IABSE SYMPOSIUM
SHANGHAI 2004

Metropolitan Habitats and Infrastructure

REPORT
RAPPORT
BERICHT

Organised by the Chinese Group of IABSE
In conjunction with China Civil Engineering Society (CCES)
Institute for Municipal Engineering, ULB Darmstadt
Table of Contents

Preface .................................................. 4
Table of Contents .......................................... 5
List of Authors ........................................... 17

Keynote Lectures

Mikael W. BRAESTRUP, Denmark ........................................ 24
Constructing Durable Strait Crossings: Recent Danish Experience

J.Y. Richard LIEW, Singapore ......................................... 30
Design Criteria for Buildability of Multistory and Large Span Structures

Holger SVENSSON, Germany ........................................ 36
Bridge Competitions

Koichi TAKANASHI, Japan ........................................... 42
Residential Complex with a Pleasant Living in Hot and Humid Regions

Man-Chung TANG, USA ............................................ 48
San Francisco-Oakland Bay Bridge Concepts and Alternatives

Shiling ZHENG, China ............................................. 54
Better Building, Better City

Planning and Evaluation of Bridges (1B)

Landmark Footbridges in the Urban Environment .................. 60
I. FIRTH, UK

Urban Bridge Design — The Death of Flow of Forces Design .... 62
J.A. SOBRINO, M.D.G. PULIDO, Spain

Program Management for the Replacement of the Cooper River Bridge 64
R. CLAIR, C. DWYER, B. JOHNSON, et al, USA

U Shape Prestressed Concrete Decks for Railway Viaducts .......... 66
D. DUTOIT, J.C. CHUNIAUD, S. MONTEN, et al, France

Combined Railway and Highway Cable-Stayed Bridge ............ 68
Q.H. FANG, China

Route 9 Highway Bridge in Hong Kong, China — Design and Construction 70
N. HUSSAIN, C. WONG, P. THOMPSON, Hong Kong, China
## Planning and Evaluation of Structures (1S)

Cast-in-Place Concrete Cable-Stayed Bridges in USA ....................................................... 184
M. LOIZIAS, USA
Decked Precast and Prestressed Concrete Girder Bridges ................................................. 186
Z. MA, J.L. HULSEY, USA
Analysis of Dynamic Response of Bridges under Moving Trains ..................................... 188
M. MAJKA, M. HARTNETT, D. O’DWYER, Ireland
Support Modeling of Skewed Slab-Girder Bridges ............................................................ 190
S. MALEKI, Iran
Design of Cable Supported Bridges Using Topology Optimization .................................... 192
K. MEISS, Germany
Performance Evaluation System for Bridge Concrete Slabs .............................................. 194
A. MIYAMOTO, K. KAWAMURA, H. NAKAMURA, et al, Japan
Seismic Responses of Metropolitan Bridges and Flyovers .................................................. 196
D.K. MOHAPATRA, India

Ductility of Prestressed Segmental Girders with Unbonded Tendons .................................. 198
J. MÖLLER, L. STEMPNIEWSKI, Germany

Design of the New San Francisco-Oakland Bay Bridge ......................................................... 200
M. NADER, R. MANZANAREZ, G. BAKER, USA

Experimental Study on Lateral Forces Induced by Pedestrians ......................................... 202
S. NAKAMURA, H. KATSUURA, K. YOKOYAMA, Japan

Seismic Analysis and Proposed Retrofit Design of Cable-Stayed Bridge .............................. 204
A. OTSUKA, Y. FUJINO, H. KIKAWA, et al, Japan

Soil-Structure Interaction of Integral Bridges ................................................................. 206
F. ROLLER, J. STUDNICKA, Czech

The New Badalona Railway Bridge—a Structure for the City ........................................... 208
J. ROMO, A. PÉREZ, R. MONTERROSO, Spain

Ultrasonic Impact Treatment of Welded Joints ................................................................. 210
S. ROY, J.W. FISHER, USA

Structural Optimization of Extradosed Bridges .............................................................. 212
F. SAAD, Egypt

