INTERACTIVE AND INTEGRATIVE CARDIOLOGY

Editors
SAMUEL SIDEMAN, RAFAEL BEYAR, AND AMIR LANDESBERG

This volume is the result of a meeting entitled Interactive and Integrative Cardiology: 4th Larry and Hori Fairberg Workshop, held on April 23–27, 2006 in Charleston, South Carolina.

CONTENTS

Preface: The Challenge of Cardiac Modeling—Interaction and Integration. By SAMUEL SIDEMAN ................................................................. xi

Part I. Development and Genetics

Functional Studies of Individual Myosin Molecules. By JODY A. DANTZIG, TIM Y. LIU, AND YALE E. GOLDMAN ...................................................... 1

Recruitment of New Cells into the Postnatal Heart: Potential Modification of Phenotype by Periostin. By RICHARD P. VISCONTI AND ROGER R. MARKWALD ........................................................................... 19

Cell-Based Approaches for Cardiac Repair. By MICHAEL RUBART AND LOREN J. FIELD .................................................................................... 34

The Developing Cardiac Myocyte: Maturation of Excitability and Excitation–Contraction Coupling. By ELIZABETH A. SCHRODER, YIDONG WEI, AND JONATHAN SATIN ........................................................................... 63
Dynamic Interactions between Myocytes, Fibroblasts, and Extracellular Matrix. By INDRONEAL BANERJEE, KRISHNA YEKKALA, THOMAS K. BORG, AND TROY A. BAUDINO ........................................... 76

Embryonic Heart Induction. By ANN C. FOLEY, RUCHIKA W. GUPTA, ROSA M. GUZZO, OKSANA KOROL, AND MARK MERCOLA .................. 85

The Role of Basic Leucine Zipper Protein-Mediated Transcription in Physiological and Pathological Myocardial Hypertrophy. By IZHAK KEHAT, TAL HASIN, AND AMI ARONHEIM .......................... 97

Part II. Mechanochemical Interactions

Hypertrophy and Atrophy of the Heart: The Other Side of Remodeling. By PETER RAZEGHI AND HEINRICH TAEGMTMEYER ............................................. 110

Role of Cellular Compartmentation in the Metabolic Response to Stress: Mechanistic Insights from Computational Models. By LUFANG ZHOU, XIN YU, MARCO E. CABRERA, AND WILLIAM C. STANLEY .................. 120

Maintenance of the Metabolic Homeostasis of the Heart: Developing a Systems Analysis Approach. By ROBERT S. BALABAN ........................................ 140

Part III. Electrochemical Interactions

Diversity of Ca\textsuperscript{2+} Signaling in Developing Cardiac Cells. By EINSLEY JANOWSKI, LARS CLEEMANN, PHILIPP SASSE, AND MARTIN MORAD ................. 154

Regulation of Ca\textsuperscript{2+} and Na\textsuperscript{+} in Normal and Failing Cardiac Myocytes. By DONALD M. BERS, SANDA DESPA, AND JULIE BOSSUYT .................. 165

The Integration of Spontaneous Intracellular Ca\textsuperscript{2+} Cycling and Surface Membrane Ion Channel Activation Entrains Normal Automaticity in Cells of the Heart’s Pacemaker. By EDWARD G. LAKATTA, TATIANA VINOGRADOVA, ALEXEY LYASHKOV, SYEVDA SIRENKO, WEIZONG ZHU, ABDUL RUKNUDIN, AND VICTOR MALTESEV ................................. 178

Calcium Handling in Embryonic Stem Cell-Derived Cardiac Myocytes: Of Mice and Men. By ILANIT ITZHAKI, JACKIE SCHILLER, RAFAEL BEYAR, JONATHAN SATIN, AND LIOR GEPSTEIN .................. 207

Cellular Alternans: A Mechanism Linking Calcium Cycling Proteins to Cardiac Arrhythmogenesis. By LANCE D. WILSON, XIAOPING WAN, AND DAVID S. ROSENBAUM ........................................ 216

Part IV. Electromechanical Interactions

Role of Sarcomere Mechanics and Ca\textsuperscript{2+} Overload in Ca\textsuperscript{2+} Waves and Arrhythmias in Rat Cardiac Muscle. By HENK E.D.J. TER KEURS, YUJI WAKAYAMA, YOSHINAO SUGAI, GUY PRICE, YUTAKA KAGAYA, PENELope A. BOYDEN, MASAHITO MIURA, AND BRUNO D.M. STUYVERS ........... 248

Cellular Basis for the Repolarization Waves of the ECG. By CHARLES ANTZELEVITCH .................................................. 268
Mechanosensitive-Mediated Interaction, Integration, and Cardiac Control. By Max J. Lab ................................................................. 282

Three-Dimensional Models of Individual Cardiac Histoanatomy: Tools and Challenges. By Rebecca A.B. Burton, Gernot Plank, Jürgen E. Schneider, Vicente Grau, Helmut Ahammer, Stephen L. Keeling, Jack Lee, Nicolas P. Smith, David Gavaghan, Natalia Trayanova, and Peter Kohl .............................................. 301

Cardiac Defibrillation and the Role of Mechanoelectric Feedback in Postshock Arrhythmogenesis. By Viatcheslav Gurev, Mary M. Maleckar, and Natalia A. Trayanova ................................................................. 320

Part V. Integrated Models and Analysis

Modeling Cardiac Electrical Activity at the Cell and Tissue Levels. By Travis M. Austin, Darren A. Hooks, Peter J. Hunter, David P. Nickerson, Andrew J. Pullan, Gregory B. Sands, Bruce H. Smaill, and Mark L. Trew ........................................... 334

Cardiac β-Adrenergic Signaling: From Subcellular Microdomains to Heart Failure. By Jeffrey J. Saucerman and Andrew D. McCulloch ................................................................. 348

Multiscale Modeling of Calcium Signaling in the Cardiac Dyad. By Raymond L. Winslow, Antti Tanskanen, Mindao Chen, and Joseph L. Greenstein ................................................................. 362

Nonlinear Dynamics of Paced Cardiac Cells. By Yohannes Shiferaw, Zhilin Qu, Alan Garfinkel, Alain Karma, and James N. Weiss ................................................................. 376

Modeling Cardiac Ischemia. By Blanca Rodríguez, Natalia Trayanova, and Denis Noble ................................................................. 395

Part VI. Novel Therapeutics

Cardiovascular Therapeutic Aspects of Cell Therapy and Stem Cells. By Lior Gepstein ................................................................. 415

Adenylyl Cyclase Gene Transfer in Heart Failure. By H. Kirk Hammond ...... 426

Genetic Engineering and Therapy for Inherited and Acquired Cardiomyopathies. By Sharlene Day, Jennifer Davis, Margaret Westfall, and Joseph Metzger ................................................................. 437

Nanomedicine Opportunities in Cardiology. By Gregory Lanza, Patrick Winter, Tillmann Cyrus, Shelton Caruthers, Jon Marsh, Michael Hughes, and Samuel Wickline ................................................................. 451

Effects of Synchronized Cardiac Assist Device on Cardiac Energetics. By Amir Landesberg, Ayshalom Shenhar, Rona Shofty, Eugene Konukhov, Carmit Levy, Oscar Lichtenstein, Rafael Beyar, Henk Edi ter Keurs, Giora Landesberg, Marco Cabrera, William Stanley, and Gerald M. Saidel ................................................................. 466

Index of Contributors ................................................................. 479
