Human–Technology Interaction
Methods and Models for Cognitive Engineering and Human–Computer Interaction

EDITED BY
Alex Kirlik
Contents

Foreword vii
K. R. Hammond

Contributors xv

I Background and Motivation

1 Cognitive Engineering: Toward a Workable Concept of Mind 3
Alex Kirlik

2 Introduction to Brunswikian Theory and Method 10
William M. Goldstein

II Technological Interfaces

Introduction 27
Alex Kirlik

3 Knowledge versus Execution in Dynamic Judgment Tasks 29
Ann M. Bisantz, Alex Kirlik, Neff Walker, Arthur D. Fisk, Paul Gay, and Donita Phipps

4 Understanding the Effects of Computer Displays and Time Pressure on the Performance of Distributed Teams 43
Leonard Adelman, Cedric Yeo, and Sheryl L. Miller

5 Supporting Situation Assessment through Attention Guidance and Diagnostic Aiding: The Benefits and Costs of Display Enhancement on Judgment Skill 55
William J. Horrey, Christopher D. Wickens, Richard Strauss, Alex Kirlik, and Thomas R. Stewart
III Automation and Decision Aiding

Introduction 89
Alex Kirlik

7 Measuring the Fit between Human Judgments and Alerting Systems: A Study of Collision Detection in Aviation 91
Amy R. Pritchett and Ann M. Bisantz

8 Trust, Automation, and Feedback: An Integrated Approach 105
Younho Seong, Ann M. Bisantz, and Gordon J. Gattie

Ellen J. Bass and Amy R. Pritchett

IV Alternatives to Compensatory Modeling

Introduction 129
Alex Kirlik

10 Inferring Fast and Frugal Heuristics from Human Judgment Data 131
Ling Rothrock and Alex Kirlik

11 Viewing Training through a Fuzzy Lens 149
Gwendolyn E. Campbell, Wendi L. Van Buskirk, and Amy E. Bolton

12 Achieving Coherence: Meeting New Cognitive Demands in Technological Systems 163
Kathleen L. Mosier and Shane T. McCauley

V Into the Field: Vicarious Functioning in Action

Introduction 177
Alex Kirlik

Asaf Degani, Michael Shafto, and Alex Kirlik

14 Understanding the Determinants of Adaptive Behavior in a Modern Airline Cockpit 197
Stephen M. Casner

15 Abstracting Situated Action: Implications for Cognitive Modeling and Interface Design 212
Alex Kirlik

VI Ecological Analysis Meets Computational Cognitive Modeling

Introduction 227
Alex Kirlik
16 The Emerging Rapprochement between Cognitive and Ecological Analyses 230
Wayne D. Gray

17 The Use of Proximal Information Scent to Forage for Distal Content on the World Wide Web 247
Peter Pirolli

18 Kilograms Matter: Rational Analysis, Ecological Rationality, and Closed-Loop Modeling of Interactive Cognition and Behavior 267
Michael D. Byrne, Alex Kirlik, and Chris S. Fick

VII Reflections and Future Directions

19 Reflections from a Judgment and Decision Making Perspective 287
Terry Connolly

20 Reflections from a Cognitive Engineering and Human Factors Perspective 292
Kim J. Vicente

Name Index 297
Subject Index 303
