Arnulf Grübner

The Rise and Fall of Infrastructures

Dynamics of Evolution and Technological Change in Transport

With 97 Figures

Physica-Verlag Heidelberg
# Contents

*Preface*  

1. **Prologue and Introduction**  

2. **Methodology**  
   2.1. **Descriptive Growth, Diffusion and Substitution Models**  
      2.1.1 Introduction into biological growth models  
      2.1.2 Simple growth models  
      2.1.3 Simple substitution models  
      2.1.4 Multiple substitution models  
      2.1.5 Parameter estimation and statistical uncertainty  
   2.2. **Causal Models for Temporal Diffusion and Substitution**  
      2.2.1 Innovation diffusion and adoption models  
      2.2.2 Diffusion models in economics  
      2.2.3 A self-organizing model of technology diffusion and structural change  
   2.3. **Spatial Diffusion Models**  
   2.4. **Diffusion Models Integrating Time and Space**  
   2.5. **Overview and Conclusion**  

3. **Evolution of Infrastructures: Growth, Decline, and Technological Change**  
   3.1. Canals and Ships  
   3.2. Railways  
   3.3. Roads, Horses, and Cars  
   3.4. Air Transport  

*Preface*  

1. **Prologue and Introduction**  

2. **Methodology**  
   2.1. **Descriptive Growth, Diffusion and Substitution Models**  
      2.1.1 Introduction into biological growth models  
      2.1.2 Simple growth models  
      2.1.3 Simple substitution models  
      2.1.4 Multiple substitution models  
      2.1.5 Parameter estimation and statistical uncertainty  
   2.2. **Causal Models for Temporal Diffusion and Substitution**  
      2.2.1 Innovation diffusion and adoption models  
      2.2.2 Diffusion models in economics  
      2.2.3 A self-organizing model of technology diffusion and structural change  
   2.3. **Spatial Diffusion Models**  
   2.4. **Diffusion Models Integrating Time and Space**  
   2.5. **Overview and Conclusion**  

3. **Evolution of Infrastructures: Growth, Decline, and Technological Change**  
   3.1. Canals and Ships  
   3.2. Railways  
   3.3. Roads, Horses, and Cars  
   3.4. Air Transport
4. An Integrative View on Long-Term Infrastructure Development
   
   4.1. The Structural Evolution of Transport Infrastructures
   
   4.2. Evolution of the Performance of Infrastructures (modal split)
   
   4.2.1 Passenger modal split
   
   4.2.2 Modal split for goods transport
   
   4.3. Driving Forces and the Economics of Modal Split Changes
   
   4.4. Long-Term Transport Intensities of an Economy
   
   4.5. Substitutability Versus Complementarity of Transport and Communication
   
5. Infrastructures and Long Waves
   
6. Summary and Conclusion
