Research Perspectives

Traffic loading on highway bridges

Peter Dawe
Contents

Author's biography  xi
About TRL  xiii
Foreword  xv
Acknowledgements  xvii
Conversion table  xix

Chapter 1  Introduction  1
1.1 Historical overview  1
1.2 Scope of contents  2
1.3 Choice of loading model  3
1.4 Influences on loading rules  4
1.5 Development of standards  5
1.6 Future developments  7
References  10

Chapter 2  Historical review: Part 1, 1911–54  11
2.1 Concrete Institute Report 1918  11
2.2 Ministry of Transport Standard Loading Train, 1922  13
2.3 Ministry of Transport Equivalent Loading Curve, 1931  13
2.4 BS 153  Standard specification for girder bridges, 1923  15
2.5 BS 153  Standard specification for girder bridges -1937 revision  17
2.6 Code of practice for simply supported steel bridges, 1949  18
2.7 Ministry of War Transport Memorandum No. 577, 1945  20
References  20

Chapter 3  Historical review: Part 2, 1954–78  21
3.1 BS 153: Part 3A: 1954  21
   3.1.1 Loading models  21
   3.1.2 Normal loading curve  22
### Chapter 3  
**Traffic loading on highway bridges**

<table>

</tr>
<tr>
<td>5.3</td>
<td>Derivation of loading</td>
</tr>
<tr>
<td>5.4</td>
<td>Future European vehicles</td>
</tr>
</tbody>
</table>

### Chapter 6  
**Revision of Type HA loading—2. Long span**

<table>
<thead>
<tr>
<th>Section</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1</td>
<td>Background</td>
</tr>
<tr>
<td>6.2</td>
<td>Outline of loading study</td>
</tr>
</tbody>
</table>
6.3 Data used in study
6.3.1 Vehicle weights and lengths
6.3.2 Proportions of different vehicle types
6.3.3 Variation in average vehicle weights through the day
6.3.4 Spacing between vehicles
6.4 Characteristics of traffic jams
6.5 Vehicle lane selection
6.6 Projections of traffic growth to 1990
6.7 Generation of traffic streams
6.8 Determination of equivalent uniformly distributed load
6.8.1 Method
6.8.2 Normal distribution
6.8.3 Extremal distribution
6.8.4 Lane load factors
6.9 Sensitivity studies
6.9.1 Percentages of heavy goods vehicles
6.9.2 Jam frequencies and duration
6.9.3 Traffic flow rate
6.9.4 Vehicle spacing
6.9.5 Lane distribution
6.10 Design values

Chapter 7 Composite version of BS 5400: Part 2
7.1 Background
7.2 Type HA loading
7.3 Type HB loading
7.4 HA lane factors
7.5 Load combinations and partial factors
7.6 Accidental wheel loading
7.7 Loads due to vehicle collisions with parapets
7.8 Secondary live loads
7.9 Department of Transport implementation
7.10 Design manual for roads and bridges, BD 37/01

Chapter 8 Short-span assessment loading
8.1 Background
8.2 Outline of methodology
8.3 Static load models
8.3.1 Vehicle data
8.3.2 Traffic modelling
8.4 Dynamic load model
8.4.1 Data
8.4.2 Dynamic effect model
8.5 Probabilistic load model

Chapter 11 **Collision loads**

11.1 Introduction 117
11.2 Early requirements 117
11.3 Bridge rehabilitation programme 118
11.4 Study of heavy goods vehicle collisions with highway structures 119
11.5 Design manual for roads and bridges BD 48/93 120
11.6 Design manual for roads and bridges BD 60/94 121
11.7 Computer simulation of heavy goods vehicles collisions with bridges 121
References 123

Chapter 12 **Control of traffic loading**

12.1 Introduction 125
12.2 Vehicle regulations 125
12.3 European vehicles 128
12.4 Traffic loading restrictions 130
12.5 Weight restrictions 130
References 131

Chapter 13 **Eurocodes**

13.1 Background 133
13.2 Development of ENV 1991-3 134
13.3 ENV 1991-3 [2], scope and contents 134
13.3.1 Load Model 1 134
13.3.2 Load Model 2 134
13.3.3 Load Model 3 135
13.3.4 Load Model 4
13.4 Derivation of Load Models 1 and 2
  13.4.1 Background
  13.4.2 Methodology
  13.4.3 Extrapolation methods
  13.4.4 Dynamic effects
  13.4.5 Loading patterns
  13.4.6 Influence lines
  13.4.7 Calibration of Load Model 1
  13.4.8 Load Model 2
13.5 Application of loading
  13.5.1 Lane widths
  13.5.2 Partial live load factors
  13.5.3 Load combinations
  13.5.4 Reduction factors
13.6 Other types of loading
  13.6.1 Accidental loads
  13.6.2 Braking
  13.6.3 Centrifugal force

Chapter 14 National Application Document (NAD) 147
  14.1 Background
    14.1.1 National requirements
    14.1.2 Calibration studies
  14.2 Initial parametric calibrations
    14.2.1 Scope
    14.2.2 Congested traffic
    14.2.3 Flowing traffic
    14.2.4 Adjustment factors—Load Model 1
    14.2.5 Adjustment factors—Load Model 2
    14.2.6 Reduction factors
    14.2.7 Abnormal vehicles—Load Model 3
  14.3 Final parametric calibrations
    14.3.1 Scope
    14.3.2 Adjustment factors (α)
    14.3.3 Reduction factors (ψ)
    14.3.4 Abnormal vehicles—Load Model 3
    14.3.5 Secondary loads—braking
    14.3.6 Secondary loads—centrifugal forces
    14.3.7 Accidental loads—collision forces on piers
    14.3.8 Accidental loads—vehicles on footways
  14.4 Published version of the UK NAD
    14.4.1 Introduction
    14.4.2 Partial safety factors (γ)
    14.4.3 Adjustment factors (α)
