1 Introduction (<i>Sandrine Cazes and Alena Nesporova</i>)	1
1.1 The debate about flexibility and labour market performance	1
1.2 The concept of flexicurity	3
1.3 Labour markets in transition: Flexible but jobless	5
1.4 Towards flexicurity strategies in Central and South-Eastern Europe	7
2 Labour markets in Central and South-Eastern Europe: From transition to stabilization (<i>Sandrine Cazes and Alena Nesporova</i>)	9
2.1 Introduction	9
2.2 Recent labour market developments: Positive trends, persisting problems and new challenges	10
2.3 Increasing flexibilization of employment relations in Central and South-Eastern Europe	18
2.4 Labour market dynamics in the region: Recent trends	23
2.5 Employment protection legislation and its impact on labour market developments	35
2.6 Do labour market institutions still matter in CSEE countries?	42
Annex 2.1	55
3 Bulgaria (<i>Iskra Beleva, Vasil Tzanov and Genoveva Tisheva</i>)	57
3.1 Introduction	57
3.2 Main characteristics of the national labour market	58
3.3 Flexibility and security: Institutional background	69
3.4 Interaction between employment protection and labour market policies	80
3.5 Policy conclusions	88

Flexicurity

4	Croatia (<i>Sanja Crnković-Pozaić</i>)	93
4.1	Introduction	93
4.2	Labour market flexibility and employment stability	98
4.3	Labour market flexibility and income security	108
4.4	Policy recommendations: Addressing the challenge	117
5	Hungary (<i>János Köllő and Beáta Nacsá</i>)	121
5.1	Introduction	121
5.2	The basic facts	122
5.3	Flexibility and job security: The institutional background	126
5.4	Flexibility: Behavioural patterns and outcomes	133
5.5	Welfare schemes	140
5.6	Conclusions	147
	Annex 5.1	148
6	Lithuania (<i>Boguslavas Gruzevskis and Inga Blaziene</i>)	149
6.1	Introduction	149
6.2	Main characteristics and issues of the Lithuanian labour market	151
6.3	Flexibility and security: The institutional background	158
6.4	Interactions between employment protection and labour market policies	169
6.5	Policy conclusions	176
6.6	Future perspectives	179
7	Poland (<i>Gabriela Grotkowska, Mieczyslaw W. Socha and Urszula Sztanderska</i>)	181
7.1	Introduction	181
7.2	Labour market characteristics and issues	184
7.3	Flexibility and security: The institutional background	191
7.4	Labour market flexibility, employment and social protection	201
7.5	Policy conclusions	206
8	The wage dimension of flexibility and security in selected Central and South-Eastern European countries (<i>Mirco Tonin</i>)	213
8.1	Introduction	213
8.2	The wage formation system	214
8.3	Wage flexibility	217
8.4	Is there a wage floor? The minimum wage and unemployment benefits	226
8.5	The tax wedge	229
8.6	Conclusions	232
9	Policy conclusions (<i>Sandrine Cazes and Alena Nesporova</i>)	235
9.1	A summary of findings	235
9.2	Policy implications	239
	Bibliography	245
	Index	251

List of tables

2.1	Average annual growth rates of GDP and employment, CSEE countries, 2000–04 (percentages)	10
2.2	Aggregate (AUR) and youth (YUR) unemployment rates, CSEE countries, 2000 and 2004 (percentages)	14
2.3	Long-term unemployment as percentage of total unemployment, CSEE countries, 2000 and 2004	17
2.4	Self-employment as percentage of total employment by sex, CSEE countries, 2000 and 2004	18
2.5	Fixed-term contracts as percentage of total employment, CSEE countries, 2000 and 2004	20
2.6	Part-time employment as percentage of total employment, CSEE countries, 2000 and 2004	21
2.7	Accession rates, separation rates and labour turnover, selected CSEE countries, 1990–2003 (percentages)	25
2.8	Correlations between GDP and employment dynamics (E) versus labour turnover (LT), selected CSEE countries, 1999–2003	28
2.9	Distribution of employment by job tenure, selected CSEE countries, 2003 (percentages)	30
2.10	Distribution of employment by job tenure, selected CSEE countries, 1999 and 2003 (percentages)	31
2.11	Separation rates by destination of outflows from employment, selected CSEE countries, 1990–2003 (percentages)	32
2.12	Correlation coefficients of GDP and outflows from employment by destination, selected CSEE countries, 1999–2003	33
2.13	EPL strictness indices in selected EU member and candidate countries, 2003 compared with the late 1990s	37
2.14	Main characteristics of labour market institutions and policies in the CSEE countries, 2002–03	45
2.15	Regressions explaining the log unemployment rate (dependent variable) for selected CSEE and OECD countries, 2003 compared to the late 1990s	47
2.16	Regressions explaining the log long-term unemployment rate (dependent variable) for selected CSEE and OECD countries, 2003 compared to the late 1990s	48
2.17	Regressions explaining log youth unemployment rate (dependent variable) for selected CSEE and OECD countries, 2003 compared to the late 1990s	49
2.18	Regressions explaining the employment rate (dependent variable) for selected CSEE and OECD countries, 2003 compared to the late 1990s	51
2.19	Regressions explaining the labour force participation rate (dependent variable) for selected CSEE and OECD countries, 2003 compared to the late 1990s	52

