifts Survey / Dorena DellaVecchio, Bruce E. Winston, and Mihai C. Bocarnea. 348

The authors report on a seven-dimension instrument useful in person-job fit analysis.

Chapter XLIX
Queendom Online Test Repository / Jason D. Baker. 352

The author discusses an online service offering over 500 measures and tests ranging from substantial to fun uses.

Chapter L
Willingness to Communicate / Sharon Berry. 355

The author reports on a self-report measure of the tendency to approach or avoid initiating communication.

Chapter LI
Leadership Practices Inventory / Sharon Berry. 357

The author details a measure of leaders who lead by modeling, inspiring, challenging, enabling, and encouraging.

Chapter LII
Eysenck Personality Questionnaire / James B. Weaver, III and Christian Kiewitz. 360

The authors present an efficient short-form measure for extraversion, neuroticism, and psychoticism. Research based on electronic platforms tends to require such efficient measures.

Chapter LIII
Personal Report of Intercultural Communication Apprehension / Sharon Berry. 364

The author details a measure of the fear people experience when interacting with others from different cultural groups.

Chapter LIV
Gender Role Inventory / James B. Weaver, III and Stephanie Lee Sargent. 371

The authors describe a newly developed 14-item inventory designed as a refinement of the Bem sex role inventory.
Chapter LV
Internet Motives Questionnaire / Stephanie Lee Sargent ................................................................. 375

The author reports on a refined measure of Internet motives. The dimensions are: entertainment, convenience, interpersonal/communication utility, and social utility.

Chapter LVI
Situational Communication Apprehension Measure / Sharon Berry ............................................... 380

The author reviews a measure of state communication anxiety (in contrast with generalized trait anxiety).