Design and Analysis of Aluminium Bridges ....................................................................... 214
F. SOETENS, I.V. STRAALEN, Netherlands

Seismic Design for Long Span Bridges— the US Practice .................................................. 216
J. SUN, M.C. TANG, USA

Design of the Main Spans of the Seohae Grand Bridge ..................................................... 218
M.C. TANG, D. JANG, USA

Control of Longitudinal Movement of Long Span Cable Stayed Bridge .............................. 220
Y. YAMASAKI, C. SHEN, Japan

Analysis and Design of Steel Orthotropic Decks .............................................................. 222
Q. YE, G.N. FANJIANG, USA

Design and Construction of Movable Bridges in the US .................................................. 224
B. YIN, P.M. SKELTON, R.S. MOSES, USA

The Saguenay River Suspended Bridge ........................................................................... 226
A.R. ZAKI, V. CHANDRA, M. VIRLOGEUX, et al, Canada

Model Test and Analysis on Buckling of Steel Box Arch of Lupu Bridge ............................ 228
Z. ZHANG, X. WANG, J. ZHAO, et al, China

Behavior and Retrofit Study of Highway Steel Bridge Fatigue Cracking .......................... 230
Y. ZHAO, W.M.K. RODDIS, USA

Wind Direction Effect on Buffeting Response of a Long-Span Bridge ............................... 232
L.D. ZHU, Y.L. XU, China

Displacement-Based Seismic Design for Bridge Columns .................................................... 234
X. ZHU, Y. NI, China

Seismic Analysis of Equipment Mounted on Structures ..................................................... 236
A.P. ASFURA, USA

An Integral Composite Bridge in Trento, Italy ..................................................................... 238
B. BRISEGHELLO, E. SIVIERO, T. ZORDAN, Italy
Temporary Live Loads on Artificial Structures .................................................. 240
S. BOKHANOVA, Russia
Adjustable Deck Solutions for “Veneto Strade” Flyovers .................................. 242
B. BRISEGHELLA, T. ZORDAN, Italy
Recent Advances on Design Theory of CFST Arch Bridges .............................. 244
B. CHEN, China
Piers’ Impact Protection of Runyang Bridge ...................................................... 246
C. CHEN, China
The Integer Design and Innovation Technology of Maocaojie Bridge ................. 248
M. CHEN, China
Earthquake-Damaged RC Bridge Piers with FRP Wraps .................................... 250
An Investigation into Routes for Very Heavy Load Traffic ............................... 252
B.M.H. DJORAI, Netherlands
Aerodynamics Characteristics of New-Type Super Long Span Bridge .................. 254
K. FUMOTO, J. MURAKOSHI, K. HATA, et al, Japan
Collision Protection for Piers on Main Navigational Channel ......................... 256
R. HUANG, Q. DENG, A. YAN, China
Analysis of Double Main Box-Girder Bridge with Sharp Curvature ................... 258
M. INOUE, Y. KURATA, K. AOKI, Japan
Aerodynamic Study of the Neva Twin Cable-Stayed Bridge .............................. 260
I. KOLYUSHEV, R. KIVILOUMA, Russia
Reasonable Construction States of Tied-Arch Bridge .................................... 262
C. LI, G. ZENG, Y. LIU, China
Highway Bridge Design Load and Locality of Truck Loads ............................. 264
J.V. DE LINDT, G. FU, USA
Long-Span Bridges with Continuous Rigid Frame and Flexible Arch .................. 266
S. LUO, A. YAN, Z. LIU, China
New Bridges on the Hungarian Reach of Danube River .................................... 268
G. MEDVED, Hungary
Fatigue of Steel Plate Panels due to Repeated Out-of-Plane Deflection ............... 270
D. PATERSON, B.T. YEN, J.W. FISHER, USA
Temperature Induced Deformations in Match-Cast Segments ............................ 272
G.A. ROMBACH, Ra’ed ABENDEH, Germany
Rayleigh’s Damping in Nonlinear Dynamic Analysis of Bridges ....................... 274
B. SONG, S. HAO, Y. CHEN, China
Features of Steel Cable—Stayed Bridges ....................................................... 276