Flexicurity

3.1	Registered and total unemployment in Bulgaria, 1993–2005 (thousands and percentages)	63
3.2	Unemployment flows, Bulgaria, 1992–2003 (numbers)	67
3.3	Expenditure on ALMP and PLMP as a percentage of total labour market policy spending, Bulgaria, 1993–2003	74
3.4	Participation in centrally funded ALMP programmes and measures, Bulgaria, 2001–03 (numbers and percentages)	77
3.5	Participation in training and retraining measures and programmes for the unemployed as percentage of total participants, Bulgaria, 1996–2004	79
4.1	Formal activity status of the employed, Croatia, 2002 and 2004 (numbers and percentages)	99
4.2	Worker remuneration and benefits, by employment status, Croatia, 2002 and 2004	100
4.3	Types of contract by duration, numbers and percentage of total employment, Croatia, 1997, 2002 and 2004	101
4.4	Duration of fixed-term contracts, numbers and percentage of total fixed-term employment, Croatia, 1997, 2002 and 2004	102
4.5	Characteristics of multiple-job holding, numbers and percentages of total employment, Croatia, 1998 and 2002	106
5.1	Employment–population and participation–population ratios by age, Hungary, 2002 (percentages)	122
5.2	Non-employment and unemployment at age 25–54 by status, Hungary, 1993 and 2001 (percentages)	123
5.3	Unskilled employment–population ratios in the OECD, 2002 (OLS regressions)	126
5.4	Employment contracts of all in employment and new hires, Hungary, April–June 2001 (percentages)	129
5.5	Estimates of the labour cost elasticity of labour demand for Hungary	137
5.6	Exit to new jobs versus re-entry to old jobs among UI recipients finding employment in April, Hungary, 1994 and 2001 (percentages)	138
5.7	The characteristics of newly hired workers, Hungary, 1998 (probabilistic regression)	139
5.8	Employees with 0–6 months' tenure as a percentage of total employment, Hungary, 1997–2001	140
5.9	The probability of exit to job from a childcare spell in 1995–2003 in Hungary (effects measured in a discrete time duration model)	145
5.10	Working hours and earnings of part-time workers, Hungary, April–June 2001	147
6.1	Labour market inflows (accession rate) and outflows (separation rate) as percentage of average employment, Lithuania, 2000–03	161

6.2	Migration to and from Lithuania, 2001–05	175
7.1	Participation rates, employment rates, unemployment rates, by sex, age and education as a percentage of the population, Poland, 1998 and 2004	185
7.2	Population, labour force and employment by sex and status of employment, Poland, 1998 and 2004 (thousands)	186
7.3	Distribution of employment by sex and level of education, Poland, 1998 and 2004 (percentages)	187
7.4	Unemployed by sex, age and level of education, Poland, 1998 and 2004 (percentages)	188
8.1	Bargaining, unionization and the informal economy, selected CSEE countries and EU15, late 1990s and early 2000s	217
8.2	Correlation coefficients of GDP per worker and real wages, selected CSEE countries, 1989–2003	220
8.3	Coefficient of variation of regional unemployment, selected CSEE countries, 1999–2003	222
8.4	Correlation coefficients of sectoral real wage (deflated by CPI) and sectoral value added per worker, selected CSEE countries, 1996 to early 2000s	224
8.5	Gross average earnings by educational achievement as a percentage of average earnings, selected CSEE countries, early 2000s	225
8.6	Gross average earnings by major occupational groups as a percentage of average earnings, selected CSEE countries, early 2000s	226
8.7	Main features of the tax system, selected CSEE countries and EU15, 2003	230
8.8	Tax wedge as a percentage of labour cost for single person without children earning average wage, selected CSEE countries, 1995–2003	231
8.9	Tax wedge on low wage earners, selected CSEE countries and EU15, 1996–2003	231

