CONTENTS

Preface xi

Chapter 1. Introduction 1

I. Lens Design 2
   A. Lens Aberrations 4
   B. The Petzval Sum 4
   C. Remounting a Lens 6

II. A Brief Historical Survey 7
   A. 1840 to 1866 7
   B. 1866 to 1890 8
   C. 1890 to 1914 8
   D. Interwar Period, 1918 to 1940 8
   E. The Post World War II Period 9

III. Lens Markings 9
    A. Aperture Control Devices 10
    B. Aperture Designation 12
    C. Focusing Devices 13

IV. Identifying a Given Lens 14

V. Some Recent Developments 15
   A. Aspheric Surfaces 15
   B. Antireflection Coatings 16
Chapter 2. Meniscus Landscape Lenses

I. The Wollaston Simple Meniscus

II. The Achromatic Landscape Lens

III. Other Modifications of the Landscape Lens
   A. The Grubb Aplanat
   B. Dallmeyer's Rapid Landscape Lens
   C. Distortionless Landscape Lenses
   D. The Front Meniscus Lens

Chapter 3. Portrait Lenses

I. Chevalier's Photographe

II. The Petzval Portrait Lens
   A. The Cône Centralisatür Lens
   B. The Grün Liquid Lens
   C. The Reversing Prism

III. Other Portrait Lenses
   A. The Dallmeyer Patent Portrait Lens
   B. The Voigtländer Lens of 1878
   C. The Steinheil Portrait Antiplanet
   D. The Kodak f/1.9 Cine Lens
   E. The R-Biotar

IV. Curved-Field Lenses

V. The Field Flattener
Chapter 4. Early Double Objectives

I. The Advantages of Symmetry
II. Early Symmetrical Lenses (Not Spherically Corrected)
   A. The Sutton Panoramic Lens
   B. The Globe Lens
   C. The Pantoskop
   D. The Periskop
   E. The Hypergon
   F. Wollensak Portrait Lenses
III. Unsymmetrical Doublets (Not Spherically Corrected)
   A. Early Experiments
   B. The Ross Doublet
   C. Hemisymmetrical Doublets
IV. Symmetrical Doublets (Spherically Corrected)
   A. Achromatized Periscopic Type
   B. The Rapid Rectilinear or Aplanat
   C. The Gundlach Rectigraphic Lens
V. Unsymmetrical Doublets (Spherically Corrected)
   A. Morrison's Lenses
VI. Airspaced Triple Combinations
   A. Dallmeyer's Triple Achromatic Lens
   B. The Abbe-Rudolph Apochromatic Triplet
VII. The Steinheil Antiplanets

Chapter 5. Optical Glass

I. Early History of Optical Glass
II. Optical Properties of Glass
III. The Schott Glass Works
IV. The Lanthanum Crowns
V. Optical Plastics
VI. Other Materials

References

Chapter 6. The First Anastigmas

I. New-Achromat Doublets

II. The Zeiss Anastigmas

III. The Aldis Stigmatic Lenses

IV. The Unar and Tessar
   A. Modifications of the Tessar

V. Symmetrical Anastigmas
   A. The Dagor Lens
   B. The Orthostigmat and Collinear
   C. The Airspaced Dagor Type
   D. Quadruple Cemented Lenses
   E. Airspaced Quadruplets
   F. Quintuple Double Anastigmas

VI. The Dialyte Type

VII. Unsymmetrical Double Anastigmas

Chapter 7. The Triplet Lens and Its Modifications

I. The Cooke Triplet

II. The Heliar and Its Variations

III. The Speedic Type

IV. The Ernostars and the Sonnars

V. Modified Triplets by Leitz

VI. The Wray High-Aperture Radiographic Lens

Chapter 8. Meniscus Anastigmas

I. The Double-Gauss Lens

II. The Zeiss Planar Lens
Chapter 9. Telephoto Lenses
I. The Petzval Orthoskop
II. The Dallmeyer and Miethe Telephotos
III. Self-Contained Telephotos
IV. Modern Telephoto Zoom Lenses

Chapter 10. Reversed Telephoto Lenses
I. Advantages and Applications
II. Fish-Eye or Sky Lenses
III. The Biogon Type

Chapter 11. Varifocal and Zoom Lenses
I. Introduction
II. Historical
III. Zoom Lens Types
   A. The Two-Component Zooms
   B. Zoom Lenses Depending on the Donders Principle
   C. Modern Complex Designs
   D. Macro Zooms
IV. Optically Compensated Zoom Lenses

Chapter 12. Catadioptric (Mirror) Systems
I. Catoptric Systems
II. Catadioptric Systems
   A. Single-Mirror Systems
   B. Two-Mirror Systems
### Chapter 13. Lens Attachments
