Extreme Programming Refactored: The Case Against XP

MATT STEPHENS AND DOUG ROSENBERG
Contents at a Glance

Emperor’s New Code (a Story) .................................................. xi
Preface .................................................................................. xv
About the Authors ................................................................. xix
Acknowledgments ................................................................. xxix
Introduction ........................................................................... xxiii

Part I Another Fine Mess You’ve Gotten Me Into
(Laurel and Hardy Take Up Programming) .... 1

Chapter 1 XP in a Nuthouse (Oops, We Mean Nutshell) .... 3
Chapter 2 Where Did XP Come From? (Chrysler Knows
It Ain’t Easy...) ................................................................. 31
Chapter 3 The Case Against XP ............................................. 57

Part II Social Aspects of XP (Mama Don’t Let
Your Coders Grow Up to Be Cowboys) .... 83

Chapter 4 Extremo Culture .................................................... 85
Chapter 5 The On-site Customer ........................................... 117
Chapter 6 Pair Programming (Dear Uncle Doe,
My Pair Programmer Has Halitosis) ............. 135
Chapter 7 Oral Documentation (Oxymoronic,
or Just Plain Moronic?) ........................................ 161

Part III We Don’t Write Permanent Specs and
Barely Do Any Upfront Design, So .... 181

Chapter 8 Design After First Testing .................. 183
Chapter 9 Constant Refactoring After Programming
(If It Ain’t Broke, Fix It Anyway) ............... 201
Chapter 10 User Stories and Acceptance Tests .... 227
### Contents at a Glance

**Part IV**  *The Perpetual Coding Machine*  
Chapter 11  Software Is Never Done (The Schedule Does Not Exist Per Se)  
Chapter 12  Emergent Architecture and Design  
Chapter 13  Embracing Change (Embrace People, Manage Change)

**Part V**  *The Big Picture*  
Chapter 14  Scalability  
Chapter 15  Refactoring XP  
Chapter 16  Conclusion: Neutralizing the Reality Distortion Field

Contents

Emperor's New Code (a Story) ............................................ xi
Preface ............................................................................. xv
About the Authors ............................................................... xix
Acknowledgments ................................................................. xxi
Introduction ........................................................................... xxiii

Part I  Another Fine Mess You've Gotten Me Into
(Laurel and Hardy Take Up Programming) .... 1

Chapter 1  XP in a Nuthouse
(Oops, We Mean Nutshell) ............................................. 3
Extreme Programming in Theory ............................................. 4
What Problems Are Being Targeted by XP? ...................... 21
Extreme Programming in Practice: The Voice of eXPerience...... 23
Knocking It Down ... and Then Rebuilding It ..................... 26
Summary ............................................................................. 28

Chapter 2  Where Did XP Come From? (Chrysler Knows It Ain't Easy . . .) ............................................. 31
Overview of C3 ................................................................. 33
The XP Project Life Cycle (As Illustrated by the Activities at C3) ............................................................. 34
Problems with C3 ............................................................... 53
Summary ............................................................................. 56

Chapter 3  The Case Against XP ............................................. 57
A Self-Referential Safety Net (Circle of Snakes) ..................... 57
Tailoring a Process to Local Conditions:
  Why XP Stands on Its Head ............................................ 78
Summary ............................................................................. 82
## Contents

### Part III  We Don’t Write Permanent Specs and Barely Do Any Upfront Design, So ........ 181

Chapter 8  Design After First Testing .................. 183
When All You’ve Got Is a Hammer .......................... 184
XP Design Mantra: No BDUF .................................. 187
Problems with Unit Testing .................................. 188
Programming Without a Safety Net .......................... 197
Summary .......................................................... 199

Chapter 9  Constant Refactoring After Programming (If It Ain’t Broke, Fix It Anyway) ...... 201
Refactoring Heaven ............................................. 203
XP Design Mantra: Refactor Mercilessly .................... 206
Is Up-Front Design Sufficient to Avoid Large Refactorings Later? .................... 212
Refactoring with an Installed User Base ..................... 218
Summary .......................................................... 225

Chapter 10  User Stories and Acceptance Tests .......... 227
Tell Me a Story, Daddy ........................................ 229
User Stories vs. Use Cases .................................... 232
User Stories vs. Requirements ............................... 237
“Documenting” Requirements As Acceptance Tests ........ 242
Summary .......................................................... 245

### Part IV  The Perpetual Coding Machine ................. 247

Chapter 11  Software Is Never Done (The Schedule Does Not Exist Per Se) .............. 249
The Schedule Doesn’t Exist Per Se .......................... 250
Optional-Scope Contracts ................................. 260
Summary .......................................................... 267

Chapter 12  Emergent Architecture and Design .......... 269
XP Design Mantra: YAGNI .................................... 274
Building an Infrastructure with Emergent Design ........ 277
