|--|-----|
| 1. Introduction | 15 |
| 1.1 Starting Point: Decades of change | 15 |
| 1.2 Cognitive interest and guiding questions | 24 |
| 1.3 The relevance of context in gendered careers research | 29 |
| 1.4 Outline of the study | 34 |
| 2. Conceptual framework | 35 |
| 2.1 A time-sensitive approach to gendered careers | 35 |
| 2.2 The gendered welfare state and gendered careers | 37 |
| 2.3 Labor market mobility as a gender-specific rational choice | 42 |
| 3. Theoretical perspectives on gendered careers | 51 |
| 3.1 Competing scenarios for shifting gender relations on the labor market | 51 |
| 4. Data and methods | 61 |
| 4.1 Measuring the impact of 'sex' and 'gender' on individual careers | 63 |
| 4.2 Two case studies versus an integrated cross-national study design | 68 |
| 4.3 Data and methods applied in the West German case study | 70 |
| 4.4 Data and methods applied in the Danish case study | 74 |
| 5. Change and inertia in gendered career patterns – A four-decade comparison of the West German employee's labor market transitions, the 1960s to 1990s | 81 |
| 5.1 Introduction | 81 |
| 5.2 Context conditions of gendered career development in the West German institutional setting | 85 |
| 5.3 Research questions and hypotheses | 94 |
| 5.4 Results | 97 |
| 5.5 Summary and discussion | 127 |
| 6. Gendered careers between flexibilization and tradizionalization – Empirical findings on Danish employee's labor market transitions, the 1980s and 1990s | 131 |
| 6.1 Introduction | 131 |
| 6.2 The development of the Danish welfare state, shifts in women's employment, and the establishment of the dual-earner model | 136 |
| 6.3 The transformation of gender relations and state-family binds, the 1960s and 1970s | 139 |

| | | |
|-----|--|-----|
| 6.4 | The institutional framework and gendered career chances, the 1980s and 1990s | 141 |
| 6.5 | Research questions and hypotheses | 151 |
| 6.6 | Results | 156 |
| 6.7 | Discussion and conclusions | 190 |
| 7. | Discussion of key findings in context comparative perspective | 195 |
| 7.1 | Career continuity | 196 |
| 7.2 | Career risks and chances | 202 |
| 8. | Excuse: Life course and stratification research and feminist theory reconsidered | 205 |
| 9. | Summary and conclusions | 211 |
| 9.1 | Review of the research proceeding | 211 |
| 9.2 | Summary of key findings in the light of convergence, persistence and diversity | 213 |
| 9.3 | Context and care | 218 |
| 9.4 | Context and decision corridors | 221 |
| 10. | References | 225 |
| 11. | Appendix available online http://web.uni-bamberg.de/sowi/soziologie-i/grunow_dissertation/ | |

List of Figures

| | | |
|------------|---|-----|
| Figure 1.1 | Context differences in comparative perspective: West Germany and Denmark, mid 1980s to late 1990s | 33 |
| Figure 2.1 | Conceptual innovations of welfare state analysis in the 1990s | 41 |
| Figure 2.2 | The general model of sociological explanation | 44 |
| Figure 2.3 | The general model of sociological explanation applied to gendered career development in different contexts | 49 |
| Figure 4.1 | Comparative overview of the data sets used | 69 |
| Figure 6.1 | Development in Danish women's and men's unemployment and participation in paid leave arrangements, 1980s and 1990s (in thousands) | 150 |

List of Tables

| | | |
|------------|--|-----|
| Table 5.1 | Historical development in unemployment rates (%), West Germany | 88 |
| Table 5.2 | Cohort comparison of women's and men's transitions from employment to unemployment and to home-making, 1960s to 1990s, frequencies | 98 |
| Table 5.3 | Cohort comparison of women's and men's transitions from employment to unemployment, 1960s to 1990s | 99 |
| Table 5.4 | Cohort and sex category comparison for the transition to unemployment 1960s to 1990s | 100 |
| Table 5.5 | Men's and women's transitions from employment to unemployment | 102 |
| Table 5.6a | Men's and women's transitions from employment to unemployment, cohort-separate models, cohorts 1940 and 1955 | 105 |
| Table 5.6b | Men's and women's transitions from employment to unemployment, cohort-separate models, cohorts 1964 and 1971 | 106 |