Flexural Calculation Mode for Composite Box Girder ...................................... 282
W. WU, J. YE, S. WAN, China
Shear Lag Effect in Box Girder of Cable-stayed Bridge .................................................. 284
Y. Xiang, Y. Yao, J. Wang, China

Load Capacity Analysis for Concrete-Filled-Steel-Tube Arch Bridge ............................... 286
Q. Yan, C. Su, L. Li, China

Reconstruction of L'Acadie Elevated Roundabout .............................................................. 288
A.R. Zaki, O. Jolv, S. Demirdjian, Canada

Design and Construction of East Ocean Bridge Non-Navigation Channel ......................... 290
J. Zhang, J. He, H. Yuan, China

Design of Nielsen System A-Shaped Tied Arch Bridge ...................................................... 292
S. Zhang, Q. Li, China

Ultimate Load Bearing Capacity of Reinforced Concrete Arch Bridges ............................. 294
H. Zhao, X. Shao, G. Liu, et al, China

Design and Analysis of Structures (2S)

Encased Composite Beams in Hogging Bending Zone ......................................................... 296
J. Hegger, C. Goralski, S. Rauscher, Germany

Foundation Stiffness and Aerodynamic Behaviour of a Building ....................................... 298
L. Maertens, J.L. Goovaerts, Belgium

Supporting the Concurrent Conceptual Design of Buildings ............................................. 300
J. Miles, D. Boucllaghem, C. Anumba, et al, UK

Structural Safety and Reliability of Post-Tensioned Floor-Slabs ..................................... 302
U. Albrecht, G. Raynard, Germany

Recent Advancement in Tall Earthquake Resistant Structures ......................................... 304
H.U. Baumann, USA

Active Vibration Isolation of Structures with Vibration Sensitive Equipment ..................... 306
C. Block, H.P. Woelfel, Germany

Holistic Design and Analysis for an Out-of-Codes Tall Building Structure ....................... 308
J. Chen, J. Ding, Y. Pan, et al, China

Interfacial Stresses in Beams Strengthened with Composite Plates .................................. 310
J. Deng, M.M.K. Lee, UK

Design of Large-Span Roof of Capital Museum's New Building ....................................... 312
Z. Fan, China

Risk and System Analysis Model in Geotechnical Engineering ......................................... 314
S. Hintze, M. Carlsson, H. Stille, Sweden

Rehabilitation of the Roof Structure at a Sports Center in Belgrade ................................ 316
M. Komnenovic, B. Stevanovic, SCG

Acceptance Criteria for the Design of High-Rise Buildings ............................................ 318
O. Kübler, M.H. Faber, M. Fontana, Switzerland

Storey-Based Buckling of Multi-Storey Unbraced Frames ............................................... 320
Y. Liu, L. Xu, Canada

To Probabilistic Reliability Assessment Methods Applicable in Codes ............................. 322
P. Marek, D. Pustka, Czech
Reinforcing Methods for Prefabricated Timber - Framed Walls .................................................. 324
M. PREMROV, P. DOBRILA, Slovenia

Analysis for Prestressed Concrete Bridge .......................................................... 326
Q. HUANG, H. WU, Z. WANG, China

Disaster Mitigation of Gas Explosions in Buildings .............................................. 328
H. SCHMIDT, C.A. GRAUBNER, Germany

Form Finding for Compression-Only or Tension-Only Structures ......................... 330
J.W. TANG, Y. XIE, P. FELICETTI, Australia

Optimization of Adaptive Structures .............................................................. 332
P. TEUFFEL, Germany

Beam-Column Connections in Multi-Story Steel Frame ........................................... 334
X. WANG, Y. LIANG, Q. LI, et al, China

Reliable Structural Damage Assessment Using Energy Density Spectra ................ 336
K.K.F. WONG, Y. WANG, Singapore

The Petuelring Tunnel in Munich, Germany ...................................................... 338
O. WURZER, R. WULF, Germany

Giant “CD” Canopy of Beijing Zhongguancun Software Plaza ................................ 340
