A General Discussion on Applications of Spectroscopy to Biomedical Problems, was held at the University of Nottingham, UK on 1st, 2nd and 3rd September 2003.

Cover
See P. Dumas, pp. 289-302.
Chemical image of lipid distribution across a human skin section with a hair embedded. This chemical image was obtained by using synchrotron infrared microscopy, with a 6×6 μm² aperture, over an area of 150×150 μm².

Image kindly supplied by Dr Paul Dumas, LURE-CNRS, Centre Universitaire Paris Sud, Orsay, France.

Contents
1 Introductory Lecture: From biomolecules to biodiagnostics: Spectroscopy does it all
Michael Jackson
19 Histological and microscopy FT-IR imaging study on the proliferative activity and angiogenesis in head and neck tumours
P. Bruni, C. Conti, E. Giorgini, M. Pisani, C. Rubini and G. Tosi
27 Infrared microscopy of epithelial cancer cells in whole tissues and in tissue culture, using synchrotron radiation
41 The combined application of FTIR microspectroscopy and ToF-SIMS imaging in the study of prostate cancer
Ehsan Gazi, John Dwyer, Nicholas Lockyer, Peter Gardner, John C. Vickerman, Jaleel Miyan, Claire A. Hart, Mick Brown, Jonathan H. Shanks and Noel Clarke
61 Structural organisation of nucleic acids from tumour cells
Olena P. Repnytska, Galina I. Dovbeshko, Volodymyr P. Tryndiak, Igor M. Todor and Dmitriy V. Kosenkov
77 General Discussion
93 Discrimination between neurochemical and macromolecular signals in human frontal lobes using short echo time proton magnetic resonance spectroscopy
Mary A. McLean, Robert J. Simister, Gareth J. Barker and John S. Duncan
103 In vivo EPR spectroscopy: biomedical and potential diagnostic applications
Simon K. Jackson, Matthew P. Thomas, Sam Smith, Melanie Madhani, Stephen C. Rogers and Philip E. James

Mössbauer spectroscopy in biomedical research
Michael I. Oshtrakh

Raman spectroscopy for identification of epithelial cancers
Nicholas Stone, Catherine Kendall, Jenny Smith, Paul Crow and Hugh Barr

Bone tissue ultrastructural response to elastic deformation probed by Raman spectroscopy
Michael D. Morris, William F. Finney, Rupak M. Rajachar and David H. Kohn

General Discussion

Caveolin-1 isoform reorganization studied by image correlation spectroscopy
Anja Nohe, Eleonora Keating, Crystal Loh, Michael T. Underhill and Nils O. Petersen

Application of fluorescence correlation spectroscopy to the measurement of agonist binding to a G-protein coupled receptor at the single cell level
Stephen J. Briddon, Richard J. Middleton, Andrew S. Yates, Michael W. George, Barrie Kellam and Stephen J. Hill

Application of extended ultra-violet circular dichroism spectroscopy in biology and medicine
Gareth R. Jones and David T. Clarke

Biomedical applications of synchrotron radiation circular dichroism spectroscopy: Identification of mutant proteins associated with disease and development of a reference database for fold motifs
B. A. Wallace, Frank Wien, Andrew J. Miles, Jonathan G. Lees, Soren Vronning Hoffmann, Paul Evans, Graeme J. Wistow and Christine Slingsby

General Discussion

Terahertz pulsed imaging and spectroscopy for biomedical and pharmaceutical applications

Spectroscopic diagnosis and imaging of invisible pre-cancer
Kamran Badizadegan, Vadim Backman, Charles W. Boone, Christopher P. Crum, Ramachandra R. Dasari, Irene Georgakoudi, Kristin Keefe, Karl Munger, Stanley M. Shapshay, Ellen E. Sheets and Michael S. Feld

Multiple labelled nanoparticles for bio detection
Frances T. Docherty, Maureen Clark, Graeme McNay, Duncan Graham and W. Ewen Smith

Imaging capabilities of synchrotron infrared microspectroscopy
P. Dumas, N. Jamin, J. L. Teillaud, L. M. Miller and B. Beccard

General Discussion

Concluding Remarks
Mark J. Tobin