| | | |
|------------|--|-----|
| Table 5.7a | Men's and women's transitions from employment to unemployment, separate models for each cohort and sex category. Focus: educational qualification, cohorts 1940 and 1955 | 107 |
| Table 5.7b | Men's and women's transitions from employment to unemployment, separate models for each cohort and sex category. Focus: educational qualification, cohorts 1964 and 1971 | 108 |
| Table 5.8a | Men's and women's transitions from employment to unemployment, separate models for each cohort and sex category. Focus: the family cycle, cohorts 1940 and 1955 | 109 |
| Table 5.8b | Men's and women's transitions from employment to unemployment, separate models for each cohort and sex category. Focus: the family cycle, cohorts 1964 and 1971 | 110 |
| Table 5.9 | Cohort comparison of women's transitions from employment to homemaking for family reasons, 1960s to 1990s | 112 |
| Table 5.10 | Women's transitions from employment to homemaking for family reasons, cohort-separate models | 113 |
| Table 5.11 | Women's transitions from employment to homemaking for family reasons, common models for cohorts 1940, 1955 and 1964 | 114 |
| Table 5.12 | Women's and men's re-entry to employment after unemployment across cohorts | 116 |
| Table 5.13 | Women's re-entry to employment after homemaking across cohorts | 118 |
| Table 5.14 | Cohort comparison of occupational prestige scores (SIOPS) at first job, mean values and values distinguishing the upper and lower 50 percent of first jobs | 120 |
| Table 5.15 | Direct cohort and sex category comparison of career mobility | 121 |
| Table 5.16 | Cohort comparison of women's and men's upward and downward job mobility | 123 |
| Table 5.17 | Women's upward mobility and men's upward mobility, direct and indirect moves | 125 |

| | | |
|------------|---|-----|
| Table 5.18 | Women's downward mobility and men's downward mobility, direct and indirect moves | 126 |
| Table 6.1 | Cohort comparison of women's transitions from employment to unemployment and to out of labor force in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68), common models for both cohorts | 157 |
| Table 6.2 | Cohort comparison of men's transitions from employment to unemployment and to out of labor force in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68), common models for both cohorts | 159 |
| Table 6.3 | Men's and women's transitions from employment to unemployment in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68). Common models, sex category | 161 |
| Table 6.4 | Men's and women's transitions from employment to unemployment in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68). Separate models, sex category | 163 |
| Table 6.5 | Men's and women's transitions from employment to paid leave 1992-99 (birth cohort 1959-68). Common models, sex category | 166 |
| Table 6.6 | Men's and women's transitions from employment to paid leave 1992-99 (birth cohort 1959-68). Separate models, sex category | 168 |
| Table 6.7 | Couples: Men's and women's transitions from employment to paid leave 1992-99 (birth cohort 1959-68). Partner's earnings, specification 1 | 172 |
| Table 6.8 | Couples: Men's and women's transitions from employment to paid leave 1992-99 (birth cohort 1959-68). Partner's earnings, specification 2 | 173 |
| Table 6.9 | Couples: Women's transitions from employment to paid leave 1992-99 (birth cohort 1959-68) | 174 |
| Table 6.10 | Couples: Men's transitions from employment to paid leave 1992-99 (birth cohort 1959-68) | 176 |
| Table 6.11 | Cohort comparison of men's and women's upward and downward mobility chances in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68), common models for both cohorts | 179 |

| | | |
|------------|--|-----|
| Table 6.12 | Cohort comparison of full-time employed men's and women's upward mobility chances in the 1980s and 1990s | 182 |
| Table 6.13 | Cohort comparison of highly educated full-time employed men's and women's upward mobility chances in the 1980s and 1990s | 184 |
| Table 6.14 | Cohort comparison of full-time employed men's and women's downward mobility risks in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68) | 185 |
| Table 6.15 | Cohort comparison of highly educated full-time employed men's and women's downward mobility risks in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68) | 187 |
| Table 6.16 | Men's and women's transitions from unemployment back to paid employment in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68) | 188 |
| Table 6.17 | Men's and women's transitions from unemployment back to paid employment in the 1980s (birth cohort 1949-58) and 1990s (birth cohort 1959-68), common models for both cohorts | 189 |
