PART TWO Elaboration

4 Defining the Word-Form
   4.1 Phonological criteria
      4.1.1 Stress
      4.1.2 Vowel harmony
      4.1.3 Phonological processes
   4.2 Morphological and syntactic criteria

5 Productivity
   5.1 Productivity as a cline
   5.2 Productivity as synchronic
   5.3 Potential words and productivity in the individual
   5.4 Blocking
   5.5 Defining the productivity of a process
      5.5.1 So-called limitations on productivity
      5.5.2 So-called semi-productivity
      5.5.3 Measuring productivity

6 Inflection and Derivation
   6.1 Meaning
   6.2 Derivation may cause a change of category
   6.3 Inflectional affixes have a regular meaning
   6.4 Inflection is productive, derivation semi-productive
   6.5 Derivational affixes are nearer the root than
      inflectional ones
   6.6 Derivatives can be replaced by monomorphemic
      forms
   6.7 Inflection uses a closed set of affixes
   6.8 Inflectional morphology is what is relevant to the
      syntax
   6.9 A first conclusion
   6.10 An alternative conclusion

7 What is a Morpheme?
   7.1 Problems with morphemes
   7.2 Some other views of the morpheme
   7.3 From morpheme to morphome
   7.4 Can we have morphology without morphemes?

8 The Domain of Morphology
   8.1 Links with phonology
   8.2 Links with syntax
      8.2.1 Clitics
      8.2.2 Compounds
   8.3 Concluding remarks
PART THREE Issues

9 Recognising Morphemes
  9.1 Affixes
  9.2 Bases
  9.3 A proposal for limiting abstractness
  9.4 What are the alternatives?
    9.4.1 Phonological
    9.4.2 Semantic
    9.4.3 Syntactic
    9.4.4 Etymological
    9.4.5 Back to morphs

10 Lexicalist Morphology
  10.1 Why the lexicon?
  10.2 The function of a morphology
  10.3 Full entry theory
  10.4 Strata in the morphology
  10.5 Heads and feature percolation
  10.6 Other considerations
  10.7 A closer look at stratal theories
  10.8 Review: Lexicalist Morphology

11 Word-and-Paradigm Morphology
  11.1 The distinctiveness of WP
  11.2 An example
  11.3 Synopsis

12 Non-Linear Approaches to Morphology
  12.1 Some concepts and terminology
  12.2 Arabic transfixes or root-and-pattern morphology
  12.3 Reduplication
  12.4 Infixation
  12.5 Taking it further

13 Morphological Typology and Universals
  13.1 Morphological typology
  13.2 Universals concerning order
  13.3 Implicational universals
  13.4 Paradigm-centred universals

14 Natural Morphology
  14.1 Naturalness
  14.2 Conflicts of naturalness
  14.3 Implications
  14.4 Conclusion
# Contents

15 Diachronic Morphology 268
   15.1 Where does morphology come from? 268
      15.1.1 Reanalysis 268
      15.1.2 Grammaticalisation 269
   15.2 Where does morphology go? 272
   15.3 How does morphology change? 273

16 Morphology in the Mind 280
   16.1 Connectionism and the dual route 281
   16.2 Morphemes 285
   16.3 The suffixing preference 289
   16.4 Envoi 291

Appendix A: Morphological analysis 295
Appendix B: Discussion of selected exercises 303
Appendix C: Glossary 324
