Introduction to the retail motor industry and Health & Safety at Work 1
Detail of the motor vehicle maintenance and repair industry
An introduction to Health & Safety at Work

1 Engines and lubrication 11
   Engine construction
   Four stroke and two stroke cycles
   Valve timing – variable valve timing
   Combustion
   Lubrication and lubrication systems

2 Cooling systems 58
   Cooling system terminology
   Liquid (water) cooled system
   Air-cooled system
   Anti-freeze
   Specific heat capacity
   Fans and pumps

3 Fuel systems 85
   Petrol fuel system
   Petrol injection
   Carburettors
   Diesel fuel systems
   Direct injection – indirect injection
   Common rail fuel system

4 Engine air supply and exhaust systems 128
   Engine air supply – air filters – manifolds
   Exhausts systems – silencers
   Oxygen sensor
   Air flow meters
   Turbo-charger

5 Transmission systems 141
   Clutch
   Gearbox
   Fluid flywheel and torque convertor
   Transmission systems – drive shafts
Page dimensions: 557.0x749.0

Contents

Hub types – semi-floating, fully floating, three-quarter floating
Gear ratios – torque multiplication

6 Suspension systems
Non-independent – leaf spring suspension
Independent suspension
Leaf spring construction
Dampers (shock absorbers)

7 Braking systems
Hydraulic braking systems
Drum brakes
Disc brakes
Master cylinder
Wheel cylinders
Brake fluid
Braking efficiency

8 Steering, wheels and tyres
Ackerman principle
Steering angles
Steering geometry
Track adjustment
Steering boxes
Toe-out on turns

9 Electrical and electronic principles
Principles of magnetism and electricity
Introductory electronics
Computer controlled systems
Networking and CAN
Multiplexing
Meters

10 Electrical and electronic systems
Alternator
Battery
Charging system
Starting systems
Electrical principles

11 Ignition systems
Ignition systems – coil, capacitor (condenser)
Electronic ignition systems, non-electronic ignition systems
Fault tracing and service and maintenance procedures
Sensors and pulse generators
Ignition timing
Diagnostic trouble codes

12 Electrical systems and circuits
Central locking
Screen wipers
Vehicle security alarm
Electric windows
Screen washers
Electric mirrors
Vehicle lighting systems
Supplementary restraint systems – airbags and seatbelt pre-tensioners

13 Measuring instruments and measurement
Micrometers
Vernier calipers
Feeler gauges
Number approximations – typical motor vehicle measurements
Electrical test meters

14 Organisations and qualifications
Organisations in the motor trade
Qualifications and careers

Answers to self assessment questions

Index
