Prestressed concrete bridges: design and construction

Nigel R. Hewson
Contents

Preface xiv
Disclaimer xvi
Acknowledgements xvii
List of figures xix
List of tables xxviii

1. Prestressed concrete in bridgeworks 1
   Introduction 1
   Principles of prestressing 4
     Pre-tensioning 6
     Post-tensioning 7
   Brief history of prestressed concrete bridges 9
   References 19

2. Prestressing components and equipment 20
   Introduction 20
   Proprietary systems 20
   Wires 21
   Strands and tendons 23
   Bars 24
   Anchorages 25
   Tendon couplers 26
   Ducting 28
   Equipment for placing tendons 30
   Stressing jacks 31
   References 33

3. Durability and detailing 34
   Introduction 34
   Recent history of durability issues in the UK 34
   Corrosion protection and ducting 36
   Concrete 37

Input data 143
Analysis of the structure 146
Output 150
Summary 150
References 150

9. Slab bridges 151
   Introduction 151
   Solid-slab bridges 152
   Voided-slab bridges 152
   Design of slab bridges 154
   Reference 155

10. Beam-and-slab bridges 156
    Introduction 156
    General arrangement 160
    Construction of in situ beam-and-slab decks 163
    Casting and transportation of precast beams 165
    Erection of precast beams 169
    Casting of deck slab 171
    Design of beam-and-slab decks 173
       General design 173
       Stress distribution through section 173
       Precast beams in continuous and integral decks 176
       Prestress and reinforcement 176
    References 178

11. In situ multi-cell box girder decks 179
    Introduction 179
    General arrangement 180
    Construction of in situ multi-cell box girders 181
    Design of in situ multi-cell box girders 186
    References 189

12. In situ single-cell box girder bridges 190
    Introduction 190
    General arrangement 191
    Construction, span-by-span 194
    Construction by balanced cantilever 197
    Design of in situ single-cell box girders 201
       Box behaviour 202
       Prestress layout 202
       Transverse prestressing of top slab 202
       Deck articulation 204
       Deck construction 205
    References 205
13. Precast segmental box girders

Introduction 206
General arrangement 208
Casting of segments 210
Storage and transportation of segments 218
Segment erection, general 222
Segment erection by the balanced cantilever method 229
Segment erection by the span-by-span method 236
Segment erection by the progressive placement method 239
Design aspects associated with precast segmental decks 240
Prestress tendon layout 240
Shear keys at joint 240
Design with epoxy or concrete joints 243
Design with dry joints 244
Typical segment details 247
Deck erection 247
References 248

14. Precast full-length box girders 250

Introduction 250
General arrangement 253
Casting and storage of the units 253
Transportation of the units 256
Erection of the units 258
Design of full-length precast box girder decks 261

15. Incrementally launched box girder bridges 262

Introduction 262
General arrangement 264
Casting the deck 267
Launching the deck 271
Design aspects associated with launched box girder decks 276
Longitudinal design during launch 276
Transverse and local design during launch 278
Construction tolerances 279
Construction loading 279
Loads on supports during launching 279
References 281

16. Cable-stayed bridges 282

Introduction 282
Cable-stayed bridge arrangements 284
Construction of concrete cable-stayed bridges 287
Box girder decks 289
Beam-and-slab decks 290
Design aspects associated with concrete cable-stayed bridges 295
## Contents

- Analysis of cable-stayed bridges 296
- Deck design and behaviour 298
- Deck dynamic behaviour 302
- Stays 303
- Temporary loading 303
- References 305

### 17. Other prestressed concrete bridge types 306

- Introduction 306
- Extra-dosed bridges 306
- Fin-back bridges 308
- Truss bridges 309
- Arch bridges 310
- Footbridges 312
- References 313

### 18. Problems and failures 314

- Introduction 314
- Prestressing components 314
  - Wire, strand and tendon failures 314
  - Tendon extensions 315
  - Grouting and ducts 316
  - Corrosion 316
- Concrete and reinforcement 317
  - Concrete cracks 317
  - Honeycombing 318
  - Concrete cover 320
- Problems during construction 321
  - Failures due to design 321
  - Construction procedures 322
  - Structural behaviour problems 323
- Problems after opening 324
  - Durability 324
  - Rehabilitation and modifications 324
- References 324

### Appendix A: Definitions 326

### Appendix B: Symbols and notations used 328

### Appendix C: Further reading and useful references 332

- Introduction 332
- Books 332
- Design guides and technical reports 333
- Articles 334
- Standards, codes of practice and specifications 335
- Websites 337
