<i>Foreword to A Compendium of Continuous Lattices</i>	<i>xxiii</i>
<i>Introduction to A Compendium of Continuous Lattices</i>	<i>xxvii</i>
O A Primer on Ordered Sets and Lattices	1
O-1 Generalities and Notation	1
Exercises	7
Old notes	8
O-2 Completeness Conditions for Lattices and Posets	8
Exercises	17
Old notes	21
New notes	22
O-3 Galois Connections	22
Exercises	31
Old notes	35
O-4 Meet Continuous Lattices and Semilattices	36
Exercises	39
Old notes	41
O-5 T_0 Spaces and Order	41
Exercises	45
New notes	47
I Order Theory of Domains	48
I-1 The “Way-below” Relation	49
The way-below relation and continuous posets	49
Auxiliary relations	57
Important examples	62

	Exercises	71
	Old notes	75
	New notes	78
I-2	Products, Substructures and Quotients	79
	Products, projection, kernel and closure operators on domains	79
	Equational theory of continuous lattices	83
	Exercises	90
	Old notes	93
	New notes	94
I-3	Irreducible elements	95
	Open filters and irreducible elements	95
	Distributivity and prime elements	98
	Pseudoprime elements	106
	Exercises	108
	Old notes	114
I-4	Algebraic Domains and Lattices	115
	Compact elements, algebraic and arithmetic domains	115
	Products, kernel and closure operators	119
	Completely irreducible elements	125
	Exercises	127
	Old notes	129
	New notes	129
II	The Scott Topology	131
II-1	The Scott Topology	132
	Scott convergence	132
	The Scott topology of domains	138
	The Hofmann–Mislove Theorem	144
	Exercises	151
	Old notes	155
	New notes	156
II-2	Scott-Continuous Functions	157
	Scott-continuous functions	157
	Function spaces and cartesian closed categories of dcpos	161
	FS-domains and bifinite domains	165
	Exercises	171
	Old notes	176
	New notes	176

II-3	Injective Spaces	176
	Injective and densely injective spaces	177
	Monotone convergence spaces	182
	Exercises	185
	Old notes	187
	New notes	187
II-4	Function Spaces	187
	The Isbell topology	187
	Spaces with a continuous topology	190
	On \mathbf{dcpos} with a continuous Scott topology	197
	Exercises	204
	Old notes	206
	New notes	207
III	The Lawson Topology	208
III-1	The Lawson Topology	209
	Exercises	216
	Old notes	218
III-2	Meet Continuity Revisited	219
	Exercises	224
	Old notes	225
	New notes	226
III-3	Quasicontinuity and Liminf Convergence	226
	Quasicontinuous domains	226
	The Lawson topology and Liminf convergence	231
	Exercises	236
	Old notes	240
	New notes	240
III-4	Bases and Weights	240
	Exercises	249
	Old notes	252
	New notes	252
III-5	Compact Domains	253
	Exercises	261
	New notes	263
IV	Morphisms and Functors	264
IV-1	Duality Theory	266
	Exercises	279
	Old notes	279

IV-2	Duality of Domains	280
	Exercises	289
	New notes	290
IV-3	Morphisms into Chains	290
	Exercises	301
	Old notes	304
IV-4	Projective Limits	305
	Exercises	317
	Old notes	317
IV-5	Pro-continuous and Locally Continuous	
	Functors	318
	Exercises	329
	Old notes	330
	New notes	330
IV-6	Fixed-Point Constructions for Functors	330
	Exercises	340
	New notes	342
IV-7	Domain Equations and Recursive Data Types	343
	Domain equations for covariant functors	344
	Domain equations for mixed variance functors	351
	Examples of domain equations	355
	Exercises	357
	New notes	358
IV-8	Powerdomains	359
	The Hoare powerdomain	361
	The Smyth powerdomain	363
	The Plotkin powerdomain	364
	Exercises	372
	New notes	374
IV-9	The Extended Probabilistic Powerdomain	374
	Exercises	391
	New notes	392
V	Spectral Theory of Continuous Lattices	394
V-1	The Lemma	395
	Exercises	399
	Old notes	399
V-2	Order Generation and Topological Generation	400
	Exercises	402
	Old notes	403

V-3	Weak Irreducibles and Weakly Prime Elements	403
	Exercises	406
	Old notes	407
V-4	Sober Spaces and Complete Lattices	408
	Exercises	414
	Old notes	415
V-5	Duality for Distributive Continuous Lattices	415
	Exercises	423
	Old notes	429
V-6	Domain Environments	431
	Exercises	437
	New notes	437
VI	Compact Posets and Semilattices	439
VI-1	Pospaces and Topological Semilattices	440
	Exercises	444
	Old notes	445
VI-2	Compact Topological Semilattices	445
	Exercises	449
	Old notes	450
VI-3	The Fundamental Theorem of Compact Semilattices	450
	Exercises	457
	Old notes	462
VI-4	Some Important Examples	462
	Old notes	467
VI-5	Chains in Compact Pospaces and Semilattices	468
	Exercises	472
	Old notes	473
VI-6	Stably Compact Spaces	474
	Exercises	484
	New notes	486
VI-7	Spectral Theory for Stably Compact Spaces	486
	Exercises	489
	Old notes	491
VII	Topological Algebra and Lattice Theory: Applications	492
VII-1	One-Sided Topological Semilattices	493
	Exercises	498
	Old notes	499

VII-2 Topological Lattices	499
Exercises	504
Old notes	507
New notes	508
VII-3 Hypercontinuity and Quasicontinuity	508
Exercises	515
New notes	515
VII-4 Lattices with Continuous Scott Topology	515
Exercises	521
Old notes	522
 <i>Bibliography</i>	523
Books, Monographs, and Collections	523
Conference Proceedings	526
Articles	528
Dissertations and Master's Theses	559
Memos Circulated in the Seminar on Continuity in	
Semilattices (SCS)	564
<i>List of Symbols</i>	568
<i>List of Categories</i>	572
<i>Index</i>	575
