## Part I Introduction to the Human Visual System (HVS)

---

**1 Visual Attention** ..... 3

    1.1 Visual Attention: A Historical Review ..... 4

        1.1.1 Von Helmholtz’s “Where” ..... 4

        1.1.2 James’ “What” ..... 5

        1.1.3 Gibson’s “How” ..... 5

        1.1.4 Broadbent’s “Selective Filter” ..... 6

        1.1.5 Deutsch and Deutsch’s “Importance Weightings” ..... 6

        1.1.6 Yarbus and Noton and Stark’s “Scanpaths” ..... 7

        1.1.7 Posner’s “Spotlight” ..... 8

        1.1.8 Treisman’s “Glue” ..... 10

        1.1.9 Kosslyn’s “Window” ..... 10

    1.2 Visual Attention and Eye Movements ..... 11

    1.3 Summary and Further Reading ..... 13

**2 Neurological Substrate of the HVS** ..... 15

    2.1 The Eye ..... 18

    2.2 The Retina ..... 18

        2.2.1 The Outer Layer ..... 21

        2.2.2 The Inner Nuclear Layer ..... 21

        2.2.3 The Ganglion Layer ..... 22

    2.3 The Optic Tract and M/P Visual Channels ..... 23

    2.4 The Occipital Cortex and Beyond ..... 24

        2.4.1 Motion-Sensitive Single-Cell Physiology ..... 25

    2.5 Summary and Further Reading ..... 26

<b>3</b>	<b>Visual Psychophysics</b> .....	29
3.1	Spatial Vision .....	29
3.2	Temporal Vision .....	33
3.2.1	Perception of Motion in the Visual Periphery .....	35
3.2.2	Sensitivity to Direction of Motion in the Visual Periphery .....	36
3.3	Color Vision .....	36
3.4	Implications for Attentional Design of Visual Displays .....	38
3.5	Summary and Further Reading .....	39
<b>4</b>	<b>Taxonomy and Models of Eye Movements</b> .....	41
4.1	The Extraocular Muscles and the Oculomotor Plant .....	41
4.2	Saccades .....	42
4.3	Smooth Pursuits .....	45
4.4	Fixations .....	46
4.5	Nystagmus .....	47
4.6	Implications for Eye Movement Analysis .....	47
4.7	Summary and Further Reading .....	48

---

## Part II Eye Tracking Systems

---

<b>5</b>	<b>Eye Tracking Techniques</b> .....	51
5.1	Electro-OculoGraphy (EOG) .....	52
5.2	Scleral Contact Lens/Search Coil .....	52
5.3	Photo-OculoGraphy (POG) or Video-OculoGraphy (VOG) .....	53
5.4	Video-Based Combined Pupil/Corneal Reflection .....	54
5.5	Classifying Eye Trackers in "Mocap" Terminology .....	58
5.6	Summary and Further Reading .....	59
<b>6</b>	<b>Head-Mounted System Hardware Installation</b> .....	61
6.1	Integration Issues and Requirements .....	61
6.2	System Installation .....	64
6.3	Lessons Learned from the Installation at Clemson .....	66
6.4	Summary and Further Reading .....	67
<b>7</b>	<b>Head-Mounted System Software Development</b> .....	69
7.1	Mapping Eye Tracker Screen Coordinates .....	70
7.1.1	Mapping Screen Coordinates to the 3D Viewing Frustum .....	70
7.1.2	Mapping Screen Coordinates to the 2D Image .....	71
7.1.3	Measuring Eye Tracker Screen Coordinate Extents .....	72
7.2	Mapping Flock Of Birds Tracker Coordinates .....	74
7.2.1	Obtaining the Transformed View Vector .....	75
7.2.2	Obtaining the Transformed Up Vector .....	76
7.2.3	Transforming an Arbitrary Vector .....	77
7.3	3D Gaze Point Calculation .....	77

