Introduction	xix
Part I. The Spread of ICT and Productivity Growth: Is Europe Really Lagging Behind in the New Economy? (Edited by Stefano Scarpetta)	1
<i>Eric Bartelsman, Andrea Bassanini, John Haltiwanger, Ronald S. Jarmin, and Thorsten Schank</i>	
Introduction and Overview	3
1. The Role of ICT in Shaping Growth Patterns in the United States and Other OECD Countries?—Some Aggregate Evidence	11
1.1. <i>Some stylized facts about GDP growth and its main drivers</i>	11
1.2. <i>The role of ICT</i>	18
1.3. <i>Summary</i>	28
2. Scraping the Surface: What Lies Behind Aggregate Growth Patterns? Industry- and Firm-level Evidence	30
2.1. <i>The composition of aggregate productivity growth: the ICT sector and beyond</i>	30
2.2. <i>Firm dynamics and productivity growth: evidence from firm-level data</i>	35
2.3. <i>Summing up</i>	48
3. Productivity, Investment in ICT, Human Capital, and Changes in the Organization of Work: Micro Evidence from Germany and the United States	50
3.1. <i>Introduction</i>	50
3.2. <i>Data description</i>	54

3.3. <i>The relationship between productivity, wages, and advanced technology</i>	58
3.4. <i>Experimentation? Differences across Germany and the United States</i>	62
3.5. <i>Summary and interpretation</i>	67
4. ICT and Growth: The Role of Factor and Product Markets	69
4.1. <i>Introduction</i>	69
4.2. <i>ICT as an investment good</i>	70
4.3. <i>ICT adoption as an innovative activity</i>	71
4.4. <i>The growth channels</i>	74
4.5. <i>Market institutions: the role of product and factor markets</i>	77
4.6. <i>Summary</i>	81
5. Do Policy and Regulatory Settings Help to Explain Industry Differences in Productivity and Innovation Activities Across OECD Countries?	83
5.1. <i>Introduction</i>	83
5.2. <i>Existing empirical evidence</i>	84
5.3. <i>The empirical evidence on the links between policy, institutions, and performance</i>	94
5.4. <i>Concluding remarks</i>	111
Appendix	113
Comments	125
<i>Robert J. Gordon</i>	125
<i>Alan B. Krueger</i>	129

Part II. Internet: The Elusive Quest of a Frictionless Economy (Edited by Daniel Cohen)	141
<i>Bruno Amable, Philippe Askenazy, Andrea Goldstein, and David O'Connor</i>	
Introduction and Overview	143
6. Markets and Consumers	149
6.1. <i>Internet makes life more complex</i>	150
6.2. <i>Case studies: the lasting role of F2F</i>	153
6.3. <i>Real estate in Paris</i>	160
6.4. <i>Conclusion</i>	161

7. Firms and Suppliers (B...2B or not 2B?)	163
7.1. The key role of quality certification	164
7.2. E-integration and spatial location	174
8. Supply Chains, Market Access, and the Internet:	
A View from the South	181
8.1. Software development	183
8.2. Clothing	194
8.3. Ornamental horticulture	202
8.4. Coffee	207
8.5. Travel and tourism	215
8.6. Main findings and policy implications	220
Appendices	226
<i>Appendix 1</i>	226
<i>Appendix 2</i>	227
<i>Appendix 3</i>	230
Comments	232
<i>John Martin</i>	232
<i>Jan Svejnar</i>	237
<i>References</i>	240
Final Remarks	247
<i>Gøsta Esping-Andersen</i>	247
<i>Paul Geroski</i>	250
<i>Index</i>	259

List of Figures

1.1. Growth of GDP per capita in the OECD area over the 1980s and the 1990s	15
1.2. The share of the ICT sector in total GDP, 1998	19
1.3. Contribution of the electrical machinery industry to total labour productivity in manufacturing	20
1.4. The contribution of ICT capital to output growth	23
1.5. Different measures of the trend MFP annual growth rates for the United States, 1970–2000	27
1.6. Change in MFP growth and ICT expenditure, 1990–1999	27
1.7. Change in MFP growth and change in PC intensity, 1990–1999	28
2.1. Decomposition of business sector labour productivity into intrasectoral productivity growth and intersectoral employment shifts (1990–1998)	31
2.2. Comparative advantage in ICT products	32
2.3. Labour productivity growth in ICT-using services, 1989–1995 and 1995–1999	33
2.4. Labour productivity contributions by selected service industries (in % point)	34
2.5. Decomposition of labour productivity growth in manufacturing	39
2.6. Contribution of new entry to labour productivity growth in manufacturing and selected ICT industries	41
2.7. Turnover rates in OECD countries, 1989–1994	42
2.8. Estimated industry entry rates relative to the total business sector	44
2.9. Firm survivor rates at different lifetimes	45
2.10. Net employment gains among surviving firms at different lifetimes, 1990s	46
2.11. Employment gains among surviving firms in high-tech industries	47
3.1. Average employment by age	63
3.2. Productivity dispersion by age	63
3.3. Investment dispersion by age (normalized)	64
3.4. Active vs. inactive gap in mean and dispersion of productivity	65
3.5. Active vs. inactive gap in mean and dispersion of skill mix	66
3.6. Active vs. inactive gap in productivity dispersion	67
5.1. Changes in R&D intensity and MFP acceleration	87

5.2. Patents per capita and product market regulation	88
5.3. Patents per capita and IPR protection	89
5.4. Acceleration of MFP, change in PMR, and change in protection of IPRs	90
5.5. Regulatory changes as predictors of the acceleration of MFP growth	91
5.6. The R&D equation: sensitivity analysis—variation of country coverage	107
6.1. PAP estimates of the time between the posting of the advert and the transaction (Parisian apartments, 1997–2002)	162
7.1. Number of ISO9000 certificates (logarithmic scale)	167
7.2. ISO9000 certification and the propensity of SMEs to trade B2B	169
8.1. Indian software industry market segments	185
8.2. US clothing imports	195
8.3. Clothing labour costs	196
8.4. The coffee value chain	208
