## PREFACE xiii

<b>1 The Return of Monetary Rules</b>	<b>1</b>
<b>1 The Importance of Price Stability</b>	<b>4</b>
1.1 Toward a New "Neoclassical Synthesis" 6	
1.2 Microeconomic Foundations and Policy Analysis 10	
<b>2 The Importance of Policy Commitment</b>	<b>14</b>
2.1 Central Banking as Management of Expectations 15	
2.2 Pitfalls of Conventional Optimal Control 18	
<b>3 Monetary Policy without Control of a Monetary Aggregate</b>	<b>24</b>
3.1 Implementing Interest-Rate Policy 25	
3.2 Monetary Policy in a Cashless Economy 31	
<b>4 Interest-Rate Rules</b>	<b>37</b>
4.1 Contemporary Proposals 39	
4.2 General Criticisms of Interest-Rate Rules 44	
4.3 Neo-Wicksellian Monetary Theory 49	
<b>5 Plan of the Book</b>	<b>55</b>

## PART I

### Analytical Framework

<b>2 Price-Level Determination under Interest-Rate Rules</b>	<b>61</b>
<b>1 Price-Level Determination in a Cashless Economy</b>	<b>62</b>
1.1 An Asset-Pricing Model with Nominal Assets 64	
1.2 A Wicksellian Policy Regime 74	
<b>2 Alternative Interest-Rate Rules</b>	<b>85</b>
2.1 Exogenous Interest-Rate Targets 86	

2.2	The Taylor Principle and Determinacy	90
2.3	Inertial Responses to Inflation Variation	94
<b>3</b>	<b>Price-Level Determination with Monetary Frictions</b>	<b>101</b>
3.1	A Model with Transactions Frictions	102
3.2	Interest-Rate Rules Reconsidered	105
3.3	A Comparison with Money-Growth Targeting	106
3.4	Consequences of Nonseparable Utility	111
<b>4</b>	<b>Self-Fulfilling Inflations and Deflations</b>	<b>123</b>
4.1	Global Multiplicity Despite Local Determinacy	123
4.2	Policies to Prevent a Deflationary Trap	131
4.3	Policies to Prevent an Inflationary Panic	135
<b>3</b>	<b>Optimizing Models with Nominal Rigidities</b>	<b>139</b>
<b>1</b>	<b>A Basic Sticky-Price Model</b>	<b>143</b>
1.1	Pricesetting and Endogenous Output	143
1.2	Consequences of Prices Fixed in Advance	155
1.3	A New Classical Phillips Curve	158
1.4	Sources of Strategic Complementarity	163
<b>2</b>	<b>Inflation Dynamics with Staggered Pricesetting</b>	<b>173</b>
2.1	The Calvo Model of Pricesetting	177
2.2	A New Keynesian Phillips Curve	187
2.3	Persistent Real Effects of Nominal Disturbances	188
2.4	Consequences of Persistence in the Growth of Nominal Spending	197
2.5	Consequences of Sectoral Asymmetries	200
<b>3</b>	<b>Delayed Effects of Nominal Disturbances on Inflation</b>	<b>204</b>
3.1	Staggered Pricing with Delayed Price Changes	207
3.2	Consequences of Indexation to Past Inflation	213
<b>4</b>	<b>Consequences of Nominal Wage Stickiness</b>	<b>218</b>
4.1	A Model of Staggered Wagesetting	221
4.2	Sticky Wages and the Real Effects of Nominal Disturbances	226
<b>4</b>	<b>A Neo-Wicksellian Framework for the Analysis of Monetary Policy</b>	<b>237</b>
<b>1</b>	<b>A Basic Model of the Effects of Monetary Policy</b>	<b>238</b>
1.1	Nonlinear Equilibrium Conditions	239
1.2	A Log-Linear Approximate Model	243
<b>2</b>	<b>Interest-Rate Rules and Price Stability</b>	<b>247</b>
2.1	The Natural Rate of Interest	247
2.2	Conditions for Determinacy of Equilibrium	252