7.3.1	Parametric Ray Representation of Gaze Direction .....	80
7.4	Virtual Gaze Intersection Point Coordinates .....	81
7.4.1	Ray/Plane Intersection .....	81
7.4.2	Point-In-Polygon Problem .....	83
7.5	Data Representation and Storage .....	84
7.6	Summary and Further Reading .....	86
<b>8</b>	<b>Head-Mounted System Calibration</b> .....	<b>87</b>
8.1	Software Implementation .....	88
8.2	Ancillary Calibration Procedures .....	91
8.2.1	Internal 2D Calibration .....	92
8.2.2	Internal 3D Calibration .....	95
8.3	Summary and Further Reading .....	96
<b>9</b>	<b>Table-Mounted System Hardware Installation</b> .....	<b>101</b>
9.1	Integration Issues and Requirements .....	102
9.2	System Installation .....	104
9.3	Lessons Learned from the Installation at Clemson .....	105
9.4	Summary and Further Reading .....	106
<b>10</b>	<b>Table-Mounted System Software Development</b> .....	<b>109</b>
10.1	Linux Tobii Client Application Program Interface .....	110
10.1.1	Tet_Init .....	111
10.1.2	Tet_Connect, Tet_Disconnect .....	111
10.1.3	Tet_Start, Tet_Stop .....	112
10.1.4	Tet_CalibClear, Tet_CalibLoadFromFile, Tet_CalibSaveToFile, Tet_CalibAddPoint, Tet_CalibRemovePoints, Tet_CalibGetResult, Tet_CalibCalculateAndSet .....	112
10.1.5	Tet_SynchronizeTime, Tet_PerformSystemCheck .....	114
10.1.6	Tet_GetSerialNumber, Tet_GetLastError, Tet_GetLastErrorAsText .....	115
10.1.7	Tet_CallbackFunction .....	116
10.2	A Simple OpenGL/GLUT GUI Example .....	116
10.3	Caveats .....	121
10.4	Summary and Further Reading .....	121
<b>11</b>	<b>Table-Mounted System Calibration</b> .....	<b>125</b>
11.1	Software Implementation .....	126
11.2	Summary and Further Reading .....	134
<b>12</b>	<b>Eye Movement Analysis</b> .....	<b>137</b>
12.1	Signal Denoising .....	139
12.2	Dwell-Time Fixation Detection .....	139
12.3	Velocity-Based Saccade Detection .....	141
12.4	Eye Movement Analysis in Three Dimensions .....	144

12.4.1	Parameter Estimation	149
12.4.2	Fixation Grouping	152
12.4.3	Eye Movement Data Mirroring	153
12.5	Summary and Further Reading	153

---

## Part III Eye Tracking Methodology

---

<b>13</b>	<b>Experimental Design</b>	157
13.1	Formulating a Hypothesis	157
13.2	Forms of Inquiry	159
13.2.1	Experiments Versus Observational Studies	159
13.2.2	Laboratory Versus Field Research	160
13.2.3	Idiographic Versus Nomothetic Research	160
13.2.4	Sample Population Versus Single-Case Experiment Versus Case Study	161
13.2.5	Within-Subjects Versus Between-Subjects	162
13.2.6	Example Designs	163
13.3	Measurement and Analysis	166
13.4	Summary and Further Reading	169
<b>14</b>	<b>Suggested Empirical Guidelines</b>	171
14.1	Evaluation Plan	172
14.1.1	Data Collection	172
14.1.2	System Identification	175
14.1.3	Constraints	175
14.1.4	User Selection	176
14.1.5	Evaluation Locale	176
14.1.6	Task Selection	177
14.2	Practical Advice	178
14.3	Considering Dynamic Stimulus	179
14.4	Summary and Further Reading	179
<b>15</b>	<b>Case Studies</b>	181
15.1	Head-Mounted VR Diagnostics: Visual Inspection	182
15.1.1	Case Study Notes	183
15.2	Head-Mounted VR Diagnostics: 3D Maze Navigation	183
15.2.1	Case Study Notes	184
15.3	Desktop VR Diagnostics: Driving Simulator	185
15.3.1	Case Study Notes	186
15.4	Desktop Diagnostics: Usability	187
15.4.1	Case Study Notes	195
15.5	Desktop Interaction: Gaze-Contingent Fisheye Lens	197
15.5.1	Case Study Notes	201
15.6	Summary and Further Reading	201