List of figures

2.1	Labour market participation rates (population aged 15–64), EU8+3 countries, 2000 and 2004 (percentages)	11
2.2	Labour market participation rates by sex (population aged 15–64), EU8+3 countries, 2000 and 2004 (percentages)	12
2.3	Employment rates, EU8+3 countries, 2000 and 2004 (percentages)	13
2.4	Employment rates by sex, EU8+3 countries, 2000 and 2004 (percentages)	13
2.5	Unemployment rates by sex as percentage of labour force, selected CSEE countries, 2000 and 2004 (percentages)	15
2.6	Youth unemployment rates (population aged 15–24) by sex, selected CSEE countries, 2000 and 2004 (percentages)	16

Flexicurity

2.7	Accession and separation rates within selected CSEE countries, 1990–2003 (percentages)	26
2.8	Labour market flows and GDP growth, selected CSEE countries, 1990–2005 (percentages)	34
2.9	Relationship between EPL strictness and aggregate unemployment, selected CSEE countries, 2003	39
2.10	Relationship between EPL strictness and temporary employment, selected CSEE countries, 2003	40
2.11	Relationship between EPL strictness and self-employment, selected CSEE countries, 2003	40
2.12	Relationship between EPL strictness and labour turnover, selected CSEE countries, 2003	41
3.1	Annual GDP and employment growth, Bulgaria, 1990–2005 (percentages)	59
3.2	Labour force participation, total and by sex, Bulgaria, 1993–2005 (percentages)	60
3.3	Employment, Bulgaria, 1993–2005 (thousands and percentages)	61
3.4	Discouraged workers as a percentage of inactive population and by sex, Bulgaria, 1994–2005	62
3.5	Number of unemployment benefit recipients (thousands) and the share of PLMP spending in GDP (percentages), Bulgaria, 1994–2005	75
3.6	Coverage rate of unemployment benefits and ratio of benefits to the average wage, Bulgaria, 1991–2005 (percentages)	82
3.7	Spending on ALMP as a percentage of GDP, Bulgaria, 1993–2005	83
3.8	Participants in ALMP as a percentage of total registered unemployed, Bulgaria, 1995–2003	84
3.9	Phillips curve showing the relationship between the unemployment rate and the nominal wage growth rate, Bulgaria, 1991–2003	86
4.1	Annual change in employment, unemployment and the labour force, Croatia, 1963–2005 (thousands)	94
4.2	Biannual employment figures from establishment data and the LFS, Croatia, 1996–2005 (thousands)	95
4.3	Registered and LFS unemployment, Croatia, 1988–2006 (thousands)	96
4.4	Average monthly employment 2000–04 and monthly employment 2005, Croatia (thousands)	97
4.5	Distribution of the duration of employment with current employer, Croatia, 1998, 2002 and 2004	103
4.6	Distribution of the duration of employment with current employer by sex, Croatia, 2002/03	104
4.7	Average wage by sex and job tenure, Croatia, 2004	104
4.8	Average wage by sex and age, Croatia, 2004	105

5.1	The distribution of the non-employed population in 2000 by year of last employment, Hungary (thousands)	125
5.2	Change of employment of pensioners and non-pensioners, by age and sex, Hungary, 1992–97 and 1997–2003 (percentages)	142
5.3	Components of change in the employment ratio by age, sex and pension status, Hungary, cumulated percentages 1997–2003	144
6.1	Actual and forecast number of employed persons (15–64 years) and employment rate (percentages), Lithuania, 2000–10	152
6.2	Registered unemployed, Lithuania, 1992–2005 (thousands)	153
6.3	Average annual unemployment rate, Lithuania, 1995–2005	154
6.4	Unemployment rate by age group, Lithuania, 2003 (percentages)	155
6.5	Distribution of the length of unemployment, Lithuania, 2005 (percentages)	156
6.6	Share of vocational qualifications among unemployed and employed persons, Lithuania, 2005 (percentages)	157
6.7	Job placements as a percentage of registered unemployed and annual real GDP growth, Lithuania, 1995–2003 (percentages)	164
6.8	Average unemployment benefits (UB) as a percentage of the average net wage (AW) and the minimum wage (MW), Lithuania, 1995–2005	167
6.9	Share of unemployed receiving unemployment benefits, Lithuania, 1992–2005 (percentages)	168
6.10	Shares of long-term unemployed, re-registered unemployed and newly registered unemployed in total unemployment, Lithuania, 2005	170
7.1	Employment, unemployment and out of the labour force, Poland, 1992–2004 (thousands)	181
8.1	Level of real wages, selected CSEE countries, 1989–2003	218
8.2	Productivity measured as GDP per worker, selected CSEE countries, 1989–2003	219
8.3	Sectoral wage dispersion measured by coefficient of variation, selected CSEE countries, 1993–2003	223
8.4	Minimum wage as a percentage of the average gross wage, selected CSEE countries, 1990–2003	227