2.3	Stability under Learning Dynamics	261
2.4	Determinants of Inflation	276
2.5	Inflation Stabilization through Commitment to a Taylor Rule	286
2.6	Inflation Targeting Rules	290
<b>3</b>	<b>Money and Aggregate Demand</b>	<b>295</b>
3.1	An Optimizing IS-LM Model	295
3.2	Real-Balance Effects	299
<b>4</b>	<b>Fiscal Requirements for Price Stability</b>	<b>311</b>
<b>5</b>	<b>Dynamics of the Response to Monetary Policy</b>	<b>320</b>
<b>1</b>	<b>Delayed Effects of Monetary Policy</b>	<b>321</b>
1.1	Consequences of Predetermined Expenditure	322
1.2	Habit Persistence in Private Expenditure	332
<b>2</b>	<b>Some Small Quantitative Models</b>	<b>336</b>
2.1	The Rotemberg-Woodford Model	336
2.2	More Complex Variants	345
<b>3</b>	<b>Monetary Policy and Investment Dynamics</b>	<b>352</b>
3.1	Investment Demand with Sticky Prices	353
3.2	Optimal Pricesetting with Endogenous Capital	357
3.3	Comparison with the Basic Neo-Wicksellian Model	361
3.4	Capital and the Natural Rate of Interest	372
 <b>PART II</b>		
<b>Optimal Policy</b>		
<b>6</b>	<b>Inflation Stabilization and Welfare</b>	<b>381</b>
<b>1</b>	<b>Approximation of Loss Functions and Optimal Policies</b>	<b>383</b>
<b>2</b>	<b>A Utility-Based Welfare Criterion</b>	<b>392</b>
2.1	Output-Gap Stability and Welfare	393
2.2	Inflation and Relative-Price Distortions	396
<b>3</b>	<b>The Case for Price Stability</b>	<b>405</b>
3.1	The Case of an Efficient Natural Rate of Output	407
3.2	Consequences of a Mildly Inefficient Natural Rate of Output	411
3.3	Caveats	416
<b>4</b>	<b>Extensions of the Basic Analysis</b>	<b>419</b>
4.1	Transactions Frictions	420
4.2	The Zero Interest-Rate Lower Bound	427
4.3	Asymmetric Disturbances	435

4.4	Sticky Wages and Prices	443
4.5	Time-Varying Tax Wedges or Markups	448
<b>5</b>	<b>The Case of Larger Distortions</b>	<b>455</b>
<b>7</b>	<b>Gains from Commitment to a Policy Rule</b>	<b>464</b>
<b>1</b>	<b>The Optimal Long-Run Inflation Target</b>	<b>468</b>
1.1	The Inflationary Bias of Discretionary Policy	469
1.2	Extensions of the Basic Analysis	476
<b>2</b>	<b>Optimal Responses to Disturbances</b>	<b>484</b>
2.1	Cost-Push Shocks	486
2.2	Fluctuations in the Natural Rate of Interest	501
<b>3</b>	<b>Optimal Simple Policy Rules</b>	<b>507</b>
3.1	The Optimal Noninertial Plan	510
3.2	The Optimal Taylor Rule	513
<b>4</b>	<b>The Optimal State-Contingent Instrument Path as a Policy Rule</b>	<b>517</b>
<b>5</b>	<b>Commitment to an Optimal Targeting Rule</b>	<b>521</b>
5.1	Robustly Optimal Target Criteria	522
5.2	Implementation of a Targeting Rule	527
<b>8</b>	<b>Optimal Monetary Policy Rules</b>	<b>534</b>
<b>1</b>	<b>A General Linear-Quadratic Framework</b>	<b>535</b>
1.1	Optimal State-Contingent Paths	536
1.2	Alternative Forms of Policy Rules	543
1.3	Robustness to Alternative Types of Disturbances	547
1.4	Existence of Robustly Optimal Policy Rules	550
1.5	Optimal Instrument Rules	555
<b>2</b>	<b>Optimal Inflation Targeting Rules</b>	<b>559</b>
2.1	A Model with Inflation Inertia	560
2.2	A Model with Wages and Prices Both Sticky	565
2.3	A Model with Habit Persistence	568
2.4	Predetermined Spending and Pricing Decisions	569
2.5	Optimal Policy for a Small Quantitative Model	573
<b>3</b>	<b>Optimal Interest-Rate Rules</b>	<b>582</b>
3.1	An Optimal Rule for the Basic Neo-Wicksellian Model	583
3.2	Consequences of Inflation Inertia	592
3.3	Predetermined Spending and Pricing Decisions	604
3.4	Optimal Policy under Imperfect Information	606
<b>4</b>	<b>Reflections on Currently Popular Policy Proposals</b>	<b>610</b>
4.1	The Taylor Rule	610
4.2	Inflation-Forecast Targeting	619