---

## Part IV Eye Tracking Applications

---

<b>16 Diversity and Types of Eye Tracking Applications</b> .....	205
16.1 Summary and Further Reading .....	206
<b>17 Neuroscience and Psychology</b> .....	207
17.1 Neurophysiological Investigation of Illusory Contours .....	208
17.2 Attentional Neuroscience .....	208
17.3 Eye Movements and Brain Imaging .....	211
17.4 Reading .....	213
17.5 Scene Perception .....	216
17.5.1 Perception of Art .....	220
17.5.2 Perception of Film .....	221
17.6 Visual Search .....	222
17.6.1 Computational Models of Visual Search .....	229
17.7 Natural Tasks .....	233
17.8 Eye Movements in Other Information Processing Tasks .....	237
17.9 Summary and Further Reading .....	240
<b>18 Industrial Engineering and Human Factors</b> .....	241
18.1 Aviation .....	241
18.2 Driving .....	244
18.3 Visual Inspection .....	250
18.4 Summary and Further Reading .....	260
<b>19 Marketing/Advertising</b> .....	261
19.1 Copy Testing .....	263
19.2 Print Advertising .....	264
19.3 Ad Placement .....	267
19.4 Television Enhancements .....	269
19.5 Web Pages .....	270
19.6 Product Label Design .....	273
19.7 Summary and Further Reading .....	274
<b>20 Computer Science</b> .....	275
20.1 Human-Computer Interaction and Collaborative Systems .....	275
20.1.1 Classic Eye-Based Interaction .....	276
20.1.2 Cognitive Modeling .....	277
20.1.3 Universal Accessibility .....	279
20.1.4 Indirect Eye-Based Interaction .....	281
20.1.5 Attentive User Interfaces (AUIs) .....	282
20.1.6 Usability .....	283
20.1.7 Collaborative Systems .....	284
20.2 Gaze-Contingent Displays .....	285

20.2.1	Screen-Based Displays .....	286
20.2.2	Model-Based Graphical Displays .....	292
20.3	Summary and Further Reading .....	300
<b>21</b>	<b>Conclusion</b> .....	301
	<b>References</b> .....	303
	<b>Index</b> .....	321

---

# List of Figures

1.1	The Kanizsa illusion . . . . .	8
1.2	Yarbus' early eye movement recordings . . . . .	9
2.1	A simplified view of the brain and the visual pathways . . . . .	17
2.2	Stylized classification of cortical lobes . . . . .	17
2.3	The eye . . . . .	19
2.4	Schematic diagram of retinal neural interconnections . . . . .	20
2.5	Schematic of the neuron . . . . .	21
2.6	Schematic of receptive fields . . . . .	23
2.7	Foveo-peripheral illusion . . . . .	27
3.1	Visual angle . . . . .	30
3.2	Density distributions of rod and cone receptors: visual angle . . . . .	31
3.3	Density distributions of rod and cone receptors: rod/cone density . . . . .	32
3.4	Visual acuity at various eccentricities and light levels . . . . .	34
3.5	Critical Fusion Frequency . . . . .	35
3.6	Absolute thresholds for detecting peripheral rotary movement . . . . .	36
3.7	Visual fields for monocular color vision (right eye) . . . . .	37
4.1	Extrinsic muscles of the eye . . . . .	42
4.2	Schematic of the oculomotor system . . . . .	43
4.3	Simple linear filter modeling saccadic movements . . . . .	45
4.4	Simple linear feedback model of smooth pursuit movements . . . . .	46
5.1	Example of electro-oculography (EOG) measurement . . . . .	52
5.2	Example of search coil eye movement measurement apparatus . . . . .	53
5.3	Example of scleral suction ring insertion . . . . .	54
5.4	Examples of pupil, limbus, and corneal reflection . . . . .	55
5.5	Example of table-mounted video-based eye tracker . . . . .	56
5.6	Example of head-mounted video-based eye tracker . . . . .	56
5.7	Purkinje images . . . . .	57

5.8	Relative positions of pupil and first Purkinje images .....	58
5.9	Dual-Purkinje eye tracker .....	58
6.1	Virtual Reality Eye Tracking lab at Clemson University .....	63
6.2	Video signal wiring of the VRET lab at Clemson University .....	65
7.1	Eye tracker to VR mapping .....	71
7.2	Example mapping measurement .....	73
7.3	Euler angles .....	75
7.4	Basic binocular geometry .....	78
7.5	Ray/plane geometry .....	82
7.6	Point-in-polygon geometry .....	84
7.7	Example of three-dimensional gaze point captured in VR .....	85
8.1	Eye images during calibration (binocular eye tracking HMD) .....	89
8.2	Calibration stimulus .....	95
8.3	Typical per-trial calibration data (one subject) .....	96
8.4	Composite calibration data showing eye tracker slippage .....	97
8.5	Adjustment of left and right eye scale factors .....	98
9.1	Tobii dual-head eye tracking stations at Clemson University .....	101
9.2	Single Tobii eye tracking station hardware setup .....	105
11.1	Tobii eye tracking status window .....	126
11.2	Tobii concurrent process layout .....	127
12.1	Hypothetical eye movement signal .....	138
12.2	Eye movement signal denoising .....	140
12.3	Saccade/fixation detection .....	142
12.4	Idealized saccade detection .....	143
12.5	Finite Impulse Response (FIR) filters for saccade detection .....	144
12.6	Characteristic saccade signal and filter responses .....	147
12.7	FIR filters .....	149
12.8	Acceleration thresholding .....	149
12.9	Eye movement signal and filter responses .....	151
12.10	Heuristic mirroring example and calculation .....	153
13.1	Single-subject, time series design .....	163
13.2	Factorial design examples .....	164
14.1	Usability measurement framework .....	172
14.2	Traditional eye tracking metrics .....	173
14.3	Scanpath comparison $Y$ -matrices and parsing diagrams .....	174
14.4	Eye Tracking Lab at Clemson University .....	177
15.1	Head-mounted and desktop (binocular) eye trackers .....	181

