Contents

Going, going, gone ........................................... 73
Outflow from sheer chaos .................................. 78
Hot mud baths of Elysium ................................. 86
River-fed lakes of a bygone era ......................... 92
Creepy ....................................................... 93
Martian ink blots ........................................... 96
Long, long ago, a water world ......................... 99
The Faint-Young-Sun paradox .......................... 100
Early Martian greenhouse ............................... 100
Seeing Mars across the geo-spectrum ................. 102
Concensus .................................................. 105

4 Oceanus Borealis and the Austral Ice Sheet ........ 107
The Faul guy ............................................... 107
Faul’s leads point the right way ........................ 110
Mars: Planet Ice .......................................... 112
A river runs through it .................................. 113
Neptune on Mars ......................................... 116
Take it with a grain of salt ............................. 135
Mountain men and women of Mars ..................... 137

5 Mammoth Ice Age ....................................... 139
Eureka! ....................................................... 139
White Charitum Christmas ............................. 159
Gacial postmortem: death by melting .................. 166
A different touch ......................................... 169
Glaciation goes global .................................... 170
Outrage ....................................................... 172
Sheer madness ............................................. 174
Tucson Mafia ............................................... 179
Icy warm ..................................................... 182
Outer edge of the inner realm ......................... 185
Two volatile planets ...................................... 186
Red, White, and Blue Mars ............................. 194
Mars: a gassy icy planet ................................ 197
When opposites attract .................................. 199
Gassy geysers and crumbling chaos .................... 200
Where are the carbonates? ............................. 201
Cryogenic Martian Rock of Ages ....................... 202

6 Old Times, New Wrinkles .............................. 209
U channel .................................................... 210
Special things I see in U ................................ 218
No John F. Kennedy! ..................................... 222
Rocky Roads of Argyre ................................... 224
# Contents

Dirty oceans: smooth and filling! ................................................................. 226  
Grand-daddy ocean? ................................................................. 229  
Martian Lakes' Chronicles ................................................................. 230  
Fractal erosion ................................................................. 242  
Washed away ................................................................. 244  

7 Neoglacial ........................................................................................................ 247  
Neoglacial is now ................................................................. 247  
Permafrost patterns ................................................................. 254  
Permafrost processes ................................................................. 255  
Permafrost cocktail ................................................................. 275  
Icy familiarity ................................................................. 276  
Icy unfamiliarity ................................................................. 317  
Polar caps: golly, they're glacial ................................................................. 323  
Creepy, oozy, icy ................................................................. 338  
So, it flows. Why think "ice"? ................................................................. 345  
Neoglacial gullies ................................................................. 346  
Mars' Little Ice Age ................................................................. 358  
Icy time ................................................................. 360  
Ice, now and then ................................................................. 361  
Climactic climate ................................................................. 363  
When equilibration disturbs the balance ................................................................. 366  
Cold facts ................................................................. 369  
Conflict resolution ................................................................. 373  
Mars, a different sort of place ................................................................. 374  
Mars: not so far from home? No farther than Nome? ................................................................. 377  

8 Living Mars ........................................................................................................ 385  
Magnificent desolation ................................................................. 385  
Through a glass darkly ................................................................. 388  
One: the loneliest number ................................................................. 392  
Nothing but pigeon whitings (or is it theoretical anticipation?) ................................................................. 393  
God's recipe on the Internet ................................................................. 395  
Playing God or just playing with fire? ................................................................. 402  
Water-world Mars: living world? ................................................................. 402  
The great bug search (*Viking Landers*) ................................................................. 406  
Calling cards from Mars: verifying the sender ................................................................. 408  
ALH84001 and other odd rocks ................................................................. 410  
Martian island jungles? ................................................................. 417  
Jungle law ................................................................. 423  
Contact ................................................................. 427  

9 The Future Living Mars ........................................................................................................ 431  
Marching to Mars ................................................................. 435  
One-way ticket to Mars ................................................................. 438
Breathe easy ......................................................... 440
Exploring Mars, near term ........................................ 441
The next giant leap ................................................ 447
Watering Mars ....................................................... 450
Heating Mars ......................................................... 454
Electrifying Mars ................................................... 458
Farming Mars ......................................................... 460
From dust and thin air, cities will rise ......................... 462
Spaceship Mars? ..................................................... 477

10 New World ....................................................... 481
  Smart and wise? .................................................. 481
  Terrorforming? ................................................... 482
  The Sixth Extinction ............................................. 487
  A pound of light ................................................ 490
  Fateful, fast-forward look at two worlds ...................... 492
  The slow demise of life on Earth .............................. 499
  Earth's end game ............................................... 504
  Mars before the end .......................................... 509
  Still waiting for the good news... ............................ 511

11 The Late News .................................................. 517
  Spiritual exploration and an opportunity for all ............ 517
  Spirit explores Gusev Crater .................................. 518
  Opportunity rocks .............................................. 523
  Expressly European ............................................ 524
  An American Presidential Directive ........................... 526
  Wet ink .......................................................... 530