## APPENDIXES

<b>A</b>	<b>Addendum to Chapter 2</b>	<b>627</b>
A.1	Proof of Proposition 2.1	627
A.2	Proof of Proposition 2.2	628
A.3	Log-Linearization and Determinacy of Equilibrium	630
A.4	Proof of Proposition 2.3	635
A.5	Proof of Proposition 2.4	637
A.6	Proof of Proposition 2.5	638
A.7	Proof of Proposition 2.7	639
A.8	Proof of Proposition 2.8	640
A.9	Proof of Proposition 2.9	641
A.10	Proof of Proposition 2.10	643
A.11	Proof of Proposition 2.11	644
A.12	Proof of Proposition 2.12	645
A.13	Proof of Proposition 2.13	646
A.14	Proof of Proposition 2.14	646
A.15	Proof of Proposition 2.15	647
A.16	Monetary Frictions with an Alternative Timing Convention	649
A.17	The Example of Schmitt-Grohé and Uribe	653
<b>B</b>	<b>Addendum to Chapter 3</b>	<b>656</b>
B.1	Non-CES Demand and Variable Markups	656
B.2	Proof of Proposition 3.3	657
B.3	Proof of Proposition 3.4	659
B.4	Proof of Proposition 3.5	661
B.5	Proof of Proposition 3.6	662
B.6	Proof of Proposition 3.7	664
B.7	Proof of Proposition 3.8	666
<b>C</b>	<b>Addendum to Chapter 4</b>	<b>670</b>
C.1	Determinacy of Equilibrium in Small Linear Models: Useful Results	670
C.2	Proof of Proposition 4.3	676
C.3	Proof of Proposition 4.4	677
C.4	Proof of Proposition 4.5	681
C.5	Proof of Proposition 4.6	682
C.6	Proof of Proposition 4.7	683
C.7	Proof of Proposition 4.9	683
C.8	Proof of Proposition 4.11	685
<b>D</b>	<b>Addendum to Chapter 5</b>	<b>687</b>
D.1	Alternative Interpretation of the Habit Persistence Model	687

D.2	Proof of Proposition 5.1	688
D.3	Proof of Proposition 5.2	691
<b>E</b>	<b>Addendum to Chapter 6</b>	<b>692</b>
E.1	Proof of Proposition 6.1	692
E.2	Proof of Proposition 6.3	694
E.3	Proof of Proposition 6.6	696
E.4	Proof of Proposition 6.7	698
E.5	Proof of Proposition 6.9	700
E.6	Proof of Proposition 6.10	703
E.7	Proof of Proposition 6.11	705
E.8	Proof of Proposition 6.12	707
<b>F</b>	<b>Addendum to Chapter 7</b>	<b>709</b>
F.1	Proof of Proposition 7.6	709
F.2	Proof of Proposition 7.9	710
F.3	Proof of Proposition 7.10	712
F.4	The Optimal Noninertial Plan	713
F.5	Proof of Proposition 7.15	714
F.6	Proof of Proposition 7.16	715
<b>G</b>	<b>Addendum to Chapter 8</b>	<b>716</b>
G.1	Assumptions 8.3 and 8.4	716
G.2	Assumption 8.5	719
G.3	Technical Lemmas	719
G.4	Proof of Proposition 8.5	721
G.5	Proof of Proposition 8.6	723
G.6	Proof of Proposition 8.7	724
G.7	Proof of Proposition 8.8	727
G.8	Proof of Proposition 8.9	730
G.9	Proof of Proposition 8.10	737
G.10	Proof of Proposition 8.11	739