15.2	Eye tracking data of expert inspector and feedforward training display .....	182
15.3	Performance and process measures: relative difference (%) .....	183
15.4	Simple 3D maze with 2D map .....	184
15.5	Low-fidelity desktop VR driving simulator and scanpaths .....	185
15.6	“Hotspots” from expert’s ~14.5 min eye tracking session .....	188
15.7	Mean completion times of all users and expert .....	192
15.8	Example of problematic Properties dialog selection .....	194
15.9	Exemplar errant visual search for Edit button. ....	195
15.10	Fixation “hotspots” and selected AOIs. ....	196
15.11	Fixations per AOI (overall, with SE whiskers) .....	197
15.12	Look-ahead saccades for click-and-drag .....	198
15.13	The Pliable Display Technology (PDT) fisheye lens .....	199
15.14	Gaze-contingent fisheye lens stimulus and performance results .....	200
16.1	Hierarchy of eye tracking applications .....	206
17.1	Example of eye tracking fMRI scanner .....	212
17.2	Fixation map from subjects viewing Paolo Veronese painting .....	222
17.3	Fixations from subjects viewing Paolo Veronese painting .....	223
17.4	Example of “pop-out” effect .....	225
17.5	Architecture of Guided Search 3.0 .....	230
17.6	Architecture of Itti et al.’s visual attention system .....	231
17.7	String editing example .....	232
17.8	Eye tracking in a natural pick-and-place task .....	236
17.9	Eye tracking in a natural hand-washing task .....	237
18.1	A330 cockpit with predefined areas of interest .....	242
18.2	High-clutter driving stimulus images .....	248
18.3	Model of visual search area, visual lobe, and targets .....	253
18.4	Models of visual search .....	254
18.5	Example of visual search model .....	255
18.6	Virtual aircraft inspection simulator .....	258
18.7	Visualization of 3D scanpath in VR .....	259
19.1	Model of market and consumer actions .....	262
19.2	Scanpaths over advertisements .....	268
19.3	Scanpaths over NASCAR™ vehicles .....	269
19.4	Google’s golden triangle .....	271
19.5	Web search layout “hotspots” .....	272
19.6	Scanpaths over redesigned drug labels .....	273
20.1	Scanning behavior during program debugging .....	278
20.2	Example of eye typing interface .....	279
20.3	A drawing created solely with eye movements by an <i>EyeDraw</i> developer .....	280

20.4	ViewPointer headset, tag, and usage . . . . .	283
20.5	GAZE Groupware display . . . . .	285
20.6	GAZE Groupware interface . . . . .	285
20.7	Example gaze-contingent displays . . . . .	288
20.8	Image reconstruction and wavelet resolution mapping . . . . .	291
20.9	Fractal terrain for gaze-contingent virtual environment . . . . .	294
20.10	Fractal terrain: gaze-contingent rendering (wireframe) . . . . .	295
20.11	Fractal terrain: gaze-contingent rendering . . . . .	296
20.12	Gaze-contingent viewing of <i>Isis</i> model . . . . .	298
20.13	Gaze-contingent collision modeling . . . . .	299

---

## List of Tables

2.1	Functional characteristics of ganglionic projections .....	24
3.1	Common visual angles .....	30
7.1	Euler angles .....	75
10.1	Linux Tobii client API function listing .....	110
12.1	Velocity algorithm comparisons .....	152
12.2	Acceleration algorithm comparisons .....	152
13.1	Statistical tests of difference of sample pairs ( $df = 1$ ) .....	168
13.2	Statistical tests of difference of multivariate data ( $df > 1$ ) .....	168
15.1	Example Software Usability Task durations .....	188
15.2	Example Software Usability Test task 003 .....	189
15.3	Example Software Usability Test task 006 .....	190
15.4	Task-specific mean responses over all tasks .....	191
15.5	General mean responses .....	191
17.1	Reading strategies/tactics .....	216
